## 4. SETUP AND ASSEMBLY

---

Assembly is required. The following steps will guide you through the installation process. It is recommended to have a second person assist with assembly for easier handling of larger panels.

1. **Assemble the Rolling Stand:** Attach the legs to the crossbars, ensuring they are stable. Install the storage shelf onto the stand. Secure the four 360-degree swivel wheels to the bottom of the stand legs.
2. **Construct the Cage Base:** Connect the bottom cage panel with the side panels. Ensure all clips and fasteners are securely engaged.
3. **Install the Slide-out Tray:** Insert the metal grate and the plastic slide-out tray into the designated slots at the bottom of the cage.
4. **Attach Cage Panels:** Connect the front and back panels to the assembled sides and base.
5. **Secure the Top Panel:** Attach the top panel, ensuring the open-top mechanism is correctly aligned.
6. **Place Cage on Stand:** Carefully lift the assembled cage and place it onto the rolling stand. Ensure it sits securely.
7. **Install Perches and Feeders:** Insert the wooden perches through the cage bars at desired heights. Attach the feeding cups to the designated feeder doors.

## 5. OPERATING INSTRUCTIONS

### 5.1 Open Top Design

The roof of the bird cage is designed to open, providing an additional play area for your birds. To open, unlatch the top sections and position the included perch to keep them open. This allows birds to stand on the perch and interact with their surroundings outside the main cage area. To close, remove the perch and secure the latches.

## Open Top Design

To keep your bird stimulated, the roof of our hanging birdcage can be opened and locked up at will.

Image 5.1: The open-top feature allows birds to perch on the roof, offering an extended play space.

### 5.2 Feeding and Watering

The cage features four feeding doors on the side panels for convenient refilling of food and water. Simply open the small door, remove the feeding cup, fill it, and reinsert it. This design minimizes disturbance to your birds.

### 5.3 Mobility

The detachable rolling stand is equipped with four 360-degree swivel wheels, allowing for easy relocation of the cage. This is useful for cleaning around the cage or moving it to different areas of your home or outdoors (weather permitting). When moving, push the stand from the base rather than the cage frame for stability.

## 6. MAINTENANCE

---

### 6.1 Cleaning the Cage

The cage features a waterproof finished metal construction and a bottom slide-out tray for easy cleaning. Regularly remove the slide-out tray and grate to dispose of waste and clean thoroughly with pet-safe cleaning solutions. The fence at the bottom prevents birds from walking in their excrement, promoting a cleaner environment.

### 6.2 General Care

- Wipe down cage bars and surfaces regularly to remove dust and debris.
- Clean perches and feeding cups daily.

- Ensure the cage is dry after cleaning to prevent rust and bacterial growth.

## 7. TROUBLESHOOTING

### 7.1 Cage Wobbliness

If the cage feels wobbly on the stand, ensure all connections between the cage and the stand are secure. Some users have found that using zip ties or additional fasteners can improve stability if the cage does not sit perfectly flush on the stand. Verify that the stand legs are fully extended and locked into place.

### 7.2 Difficulty with Assembly

If you encounter difficulties during assembly, double-check the instruction diagrams. Ensure all parts are oriented correctly before attempting to fasten them. Do not force parts together; if they do not fit, re-examine the steps. A second person can often help align components.
