## Setup and Assembly

The ZINUS Alexis Deluxe Wood Platform Bed Frame is designed for easy assembly, typically taking less than an hour with the help of a friend. Follow the included step-by-step instructions provided in your package.

### General Assembly Steps:

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface (like a carpet) to prevent scratches. Identify each component using the parts list in your manual.
2. **Attach Headboard and Footboard:** Connect the side rails to the headboard and footboard using the provided hardware. Ensure all connections are snug but do not overtighten until all major components are aligned.
3. **Install Center Support:** Assemble and attach the center support beam and its legs to the frame. This provides crucial stability.
4. **Place Slats:** Lay the wooden slats across the frame. The slats feature Velcro strips to secure them to the frame and anti-slip tape to help keep your mattress in place. Ensure slats are evenly spaced.
5. **Final Tightening:** Once all components are in place and aligned, fully tighten all bolts and fasteners.

- Ensure your mattress is centered on the frame for even support.
- The anti-slip tape on the slats helps prevent mattress movement.
- Regularly check the tightness of all bolts to maintain stability.

## Maintenance

To ensure the longevity and appearance of your bed frame, follow these maintenance guidelines:

- **Cleaning:** Wipe the wood surfaces with a dry cloth. Avoid using harsh chemicals or abrasive cleaners that could damage

the finish.

- **Inspections:** Periodically inspect all connections and hardware to ensure they remain tight. Retighten any loose bolts as necessary.
- **Avoid Excessive Moisture:** Protect the wood from prolonged exposure to moisture or extreme temperature changes.

## Troubleshooting

If you encounter any issues with your bed frame, refer to the following common problems and solutions:

| Problem | Possible Cause | Solution |
|---|---|---|
| Squeaking noises | Loose bolts or connections. | Check and tighten all assembly bolts. Ensure slats are properly seated. |
| Mattress sliding | Anti-slip tape not applied or worn. | Ensure anti-slip tape on slats is clean and functional. If worn, consider replacing with new anti-slip material. |
| Frame feels unstable | Incomplete assembly or loose components. | Re-verify all assembly steps. Ensure all bolts are fully tightened and the center support is correctly installed. |
