# Chicco Myamaki Complete Baby Carrier Instruction Manual

Model: 04079477370000

## 1. INTRODUCTION

---

The Chicco Myamaki Complete Baby Carrier is designed to provide comfort and support for both the baby and the parent. This carrier is classified as hip-safe by the International Hip Dysplasia Institute, ensuring proper ergonomic positioning for your baby's development. It adapts naturally to your baby's growth, offering multiple carrying positions from newborn to approximately 15 kg.

This manual provides essential information for the safe and correct use, assembly, and maintenance of your Myamaki baby carrier. Please read all instructions carefully before first use and keep this manual for future reference.

## 2. SAFETY INFORMATION

---

Your baby's safety is paramount. Always follow these guidelines when using the Chicco Myamaki Complete Baby Carrier:

- Always ensure all buckles, straps, and adjustments are securely fastened before placing your baby in the carrier.
- Regularly check the carrier for any signs of wear, tear, or damage. Discontinue use if any damage is found.
- Ensure your baby's airway is always clear and unobstructed. Their face should be visible to you at all times.
- Maintain the 'M' position for your baby's legs, where their knees are higher than their bottom, to support healthy hip development.
- Ensure your baby's back is supported in a natural 'C' curve, especially for newborns.
- Never use the carrier during activities that could be dangerous for your baby, such as cooking, driving, or strenuous exercise.
- Be mindful of your baby's temperature. Dress them appropriately for the weather and check for overheating.
- The carrier is suitable for babies from birth up to a maximum weight of 15 kg.

### 3. PRODUCT OVERVIEW

---

The Chicco Myamaki Complete Baby Carrier features several components designed for comfort and adaptability:

- **Padded Shoulder Straps:** Soft and adjustable for parent comfort.
- **Lumbar Support Belt:** Distributes baby's weight evenly across the parent's back, reducing strain.
- **Head Support/Hood:** Provides proper support for the baby's head and neck, and protection from sun or wind.
- **Soft Reducer:** An internal padded insert for newborns, which opens as the baby grows to ensure a snug and comfortable fit.
- **Adjustable Seat:** Allows for ergonomic 'M' position for baby's legs in all carrying modes.

*Note: No relevant product images were provided for the Chicco Myamaki Complete Baby Carrier. Please refer to the product packaging or official Chicco website for visual references.*

### 4. SETUP

---

Before first use, familiarize yourself with the carrier's components and adjustments.

1. **Adjusting the Waist Belt:** Fasten the waist belt around your natural waist or hips, ensuring it is snug and comfortable. The belt should sit securely to support the baby's weight.
2. **Adjusting Shoulder Straps:** Loosen the shoulder straps to allow enough room to place your baby. Once the baby is in, tighten the straps evenly until the baby is snug against your body, high enough to kiss their head.
3. **Newborn Reducer:** For newborns, ensure the soft reducer is correctly positioned inside the carrier to provide adequate head and neck support and maintain the ergonomic 'M' leg position.
4. **Head Support:** Adjust the head support or hood as needed to support your baby's head, especially when they are sleeping or if they lack full head control.

### 5. OPERATING (WEARING POSITIONS)

---

The Chicco Myamaki carrier offers multiple ergonomic carrying positions:

#### 5.1. Parent-Facing Position (Newborn to Older Baby)

This position is ideal for newborns and infants, promoting bonding and providing full support.

- Ensure the waist belt is securely fastened.
- Place your baby facing you, centered on your chest, with their legs in the 'M' position.
- Bring the carrier panel up over your baby's back and secure the shoulder straps.
- Tighten all straps until your baby is snug and high enough to kiss.

#### 5.2. Forward-Facing Position (Approx. 6+ Months, with Head Control)

For older babies with strong head and neck control who are curious about their surroundings.

- Ensure your baby has excellent head and neck control.
- Adjust the carrier to the forward-facing setting (refer to specific carrier instructions for this adjustment).
- Place your baby facing outwards, ensuring their legs are still in the 'M' position.

- Secure and tighten all straps, ensuring a comfortable and secure fit.

### 5.3. Hip Carry Position (Approx. 6+ Months, with Head Control)

A comfortable option for older babies who like to observe from a side view.

- Position the waist belt slightly to your side where you intend to carry your baby.
- Place your baby on your hip, facing you or outwards, with their legs in the 'M' position.
- Bring the carrier panel around your baby and secure the shoulder straps, adjusting for balance and comfort.

### 5.4. Back Carry Position (Approx. 6+ Months, with Head Control)

Suitable for older babies and toddlers, offering freedom of movement for the parent.

- This position requires practice and should only be attempted when you are confident and your baby has strong head and trunk control.
- Carefully transfer your baby to your back, ensuring they are centered and secure.
- Bring the carrier panel up and secure the shoulder straps, then the chest clip.
- Ensure your baby's legs are in the 'M' position and their airway is clear.

## 6. MAINTENANCE

---

Proper care will extend the life of your Chicco Myamaki Baby Carrier:

- **Cleaning:** The manufacturer's care instructions specify **Dry Clean Only**. Do not machine wash, tumble dry, bleach, or iron the carrier.
- **Storage:** Store the carrier in a clean, dry place away from direct sunlight when not in use.
- **Inspection:** Regularly inspect all seams, buckles, and straps for any signs of wear, fraying, or damage.

## 7. TROUBLESHOOTING

---

If you encounter issues with your Chicco Myamaki Baby Carrier, consider the following:

- **Baby is Uncomfortable/Crying:** Check if the baby's position is correct (M-position for legs, C-curve for spine). Ensure no fabric is digging into them and their airway is clear. They might be too hot or too cold.
- **Parent Discomfort:** Ensure the waist belt is snug and positioned correctly on your hips/waist. Adjust shoulder straps to distribute weight evenly. The carrier should feel supportive, not straining.
- **Carrier Feels Loose:** Re-check all buckles and straps. Ensure they are tightened sufficiently to keep the baby snug against your body without being overly restrictive.
- **Difficulty with Adjustments:** Refer back to the 'Setup' and 'Operating' sections. Practice adjustments without the baby first, or with a doll/stuffed animal.

If problems persist, contact customer support.

## 8. SPECIFICATIONS

---

<b>Model Number</b>	04079477370000
<b>Product Dimensions</b>	24.5 x 15 x 35 cm

<b>Item Weight</b>	730 grams
<b>Target Gender</b>	Unisex
<b>Age Range Description</b>	Newborn
<b>Minimum Recommended Weight</b>	Suitable from birth
<b>Maximum Recommended Weight</b>	15 kg
