## 1. INTRODUCTION

The wireless PURE GPS is your entry into the world of GPS-based bike computers. It combines simple operation with advanced technology. This manual provides comprehensive instructions for setting up, operating, maintaining, and troubleshooting your Sigma Pure GPS Bicycle Computer, ensuring you get the most out of its features.

## 2. PRODUCT OVERVIEW

The Sigma Pure GPS Bicycle Computer is designed to provide essential cycling data with ease. Its large display ensures clear and legible information, including altitude functions and a graphical altitude profile. The device also features a simple compass navigation to guide you back to your starting point or a selected location.

### Key Features:

- Single button operation for intuitive control.
- Large display (29 x 45mm) for enhanced readability.
- GPS-based speed and distance information.
- Integrated air pressure sensor for accurate altitude data.
- Compass navigation for directional guidance.

#### 3.2 Initial Power On and GPS Acquisition

Press the main button to power on the device. The computer will automatically begin searching for GPS signals. For best results, ensure you are in an open area with a clear view of the sky. GPS acquisition may take a few moments.

### 4. OPERATING INSTRUCTIONS

The Sigma Pure GPS features a user-friendly interface with single-button operation to navigate through its various functions.

#### 4.1 Basic Functions

- **Speed Display:** Shows your current riding speed.
- **Distance Tracking:** Records the total distance covered during your ride.
- **Altitude Functions:** Displays current altitude, ascent, descent, and graphical altitude profile using the integrated air pressure sensor.
- **Compass Navigation:** Provides directional guidance to help you return to your starting point or a pre-selected location.

## 4.2 Data Transfer and Analysis

After your ride, you can transfer and analyze your workout data using the Sigma Data Center software for PC or the Sigma Link App for mobile devices. This allows you to plan, save, and share your activities.

## 5. MAINTENANCE

To ensure the longevity and optimal performance of your Sigma Pure GPS Bicycle Computer, follow these maintenance guidelines:

- **Cleaning:** Wipe the device with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Storage:** Store the computer in a cool, dry place when not in use.
- **Battery Care:** If the device is rechargeable, ensure it is charged regularly. Avoid fully depleting the battery for extended periods.

## 6. TROUBLESHOOTING

If you encounter issues with your Sigma Pure GPS Bicycle Computer, refer to the following common troubleshooting steps:

- **No GPS Signal:** Ensure you are in an open area. If indoors, move outdoors. Allow sufficient time for the device to acquire satellites.
- **Display Not Responding/Blank:** Check the battery level. If rechargeable, connect to a power source. If battery is low, the screen may go blank.
- **Inaccurate Readings:** Ensure the device is securely mounted and has a clear view of the sky for GPS. For altitude, ensure the air pressure sensor is not obstructed.
- **Data Transfer Issues:** Verify that the Sigma Data Center software or Sigma Link App is up to date and that the connection (e.g., NFC) is properly established.
