Moen 84300SRN

Moen Hamden Spot Resist Brushed Nickel Two-Handle 4-inch Centerset Bathroom Faucet

Model: 84300SRN

INTRODUCTION

This manual provides detailed instructions for the installation, operation, maintenance, and troubleshooting of your Moen Hamden Spot Resist Brushed Nickel Two-Handle 4-inch Centerset Bathroom Faucet. Please read this manual thoroughly before beginning installation or operation to ensure proper function and longevity of your product.

The Moen Hamden faucet is designed for durability and ease of use, featuring a Spot Resist Brushed Nickel finish that helps minimize fingerprints and water spots. It is also WaterSense certified, promoting water conservation without compromising performance.

IMPORTANT SAFETY INFORMATION

- Always turn off the main water supply before installing or servicing the faucet.
- Wear appropriate personal protective equipment, such as safety glasses and gloves, during installation.
- If you are unsure about any part of the installation process, consult a qualified plumber.
- Ensure all connections are secure to prevent leaks.
- Do not use abrasive cleaners or harsh chemicals on the faucet finish, as this may damage the surface.

SETUP AND INSTALLATION

Tools Required:

- Adjustable Wrench
- Phillips Head Screwdriver
- Plumber's Putty or Silicone Sealant
- Flashlight (optional)
- Bucket and Towel

Pre-Installation Steps:

1. Turn off the main water supply to the bathroom.
2. Clear the area under the sink for easy access.
3. Remove any existing faucet and clean the sink surface thoroughly.

Installation Procedure:

1. **Install Faucet Body:** Place the faucet body onto the sink holes. Ensure the gasket is properly seated between the faucet base and the sink surface to prevent leaks.
2. **Secure Faucet:** From underneath the sink, thread the mounting nuts onto the faucet shanks and tighten them securely with an adjustable wrench. Do not overtighten.
3. **Connect Water Supply Lines:** Connect the hot and cold water supply lines to the corresponding inlets on the faucet shanks. Use an adjustable wrench to tighten connections, ensuring they are snug but not overtightened.
4. **Install Drain Assembly (if applicable):** Follow the separate instructions provided with your drain assembly. Apply plumber's putty or silicone sealant around the drain flange before inserting it into the sink drain hole.
5. **Connect Drain Linkage:** Connect the pop-up rod or drain linkage to the faucet as per the drain assembly instructions.
6. **Test for Leaks:** Slowly turn on the main water supply. Check all connections for leaks. If leaks are present, tighten the connections slightly until they stop.
7. **Flush Faucet:** Turn on both hot and cold water for a few minutes to flush out any debris from the supply lines.

OPERATING INSTRUCTIONS

The Moen Hamden faucet features two handles for independent control of hot and cold water flow and temperature.

- **Cold Water:** Turn the right handle counter-clockwise to open the cold water flow. Turn clockwise to close.
- **Hot Water:** Turn the left handle counter-clockwise to open the hot water flow. Turn clockwise to close.
- **Temperature Control:** Adjust the desired water temperature by mixing hot and cold water using both handles.
- **Flow Control:** The flow rate is controlled by how far you turn the handles. Fully open provides the maximum flow rate of 1.2 GPM.

CARE AND MAINTENANCE

Proper care and maintenance will ensure the longevity and appearance of your Moen Hamden faucet.

- **Cleaning the Finish:** Clean the faucet regularly with a soft, damp cloth. For stubborn spots, use a mild soap and water solution. Rinse thoroughly and dry with a soft cloth.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners, scouring pads, ammonia, bleach, or other harsh chemicals, as these can damage the Spot Resist Brushed Nickel finish.
- **Aerator Maintenance:** If water flow becomes restricted, the aerator may be clogged. Unscrew the aerator from the spout, clean any debris, and rinse it under running water. Reattach the aerator securely.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Low Water Flow	Clogged aerator; partially closed shut-off valves; debris in supply lines.	Clean aerator; ensure shut-off valves are fully open; flush supply lines.
Leaking at Base of Faucet	Loose mounting nuts; improperly seated gasket.	Tighten mounting nuts; re-seat gasket or apply silicone sealant.
Leaking from Handles	Worn cartridge.	Contact Moen customer support for replacement cartridge.
Water Temperature Issues	Incorrect hot/cold supply line connection; water heater issues.	Verify supply line connections; check water heater settings.
