1. INTRODUCTION

Thank you for choosing the Homdox 6-Tier Storage Shelf Wire Shelving Unit. This manual provides detailed instructions for the safe assembly, operation, and maintenance of your new shelving unit. Please read this manual thoroughly before use and retain it for future reference.

This versatile shelving unit is designed to provide robust and adjustable storage solutions for various environments, including kitchens, bathrooms, bedrooms, closets, and offices. Its durable steel construction with a high-polish chrome finish ensures longevity and resistance to rust and corrosion.

2. SAFETY INFORMATION

WARNING: Failure to follow these safety instructions may result in injury or damage to the product.

- Always ensure the shelving unit is level and stable before use. Use the adjustable leveling feet to achieve stability on uneven surfaces.
- Do not overload shelves. The maximum weight capacity for the entire unit is 530 lbs, with each shelf

supporting up to 88 lbs. Distribute weight evenly.

- Place heavier items on lower shelves to enhance stability and prevent tipping.
- Keep the unit away from heat sources and avoid placing flammable materials on or near it.
- Always follow the assembly instructions carefully. Do not modify the product in any way not described in this manual.
- Ensure all components are securely fastened during assembly and periodically check for tightness.
- If using the unit in areas with children, consider anchoring it to a wall to prevent accidental tipping. Mounting hardware is included for this purpose.
- Avoid climbing or allowing children to climb on the shelving unit.
- The security fence design helps prevent items from sliding off. Ensure items are placed within the confines of the shelf.

3. PACKAGE CONTENTS

Before beginning assembly, please verify that all parts are present and undamaged. If any parts are missing or damaged, please contact customer support.

Component	Quantity	Description
Wire Shelves	6	Main storage surfaces.
Poles (Upper/Lower)	8 (4 upper, 4 lower)	Vertical support posts.
Adjustable Leveling Feet	4	For stabilizing the unit on uneven surfaces.
Side Hanger Hooks	Included	For hanging small items like utensils or towels.
Plastic Clips	Approx. 24 (plus spares)	Used to secure shelves at desired heights.
Assembly Manual	1	This document.

4. SETUP & ASSEMBLY

No tools are required for assembly. Follow these steps to set up your Homdox 6-Tier Storage Shelf.

Step 1: Prepare the Base

Screw the adjustable leveling feet into the bottom of the four lower poles. Ensure they are securely tightened. If using optional wheels (not included in this model but available for other variants), they would be screwed in here instead.

Video: Official Homdox guide on how to install wire shelving units, demonstrating the initial steps of assembly including attaching leveling feet or wheels.

Step 2: Attach Plastic Clips

Determine the desired height for your first (bottom) shelf. Each pole has periodic grooves to guide placement. Snap two plastic clips around each pole at the same height, ensuring the "TOP" arrow on the clips points upwards. These clips will support the shelf.

Image: Diagram showing how to mount and attach plastic clips to the poles, and then press the shelf onto them.

Step 3: Install the First Shelf

Carefully slide the first wire shelf down over the poles until it rests securely on the plastic clips. Press down firmly on each corner of the shelf to ensure it is fully seated and stable.

Step 4: Extend the Poles (if necessary)

If you are building a taller unit, connect the upper poles to the lower poles by screwing them together. Ensure a tight connection for stability.

Step 5: Install Remaining Shelves

Repeat Steps 2 and 3 for the remaining five shelves, placing plastic clips at your desired heights for each shelf. Ensure all shelves are level and securely attached.

Wire Shelving Unit

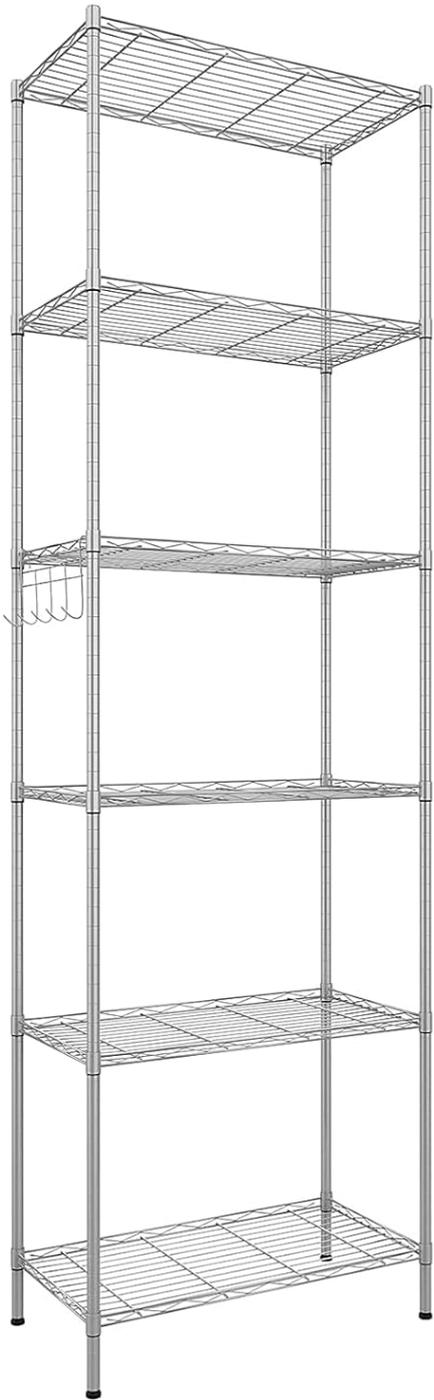

Ideal for small spaces

Step 6: Attach Side Hanger Hooks

The unit includes side hanger hooks for additional storage. Simply attach these hooks to the side of any wire shelf as needed.

Side Hanging Hook

Protect items from falling off

Adjustable Leveling Feet

Step 7: Final Adjustments

Once all shelves are in place, adjust the leveling feet to ensure the unit is stable and does not wobble. Press down on each shelf to confirm it is fully secured.

5. OPERATING INSTRUCTIONS

Adjusting Shelf Height

The shelves are fully adjustable. To change a shelf's height, remove any items from the shelf. Carefully lift the shelf off its clips. Remove the plastic clips, reposition them at the desired height on the poles (ensuring they are level), and then re-seat the shelf firmly onto the new clips.

Weight Distribution

To maintain stability and prevent damage, distribute weight evenly across each shelf. Place heavier items on lower shelves. The unit has a total weight capacity of 530 lbs, with each individual shelf supporting up to 88 lbs.

Using Side Hooks

Utilize the included side hanger hooks to store smaller items, such as kitchen utensils, towels, or small bags, keeping your main shelf space clear and organized.

6. MAINTENANCE

Cleaning

To clean the shelving unit, simply wipe it with a dry cloth. For more stubborn dirt, a damp cloth with mild soap can be used, followed by thorough drying to prevent water spots or potential rust, although the high-polish chrome finish offers excellent anti-rust properties.

Regular Inspection

Periodically check all connections, especially the plastic clips and leveling feet, to ensure they remain tight and secure. Re-tighten or adjust as necessary to maintain the unit's stability.

7. TROUBLESHOOTING

- **Unit is wobbly/unstable:** Ensure all leveling feet are properly adjusted and making firm contact with the floor. Check that all plastic clips are securely snapped into the pole grooves and that shelves are pressed down firmly onto the clips.
- **Shelf slides down:** This usually indicates that the plastic clips were not installed correctly (e.g., "TOP" arrow not facing up) or were not fully snapped into the grooves. Remove the shelf, re-install the clips correctly, and firmly press the shelf into place.
- **Items falling off shelves:** Ensure items are placed within the confines of the shelf and not overhanging. The security fence design helps prevent this. Consider using shelf liners for very small or unstable items.
- **Difficulty assembling:** Review the assembly video and instructions carefully. Ensure you are using the correct parts for each step. Sometimes, a firm tap with a rubber mallet (not included) can help seat shelves onto clips, but hand pressure is usually sufficient.

8. SPECIFICATIONS

Feature	Detail
Brand	Homdox
Model Name	Wire Shelving Rack
Item Model Number	AM5570_M_SIL
Number of Shelves	6
Product Dimensions	11.42"D x 21.26"W x 62.99"H
Material	Carbon Steel
Finish Type	Powder Coated (High-polish chrome appearance)
Weight Limit (Total)	530 Pounds
Weight Limit (Per Shelf)	88 Pounds
Special Features	Adjustable, Durable, Rust Proof, Space Saving, Adjustable Leveling Feet, Stainless Side Hooks
Assembly Required	Yes (No tools required)
Recommended Uses	Bathroom, Bedroom, Closet, Kitchen, Office, Living Room, Balcony, Home
Product Care Instructions	Wipe with Dry Cloth

9. WARRANTY & SUPPORT

For warranty information or customer support, please refer to the product packaging or contact Homdox directly through their official website or the retailer where the product was purchased. Keep your purchase receipt as proof of purchase.

Homdox is committed to providing high-quality products and customer satisfaction. If you encounter any issues or have questions regarding your shelving unit, please do not hesitate to reach out to our support team.
