1. PRODUCT OVERVIEW

The BESTEK BTWA01 is a compact, automatic top-load washing machine designed for small living spaces. With a 3.8kg washing capacity, it offers efficient laundry solutions for single-person households or shared accommodations. Its features include multiple wash courses, water-saving options, and an antibacterial pulsator for enhanced cleanliness.

コンパクト設計

置き場所に困らないです。(幅470×奥行500×高さ790mm)

一人暮らしの方や寮や共用生活をしている人の部屋でも大活躍です！

Image 1.1: The BESTEK BTWA01 compact washing machine shown in different small installation environments, highlighting its space-saving design. Dimensions are approximately 470mm width, 500mm depth, and 790mm height.

2. SETUP AND INSTALLATION

Before operating the washing machine, ensure proper installation of all components. This includes attaching the drain hose, water supply hose, and securing the bottom cover.

2.1. Attaching the Bottom Cover

Locate the black bottom cover within the packaging. Carefully insert it into the designated slot at the base of the main unit.

底部カバーを本機底部に正しく差し込んでください。

※包装と発泡スチロール間にある黒い底部カバーを取り出してください。

Image 2.1: Illustration of how to correctly insert the bottom cover into the base of the washing machine. The cover is typically found between the packaging and the styrofoam.

2.2. Connecting Hoses

Connect the water supply hose to a suitable water tap and the washing machine's water inlet. Ensure the drain hose is securely attached to the machine's drain outlet and positioned to discharge water into a drain.

付属品

Image 2.2: The included accessories: a drain hose, a water supply hose, and the user manual. These are essential for proper setup and operation.

3. OPERATING INSTRUCTIONS

The BESTEK BTWA01 offers various wash courses and water level adjustments for different laundry needs.

3.1. Control Panel Overview

The control panel features push buttons for selecting wash courses, adjusting water levels, and starting/pausing cycles.

標準、お急ぎ、大物、つけおき、ソフト、脱水のコースが選択できます。

洗濯物の質量の目安

作業着上・下(混紡 800g)	シーツ(木綿 約500g)
パジャマ上・下(木綿 約500g)	バスタオル(木綿 約300g)
Yシャツ(混紡 約200g)	ブリーフ(木綿 約50g)
アンダーシャツ(木綿 約130g)	くつ下(混紡 約50g)

※最大容量は 3.8kgですので、洗濯物の量が多いときは、無理をせずに適切なコースで何回かに分けて洗ってください。

Image 3.1: The control panel showing selectable courses: Standard, Quick, Bulky, Soak, Soft, and Spin-dry. Indicators for remaining time and water level are also visible.

3.2. Water Level Adjustment

The machine features a 6-stage water level adjustment. You can manually select a water level from 1 (10L) to 6 (33L). For standard courses, the machine can automatically detect the laundry load and set an appropriate water level if not manually adjusted. The quick wash course does not allow manual water level adjustment.

節水に優れた

お急ぎコース使用水量（目安）：約34L

標準コース使用水量（目安）：約67L

6段階水位
切替可能

水位	水量
6	33L
5	29L
4	24L
3	19L
2	15L
1	10L

※水位を調節しない場合、洗濯物の量により、自動的に適切な水位ですすぎます。

※お急ぎコースは水位調節をすることができません。

Image 3.2: A visual representation of the 6 water level settings, ranging from 10L to 33L. The quick wash course uses approximately 34L, and the standard course uses approximately 67L.

3.3. Wash Courses and Capacity

Select from courses such as Standard, Quick, Bulky, Soak, Soft, and Spin-dry. The maximum washing capacity is 3.8kg. If your laundry exceeds this amount, divide it into multiple loads to ensure effective cleaning and prevent damage to the machine.

Approximate Laundry Weight Guidelines

Item	Weight (Approx.)	Item	Weight (Approx.)
Work clothes (mixed)	800g	Sheets (cotton)	500g
Pajamas (cotton)	500g	Bath towel (cotton)	300g
Y-shirt (mixed)	200g	Briefs (cotton)	50g
Undershirt (cotton)	130g	Socks (mixed)	50g

Note: The maximum capacity is 3.8kg. For larger loads, divide laundry into smaller batches and wash using an appropriate course.

3.4. Powerful Water Flow

Despite its compact size, the washing machine generates a powerful water flow through its pulsator, ensuring thorough cleaning. The power consumption during washing is 270W, and during spin-drying, it is 200W (approximately 63 Wh equivalent).

小型ならではの強力な水流

消費電力:洗濯時 270W 脱水時 200W (約63 Wh相当)

Image 3.3: A visual representation of the strong water current created by the pulsator, designed to effectively remove dirt from clothes.

4. MAINTENANCE

Regular maintenance ensures the longevity and hygiene of your washing machine.

4.1. Stainless Steel Tub and Antibacterial Pulsator

The machine is equipped with a stainless steel tub and an antibacterial pulsator. These features help to inhibit the

growth of black mold and maintain a clean washing environment. Periodically clean the tub and pulsator according to the instructions in the full manual to ensure optimal performance.

6. TROUBLESHOOTING

This section provides solutions to common issues you might encounter with your washing machine. For more detailed troubleshooting, please refer to the complete user manual.

- **Machine does not start:** Ensure the power cord is securely plugged in and the water supply is turned on. Check if the lid is properly closed.

- **Water does not fill:** Verify that the water supply hose is correctly connected and the water tap is open. Check for kinks in the water supply hose.
- **Water does not drain:** Inspect the drain hose for blockages or kinks. Ensure the drain hose is positioned correctly and not too high.
- **Excessive vibration or noise:** Make sure the washing machine is placed on a flat, stable surface. Distribute laundry evenly inside the tub to prevent imbalance.
- **Clothes not clean:** Do not overload the machine. Use the appropriate amount of detergent for the load size and water hardness. Select the correct wash course for the type of fabric and soil level.

7. WARRANTY AND SUPPORT

The BESTEK BTWA01 washing machine comes with a **one-year product warranty** from the date of purchase. Please retain your proof of purchase for warranty claims.

For technical support, service, or further inquiries, please contact BESTEK customer service. Refer to the contact information provided in your full user manual or visit the official BESTEK website.

This product is from a Japanese small and medium-sized enterprise (SME) brand.
