Maintenance

- Wipe the metal and bamboo surfaces with a dry, soft cloth to remove dust and debris.
- Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish.
- Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.

Troubleshooting

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose fasteners.	Check and tighten all bolts and screws using the provided Allen wrench.
Squeaking noises.	Loose connections or friction between parts.	Ensure all connections are tight. Apply a small amount of lubricant (e.g., silicone spray) to metal-on-metal contact points if necessary.
Mattress slides on the frame.	Non-slip tape not effective or worn.	Ensure the non-slip tape on the slats is clean. If worn, consider applying additional non-slip strips.
