# Durgol Sustainable Milk System Cleaner 250 ml - Instruction Manual

Model: 138

[Instructions](#)   [Introduction](#)   [Maintenance](#)   [Safety Information](#)   [Troubleshooting](#)   [Setup](#)   [Operating](#)   [Specifications](#)   [Warranty & Support](#)

## 1. INTRODUCTION

The Durgol Sustainable Milk System Cleaner is designed to effectively remove milk residues such as milk proteins, milk sugar, and milk fat from your coffee machine's milk system. Regular cleaning ensures hygienic operation and maintains the quality of your coffee specialties.

This product is suitable for all coffee machines, capsule machines, pod machines, and espresso machines with an integrated milk system, as well as for external milk frothers.

### Key Features:

- Highly effective cleaning formula.
- Material-friendly composition.
- Biodegradable ingredients.
- Easy to use.
- Versatile for various milk systems and frothers.

## 2. SAFETY INFORMATION

**Warning:** Keep out of reach of children. Avoid contact with eyes and skin. In case of contact, rinse immediately with plenty of water. If swallowed, seek medical advice immediately and show this container or label.

Always follow the instructions provided by your coffee machine manufacturer for cleaning and maintenance. Do not mix with other cleaning agents.

## 3. SETUP AND PREPARATION

Before starting the cleaning process, ensure your coffee machine is switched off and cooled down. Remove any remaining milk from the milk container or frother system.

Figure 1: Durgol Sustainable Milk System Cleaner bottle. The bottle contains 250 ml of cleaning solution.

Prepare a suitable container for collecting the cleaning solution during the process, if required by your machine's cleaning cycle.

## 4. OPERATING INSTRUCTIONS

---

The cleaning procedure may vary slightly depending on your coffee machine model. Always refer to your machine's specific instruction manual for detailed cleaning steps. The following is a general guide:

1. **Dilution:** Pour 100 ml of Durgol Milk System Cleaner into a container. Add 400 ml of fresh tap water to dilute the solution. This creates 500 ml of cleaning solution.
2. **Application:**
  - **For integrated milk systems:** Follow your machine's instructions for initiating the milk system cleaning cycle. Pour the diluted Durgol solution into the milk container or designated cleaning reservoir.
  - **For external milk frothers/components:** Disassemble the milk frother components. Immerse the parts in the diluted Durgol solution for approximately 15-30 minutes. For stubborn residues, a longer soaking time may be beneficial.
3. **Rinsing:** After the cleaning cycle or soaking, thoroughly rinse all components with clean tap water. For integrated systems, run several rinsing cycles with fresh water as per your machine's instructions.
4. **Reassembly:** Reassemble the milk frother components or milk system.

It is recommended to clean your milk system regularly, ideally after every few uses or at least once a week, to prevent buildup and maintain hygiene.

## 5. MAINTENANCE

---

This product is a cleaning agent for your coffee machine's milk system. No specific maintenance is required for the cleaner itself. Store the bottle in a cool, dry place, away from direct sunlight.

Regular use of Durgol Sustainable Milk System Cleaner helps maintain the longevity and performance of your coffee machine's milk frothing components.

## 6. TROUBLESHOOTING

---

- **Problem: Milk system still clogged or frothing poorly after cleaning.**

- **Solution:** Ensure the cleaner was diluted correctly. Repeat the cleaning process, potentially increasing the soaking time for external components. Check for any physical blockages in nozzles or tubes that may require manual removal.
- **Problem: Residue visible after rinsing.**
  - **Solution:** Rinse components more thoroughly with fresh water. Run additional rinsing cycles through the machine's milk system.
- **Problem: Skin or eye irritation.**
  - **Solution:** Immediately rinse affected area with plenty of water. If irritation persists, seek medical attention.

## 7. SPECIFICATIONS

<b>Brand</b>	durgol
<b>Model Number</b>	138
<b>Product Dimensions</b>	3.99 x 5 x 18.01 cm
<b>Item Volume</b>	250 ml
<b>Item Weight</b>	997.9 g (approx. 2.2 lbs)
<b>Manufacturer</b>	DURGOL
<b>Contains Liquid Content</b>	Yes
<b>First Available Date</b>	August 21, 2017

## 8. WARRANTY AND SUPPORT

Information regarding specific product warranty for the Durgol Sustainable Milk System Cleaner is not provided in this manual. For warranty details or customer support, please refer to the manufacturer's official website or contact Durgol customer service directly.
