## 4. MAINTENANCE

---

To ensure the longevity and clarity of your mDesign organizing bins, follow these simple maintenance guidelines:

- **Cleaning:** Hand wash only. Use mild soap and warm water. Do not place in a dishwasher, as high temperatures can cause warping or damage to the plastic.
- **Drying:** Dry immediately with a soft, non-abrasive cloth to prevent water spots and maintain clarity.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, ammonia-based products, or harsh solvents, as these can damage the plastic surface.
- **Storage:** When not in use, store bins in a cool, dry place away from direct sunlight to prevent discoloration or material degradation.

## 5. TROUBLESHOOTING

---

While mDesign organizing bins are designed for durability and ease of use, here are some common considerations and their solutions:

Issue	Possible Cause	Solution
Bin appears scratched or cloudy.	Use of abrasive cleaners or rough handling.	Clean only with mild soap and soft cloth. Handle with care to prevent scratches. Minor scratches may not be removable.
Bin is not sitting flat or appears slightly warped.	Exposure to high heat (e.g., dishwasher, direct sunlight for prolonged periods).	Avoid exposing bins to high temperatures. Hand wash only. If minor, it may not affect functionality for cabinet use.
Items are difficult to see inside the bin.	Excessive condensation (in freezer) or dirty surface.	Ensure bins are dry before placing in freezer. Clean regularly to maintain clarity.
