

Thule Edge Foot Railing LH 958

THULE Edge Foot Railing LH 958 User Manual

Model: 1500052316

Introduction	Safety Information	Parts List	Setup & Installation	Operating	Maintenance
	Troubleshooting	Specifications	Warranty & Support		

1. INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of your THULE Edge Foot Railing LH 958 roof bar system. Please read this manual thoroughly before installation and operation to ensure proper function and safety. The THULE Edge Foot Railing LH 958 is designed to provide a secure and aerodynamic base for various Thule roof rack accessories.

2. SAFETY INFORMATION

Always prioritize safety when handling and installing your THULE roof bar system. Failure to follow these instructions can result in serious injury or damage to your vehicle and property.

- **Read All Instructions:** Before installation, carefully read and understand all instructions provided in this manual and any accompanying product-specific guides.
- **Weight Capacity:** Do not exceed the maximum load capacity specified for your vehicle's roof or the THULE roof bar system, whichever is lower. Refer to your vehicle's owner's manual for roof load limits.
- **Proper Installation:** Ensure all components are correctly assembled and securely fastened according to the instructions. Double-check all bolts and clamps before each use.
- **Regular Checks:** Periodically check the tightness of all mounting hardware, especially after the first few miles of driving and after driving on rough roads.
- **Driving Habits:** Adjust your driving speed to suit road conditions and the load being carried. Avoid sudden braking, acceleration, or sharp turns when carrying a load on the roof.
- **Clearance:** Be aware of the increased height of your vehicle when the roof bars and accessories are installed. Pay attention to low clearances such as garages, car washes, and low-hanging branches.
- **Load Distribution:** Distribute the load evenly on the roof bars. Secure all cargo properly to prevent shifting during transit.
- **Maintenance:** Keep the roof bars clean and free from dirt and debris. Inspect for any signs of wear or damage regularly.

3. PARTS LIST

The THULE Edge Foot Railing LH 958 system includes the following components. Please verify that all parts are present before beginning installation.

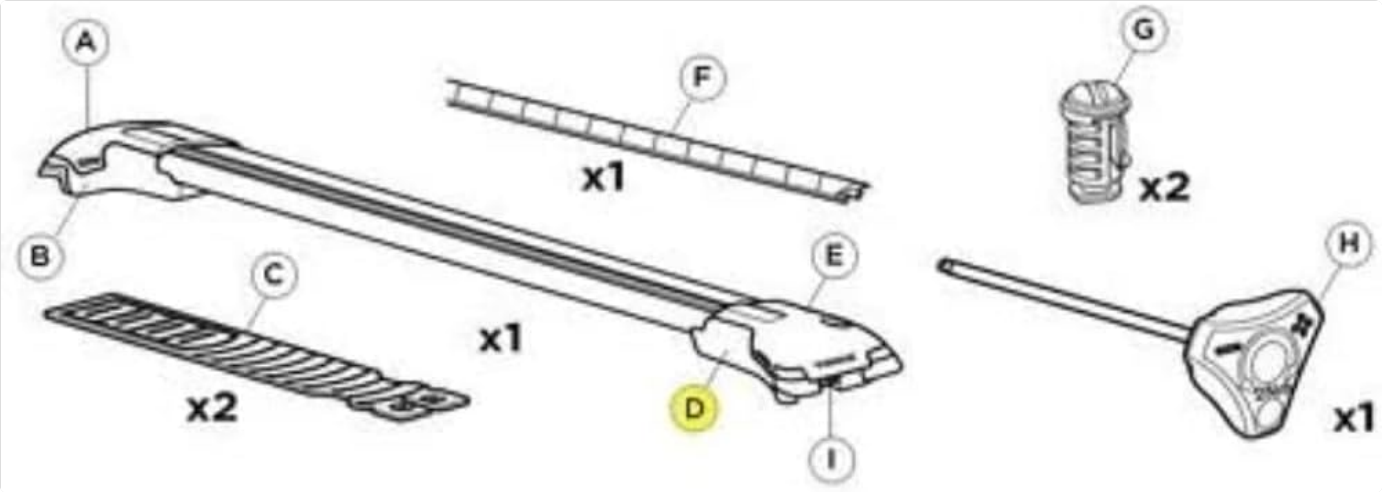

Image Description: This diagram illustrates the various components included with the THULE Edge Foot Railing LH 958. Key parts are labeled with letters A through I. These include the main roof bar assembly (A, B, E, I), rubber strips (C), a measuring strip (F), end caps (G), and a torque wrench (H). The main bar is shown with quantity 'x1', rubber strips 'x2', measuring strip 'x1', end caps 'x2', and torque wrench 'x1'. A circular highlight (D) indicates a specific point on the foot.

Component List

Label	Description	Quantity
A, B, E, I	Edge Foot Railing Assembly (Main Bar with Feet)	1
C	Rubber Strips / Load Strips	2
F	Measuring Strip	1
G	End Caps	2
H	Torque Wrench	1

4. SETUP AND INSTALLATION

Follow these steps carefully to install your THULE Edge Foot Railing LH 958 system. It is recommended to have a second person assist with the installation to ensure proper alignment and safety.

- 1. Prepare Your Vehicle:** Ensure your vehicle's roof rails are clean and free from debris.
- 2. Assemble the Feet:** If not pre-assembled, attach the foot assemblies to the main roof bar according to the specific instructions for your vehicle's roof rail type. Ensure the feet are oriented correctly for left-hand (LH) side installation.
- 3. Measure and Position:** Use the provided measuring strip (F) to determine the correct spacing between the front and rear roof bars, as specified in your vehicle's owner's manual or the THULE fit guide. Place the assembled roof bar onto your vehicle's roof rails.
- 4. Secure the Feet:** Carefully position the feet (B, E) onto the vehicle's roof rails. Ensure the clamps engage securely with the rails.
- 5. Tighten with Torque Wrench:** Use the supplied torque wrench (H) to tighten the fastening bolts on each foot. Tighten until the torque wrench clicks, indicating the correct torque has been reached. *Do not overtighten.*
- 6. Insert Rubber Strips:** Cut the rubber strips (C) to the appropriate length and insert them into the T-track channel on the top of the roof bar. This helps reduce wind noise and protects the bar.
- 7. Install End Caps:** Securely attach the end caps (G) to the ends of the roof bar feet. These provide a finished look and protect the internal mechanisms.
- 8. Final Check:** Before driving, gently pull up and push down on each end of the roof bar to ensure it is firmly attached and

does not move. Verify that all bolts are tightened to the correct torque.

5. OPERATING INSTRUCTIONS

Once installed, your THULE Edge Foot Railing LH 958 provides a stable platform for carrying various Thule accessories such as bike carriers, ski carriers, or cargo boxes. Always adhere to the following guidelines when using your roof bar system:

- **Load Securely:** Ensure all cargo and accessories are securely fastened to the roof bars using appropriate straps, clamps, or locking mechanisms.
- **Check Clearance:** Always be mindful of the increased height of your vehicle, especially when entering garages, parking structures, or driving under low overhangs.
- **Driving Speed:** Reduce your speed, especially in strong winds, on rough roads, or when carrying heavy or bulky loads.
- **Weight Distribution:** Distribute the weight of your load as evenly as possible across the roof bars.
- **Noise:** Some wind noise may be present, especially at higher speeds. Ensure rubber strips are properly installed to minimize this.

6. MAINTENANCE

Regular maintenance will prolong the life of your THULE Edge Foot Railing LH 958 and ensure its continued safe operation.

- **Clean Regularly:** Clean the roof bars with mild soap and water. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Inspect for Damage:** Periodically inspect all components for signs of wear, corrosion, cracks, or other damage. Pay close attention to the feet, clamps, and bar integrity.
- **Check Tightness:** Regularly check the tightness of all mounting bolts and fasteners, especially after long trips or exposure to vibrations. Re-tighten with the torque wrench if necessary.
- **Lubrication:** If any moving parts or locks become stiff, apply a small amount of silicone-based lubricant.
- **Storage:** If removing the roof bars for extended periods, store them in a clean, dry place away from direct sunlight and extreme temperatures.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your THULE Edge Foot Railing LH 958.

Common Issues and Solutions

Problem	Possible Cause	Solution
Excessive Wind Noise	Missing or improperly installed rubber strips; incorrect bar positioning.	Ensure rubber strips are fully inserted into the T-track. Verify correct bar spacing and position.
Roof Bar Feels Loose	Mounting bolts are not sufficiently tightened.	Re-tighten all fastening bolts using the supplied torque wrench until it clicks. Do not overtighten.
Difficulty Attaching Accessories	T-track channel obstructed or damaged.	Ensure the T-track is clear of debris. Check for any deformation or damage to the channel.
Scratches on Vehicle Roof Rails	Debris under feet; improper installation.	Clean roof rails thoroughly before installation. Ensure feet are properly seated and not dragging.

If you encounter an issue not listed here, or if the suggested solutions do not resolve the problem, please contact THULE customer support.

8. SPECIFICATIONS

Key technical specifications for the THULE Edge Foot Railing LH 958.

Product Specifications

Attribute	Detail
Brand	Thule
Model	Edge Foot Railing LH 958
Item Model Number	1500052316
Manufacturer Part Number	1500052316
Item Weight	3.52 ounces (approx. 0.1 kg)
ASIN	B075SHHMLH
Date First Available	June 27, 2023
Included Components	Roof Bars, Manual

Note: Maximum load capacity is dependent on your vehicle's specifications and the specific Thule fit kit used. Always refer to your vehicle's owner's manual for roof load limits.

9. WARRANTY AND SUPPORT

THULE products are known for their quality and durability. For specific warranty information regarding your THULE Edge Foot Railing LH 958, please refer to the warranty card included with your product or visit the official THULE website.

Customer Support

If you have any questions, require technical assistance, or need to report a problem with your THULE product, please contact THULE customer support through their official channels. You can typically find contact information on the THULE website or by searching for 'Thule customer support' online.

Online Resources: For the most up-to-date information, FAQs, and additional product guides, visit the official [Thule website](#).
