- The showerhead features **QuickClean technology**, which allows for easy removal of limescale deposits. Simply rub the

silicone nozzles on the spray face to dislodge any buildup.

- For general cleaning of the chrome-plated surfaces, use a soft cloth and a mild, non-abrasive cleaning agent specifically designed for bathroom fixtures.
- Avoid using abrasive cleaners, scouring pads, or cleaners containing acids, alcohol, or chlorine, as these can damage the finish.
- Rinse thoroughly with clean water after cleaning and dry with a soft cloth to prevent water spots.

---

If you encounter issues with your showerhead, refer to the following common troubleshooting tips. For persistent problems, contact a qualified plumber or hansgrohe customer support.
