Parkside PVFT 30 A1

Parkside Wet & Dry Vacuum Cleaner Dust Bags Instruction Manual

Model: PVFT 30 A1

1. INTRODUCTION

This instruction manual provides essential information for the proper use and installation of Parkside original dust bags for your wet and dry vacuum cleaner. These bags are designed for dry vacuuming applications and offer effective filtration and durability.

Product Features:

- 10 x Original Parkside Dust Bags, 30L capacity.
- Suitable for universal use in dry areas, both indoors and outdoors.
- High filtering effect for fine dust.
- Constructed with 2-ply filter paper for high tear resistance.
- Designed for easy, tool-free bag changes.

Compatible Parkside Wet & Dry Vacuum Cleaner Models:

- PWD 25 (A1, A2)
- PWD 30 (A1)
- PNTS 23 E
- PNTS 30/4 DE, PNTS 35/5 DE, PNTS 30/6 DE, PNTS 30/7 E, PNTS 30/8 E, PNTS 30/9 E
- PNTS 1400 (A1, B1, C1, D1, E2, F2, H4)
- PNTS 1500 (A1, B2, B3, C4, D5)

2. SETUP AND INSTALLATION

Follow these steps to correctly install a new dust bag into your Parkside wet and dry vacuum cleaner:

1. **Preparation:** Ensure the vacuum cleaner is unplugged from the power source before beginning installation. Open the vacuum cleaner's canister according to your vacuum cleaner's specific instructions.

2. **Remove Old Bag (if applicable):** If an old bag is present, carefully remove it. Dispose of the used bag responsibly.
3. **Insert New Bag:** Unfold a new Parkside dust bag. Align the bag's cardboard collar with the vacuum cleaner's inlet port inside the canister. Push the collar firmly onto the port until it is securely seated. Ensure the bag is fully open and positioned correctly within the canister, without obstructing the lid closure mechanism.
4. **Close Canister:** Close the vacuum cleaner's canister lid, ensuring it latches securely.

3. OPERATING INSTRUCTIONS

These dust bags are specifically designed for **dry vacuuming**. Do not use these paper bags for wet vacuuming applications, as this can damage the bag and potentially the vacuum cleaner.

Once installed, operate your Parkside wet and dry vacuum cleaner as per its own instruction manual. The dust bag will collect dry debris and fine dust, providing effective filtration.

4. MAINTENANCE

To maintain optimal performance of your vacuum cleaner and ensure effective dust collection, regularly check the dust bag. Replace the bag when it is full or when you notice a decrease in suction power. The 2-ply paper construction provides high tear resistance, but overfilling can lead to reduced efficiency or bag rupture. Changing the bag is a simple, tool-free process as described in the Setup section.

Image 4.1: The image highlights the high tear resistance of the Parkside dust bags, ensuring durability during use.

5. TROUBLESHOOTING

If you experience issues while using the dust bags, consider the following:

- **Reduced Suction Power:** This is often an indication that the dust bag is full and needs to be replaced. A clogged bag restricts airflow, leading to decreased suction.
- **Dust Escaping:** Ensure the dust bag is correctly installed and securely seated on the vacuum cleaner's inlet port. Check for any tears or damage to the bag.
- **Bag Rupture:** Avoid overfilling the bag. While designed for high tear resistance, excessive weight or sharp objects can cause damage. Replace immediately if ruptured.

6. SPECIFICATIONS

Feature	Detail
Brand	Parkside
Model (Dust Bags)	PVFT 30 A1
Capacity	30 litres
Material	2-ply Paper
Included Components	10 Vacuum Bags
Approximate Dimensions (per bag)	28 x 25 x 8 cm (folded)
Approximate Weight (10 bags)	500 Grams
Compatible Devices	Parkside PWD 25, PWD 30, PNTS 1400, PNTS 1500, PNTS 30/4 DE, PNTS 35/5 DE, PNTS 30/6 DE, PNTS 30/7 E, PNTS 30/8 E, PNTS 30/9 E, PNTS 23 E, PNTS TS 1400 H4, PNTS TS 1400 A1, PNTS 1400 B1, PNTS 1400 C1, PNTS 1400 D1, PNTS 1500 B3, PNTS 1500 B2, PNTS 1500 A1, PNTS 1400 E2
