3. SETUP (FIRST USE)

Upon receiving your Starter Velour Track Jacket, carefully remove all packaging and tags. It is recommended to wash the jacket before its first wear to ensure optimal comfort and cleanliness. Refer to the 'Maintenance' section for detailed washing instructions.

4. OPERATING (WEARING AND FIT)

The Starter Women's Velour Track Jacket is designed for versatile wear. It features a full-zip front for easy on and off, and a hood for added warmth and style. The fit is intended to be close to the body, allowing for ease of movement. If a looser fit is desired, it is advisable to select one size larger than your usual size.

The ribbed cuffs and hem provide a snug fit, preventing cold air from entering.

5. MAINTENANCE (CARE INSTRUCTIONS)

Proper care will extend the life and maintain the quality of your velour track jacket. Always refer to the care label inside the garment for specific instructions. The fabric composition is 80% Cotton and 20% Polyester.

- **Machine Wash:** Use cold water on a gentle cycle. Wash with like colors to prevent color transfer.
- **Drying:** Tumble dry low or hang dry to preserve fabric integrity and prevent shrinkage. Avoid high heat.
- **Ironing:** If necessary, iron on a low setting, inside out, to protect the velour finish. Do not iron directly on any embellishments or logos.
- **Bleaching:** Do not bleach, as this can damage the fabric and color.

6. TROUBLESHOOTING

- **Issue: Jacket feels too tight.**

Solution: The jacket is designed for a close fit. If a more relaxed fit is preferred, consider exchanging for one size larger. Refer to the sizing guide if available.

- **Issue: Fabric appears dull or matted after washing.**

Solution: Ensure the jacket is washed on a gentle cycle with cold water and tumble dried on low or air-dried. Avoid high heat, which can damage velour fibers. Gently brush the velour pile with a soft brush once dry to help restore its luster.

- **Issue: Zipper is sticking.**

Solution: Ensure the zipper teeth are clean and free from debris. Apply a small amount of zipper lubricant or rub a graphite pencil along the teeth to improve glide.
