

Casio XJ-F10X

Casio XJ-F10X LED XGA Projector Instruction Manual

Model: XJ-F10X

1. INTRODUCTION

This manual provides essential information for the safe and efficient operation of your Casio XJ-F10X LED XGA Projector. Please read this manual thoroughly before using the projector and retain it for future reference. Understanding the instructions will ensure optimal performance and extend the lifespan of your device.

2. IMPORTANT SAFETY INSTRUCTIONS

Observe the following safety precautions to prevent damage to the projector and ensure user safety:

- Do not block ventilation openings. Ensure adequate space around the projector for proper airflow.
- Do not expose the projector to rain or moisture to reduce the risk of fire or electric shock.
- Use only the power cord supplied with the projector or an approved replacement.
- Avoid looking directly into the projector lens when the light source is active, as it can cause eye damage.
- Do not attempt to service this product yourself. Refer all servicing to qualified service personnel.
- Place the projector on a stable, level surface to prevent it from falling.

3. PACKAGE CONTENTS

Verify that all items are present in the package:

- Casio XJ-F10X Projector
- Power Cord
- Remote Control (with batteries)
- VGA Cable
- User Manual (this document)

4. PRODUCT OVERVIEW

Familiarize yourself with the various parts and controls of your Casio XJ-F10X projector.

4.1 Front Panel

The front panel features the projection lens, which emits the image. Ventilation grilles are located on the side to ensure proper cooling during operation. A small infrared receiver for the remote control may also be present.

4.2 Rear Panel and Connections

The rear panel houses all the necessary input and output ports for connecting external devices. These include:

- **HDMI Type A x 2:** For digital video and audio input (HDCP support).
- **VGA (D-Sub 15-pin):** For analog computer input.
- **S-Video:** For analog video input.
- **Composite Video (RCA):** For standard definition video input.
- **Audio In (RCA L/R, 3.5mm mini jack):** For analog audio input.
- **Audio Out (3.5mm mini jack):** For connecting external audio systems.
- **RS-232:** For projector control via a computer or control system.
- **USB (Type A, Type B):** For service or firmware updates.
- **Power Inlet:** For connecting the AC power cord.

4.3 Top Panel Controls

The top panel provides direct access to essential projector functions:

- **Power Button:** Turns the projector on or off.
- **Input Button:** Selects the input source (HDMI, VGA, etc.).
- **Menu Button:** Opens the on-screen display (OSD) menu.
- **Navigation Buttons (Up/Down/Left/Right):** Used to navigate through menu options.
- **Enter Button:** Confirms selections in the menu.
- **ESC Button:** Exits the current menu or returns to the previous screen.
- **Zoom Lever:** Adjusts the image size.
- **Focus Ring:** Sharpens the projected image.

5. SETUP GUIDE

5.1 Projector Placement

Proper placement is crucial for optimal image quality.

- **Distance:** Position the projector at an appropriate distance from the screen to achieve the desired image size. Refer to the specifications for throw ratio details.
- **Angle:** Ensure the projector is perpendicular to the screen for a rectangular image. Use the keystone correction function if the image appears trapezoidal.
- **Ventilation:** Maintain clear space around the projector's ventilation openings to prevent overheating.

5.2 Connecting Devices

Follow these steps to connect your source devices:

1. Ensure the projector and all source devices are powered off before making connections.
2. Connect the appropriate video cable (HDMI, VGA, S-Video, or Composite) from your source device to the corresponding input port on the projector's rear panel.

3. If using an analog video input (VGA, S-Video, Composite), connect an audio cable from your source device's audio output to the projector's Audio In port. HDMI carries both video and audio.
4. Connect the power cord to the projector's power inlet and then to a grounded electrical outlet.

6. OPERATING INSTRUCTIONS

6.1 Powering On and Off

- **Power On:** Press the Power button on the projector's top panel or the remote control. The projector will reach full brightness in approximately 5 seconds due to its Direct On/Off function.
- **Power Off:** Press the Power button again. The projector will shut down immediately without a cool-down period.

6.2 Basic Projection

1. Turn on the projector and your source device.
2. Press the **Input** button on the projector or remote control repeatedly to select the correct input source (e.g., HDMI 1, VGA).
3. Adjust the **Zoom** lever to achieve the desired image size on the screen.
4. Adjust the **Focus** ring until the image appears sharp and clear.
5. If the image is distorted (trapezoidal), use the keystone correction feature in the OSD menu to correct it.

6.3 Menu System

The On-Screen Display (OSD) menu allows you to adjust various projector settings.

- Press the **Menu** button to open the OSD.
- Use the **Navigation** buttons (Up/Down/Left/Right) to move through menu options.
- Press the **Enter** button to select an option or confirm a setting.
- Press the **ESC** button to exit a submenu or the entire OSD.

7. MAINTENANCE

7.1 Cleaning the Projector

- **Lens:** Gently wipe the lens with a soft, lint-free cloth specifically designed for optical surfaces. Do not use abrasive cleaners.
- **Casing:** Wipe the projector casing with a soft, dry cloth. For stubborn dirt, slightly dampen the cloth with water and a mild detergent, then wipe dry.
- **Ventilation:** Periodically check and clean the ventilation grilles to ensure they are free from dust and debris. Use a soft brush or compressed air.

7.2 Light Source Longevity

The Casio XJ-F10X utilizes a mercury-free LED hybrid light source, offering exceptional durability and a long operational life of up to 20,000 hours without requiring lamp replacement. This significantly reduces maintenance needs and costs.

8. TROUBLESHOOTING

If you encounter issues with your projector, refer to the following common problems and solutions:

- **No Image:**
 - Ensure the projector is powered on and the power cord is securely connected.
 - Verify that the correct input source is selected.
 - Check the connection cable between the projector and the source device.
 - Ensure the source device is powered on and outputting a signal.
- **Dim Image:**
 - Check the projector's brightness settings in the OSD menu.
 - Ensure the room is sufficiently dark for projection.
- **No Sound:**
 - If using an analog video input, ensure the audio cable is connected.
 - Check the volume settings on both the projector and the source device.
 - Ensure the correct audio input is selected if applicable.
- **Image is Blurry:**
 - Adjust the focus ring on the projector lens.
 - Ensure the projector is placed at an appropriate distance from the screen.
- **Image is Trapezoidal:**
 - Use the keystone correction function in the OSD menu to adjust the image shape.
 - Try to position the projector as perpendicular to the screen as possible.

9. TECHNICAL SPECIFICATIONS

Feature	Specification
Model Number	XJ-F10X
Native Resolution	XGA (1024 x 768)
Brightness	3,300 Lumens
Contrast Ratio	20,000:1
Display Chip	0.65" DLP Chip
Light Source	Hybrid LED
Light Source Life	Up to 20,000 hours
Lens Type	1.5x Manual Zoom & Focus
Aspect Ratio	4:3 Native
Inputs	HDMI Type A x 2, S-Video, VGA, RS-232, Composite Video, RCA Audio In

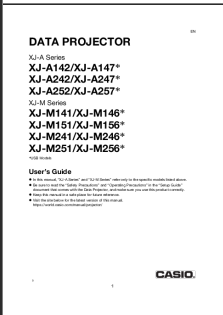

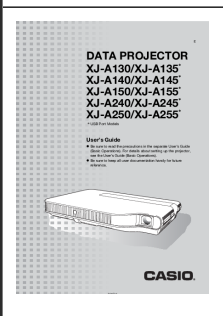

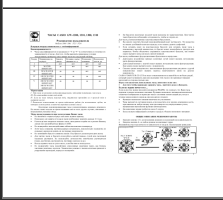

Product Dimensions	11.8 x 11.8 x 3.8 inches
Item Weight	10.78 pounds

10. WARRANTY AND CUSTOMER SUPPORT

The Casio XJ-F10X Projector is covered by a 3-year parts and labor warranty. The LED hybrid light source is covered by a 5-year or 10,000-hour warranty, whichever comes first. For technical support, service, or warranty claims, please contact Casio customer support through their official website or the contact information provided with your purchase documentation.

Please have your model number (XJ-F10X) and purchase date available when contacting support.

April Sales and Marketing News

1) **UPDATED Sales/Pricing Policy on 4K Ultra HD LampFree projector (XJ-L8300HN)**

With the introduction of the XJ-L8300HN, our first 4K UHD 5000 lumens projector, Casio enters into the large venue channel. We appreciate your support in demonstrating and selling our higher end products and are introducing the XJ-L8300HN with an amended sales/pricing policy. Current pricing policy remains in effect for Core, Advanced, Slim, and UST series.

4K UHD (XJ-L8300HN) pricing policy follows:

List Price: \$11,999.99
MSRP Price: CALL FOR PRICING
Dealer Cost: \$5,499.99
Dealer Regs: See Product Registration
Direct Registration - Registrations can be registered starting at one (1) piece.
Demo Unit discounted price: \$4,399.99

The initial response from the market to our announcement of the XJ-L8300HN has been great and we are excited about the launch of this 4K Ultra HD technology projector in June. We recommend that you enter a demo unit as soon as possible to ensure you are able to demonstrate this model to your customers when it is available.

What is different about the XJ-L8300HN pricing?

The XJ-L8300HN is a restricted product; only List Price or "Call for Pricing" may be advertised or displayed on your website and marketing materials. MSRP - Call for Pricing, the "key word" when we start pricing ahead.

The pricing policy details are covered in the Casio Dealer agreement addendum which has been sent separately to your organization for signature. If you have any questions, please contact your local sales rep for clarification. Attached is the new price list and MSRP addendum.

2) **Project Registrations for XJ-L8300HN must be sent in a separate registration form.**

The XJ-L8300HN has been added to the projector registration form, but you must send a separate form for this model and no include any other models on the form. A new and separate form is required once you have a current registration for the registration. XJ-L8300HN registrations will be unique and separate from other opportunities.

3) **New XJ-F10X Registration Allowance.**

Effective immediately we are increasing the XJ-F10X registration allowance from 8% and 10% to 10% and 17% / All current registrations will be updated to reflect this increased allowance.

Attached is the new Project Registration Form PJ-569-07.

Advanced Series
Increased connectivity, ideal for a variety of applications

Adding to the Casio line-up is the Advanced Series. With brightness of up to 3,500 ANSI lumens and 1.5x optical zoom, these new models are the ideal replacement projector for a variety of applications. The advanced series offer extensive connectivity options including 2 x HDMI, USB, VGA and LAN, and also include a compact design for multiple environments. LAN based models are compatible with Content Streaming Systems, the software enables control of up to 200 Casio projectors from a single location. The environmentally friendly, state of the art LED light source offers an outstanding low total cost of ownership, virtually no maintenance and constant brightness over the projector's 20,000-hour lifetime.

CASIO.

LampFree.

Why LampFree?

Wouldn't it be great if you could have a classroom projector that was reliable, maintenance free, and never needed a lamp change? What if the same projector gave you superior color, high brightness, "green" benefits, and great connectivity... yet the lifetime cost to the user was less than many lamp-based projectors?

Casio's LampFree® projectors use Laser & LED technology to produce images of impressive brightness with a lifespan of up to 20,000 hours. Save money year after year with reduced electricity consumption and no lamps or filters to replace.

LampFree. MercuryFree. StressFree.

Laser and LED Hybrid Light Source
Long Life - up to 20,000 hours of operation
No costly Lamps to replace
Dust resistant design - No Filters
Less Down Time
Minimal Maintenance
Cost Savings (low total cost of ownership)

ALL LampFree:
3 Year Parts & Labor
Warranty

5 Yrs or 10,000 hrs on
Light Source:
Advanced, Core & UST

Environmentally Friendly
No Harmful Substances (RoHS)
Up to 50% Less Power Consumption
Easy Flexible Installations
Quick ON – As fast as 8 seconds
Instant OFF – No cool down period

Building a Recycling Society

Approach

Social Background

Rapid economic growth brings with it problems such as the depletion of natural resources, the deterioration of value due to extraction of resources, and pressure on landfill sites for waste and pollution around them, accompanied by the increase in resources consumed. In this situation, the SDGs (Natural and Recyclable are Recycle resources) have become increasingly important in order to utilize resources fully, resource efficiency in recent years. Moreover, the use efficiency utilization rate to make plants and environmental policies caused by new plastic waste have become issues of global concern. To address these issues, efforts from a Recycle perspective must go beyond the scope of a single company's business activities to include suppliers and users.

Risks and Opportunities for the Casio Group

When the depletion of resources becomes more serious, the cost of raw materials increases, and there are concerns that this will have a major impact on production. However, as a manufacturer, it is essential to develop new products that help to build a sustainable world, and the expectations and demands of customers are also increasing. In this situation, despite the development of our products to the loss of support from and rejection by customers, waste produced in business activities could also cause environmental pollution due to landfill disposal and other issues.

In order to prepare for these risks, Casio will improve product design, including the selection of materials and development of new structures that are easy to recycle during product development. This is expected to translate into cost reductions, by helping to create new technologies and increasing resource efficiency. Furthermore, Casio strives to achieve zero landfill for the waste produced by its business activities.

Policy

Casio aims to help build a recycling-oriented society and is pursuing communication of resources and resource recycling throughout the entire value chain.

In product initiatives, the company creates new products by focusing on environmental performance from the development and design stage through recycling after use. These new products are certified, lightweight, have a long life, and feature a recyclable design. Products that meet Casio's own standards are certified as Casio Green Star Products and Casio Super Green Star Products.

Casio strives to reduce waste and improve the recycling rate at each business site, aiming for zero landfill disposal.
