3. SETUP GUIDE

Follow these steps to set up your HP Z210 Workstation Tower:

1. **Unpack the Workstation:** Carefully remove the workstation and all accessories from the packaging. Retain the packaging for future transport or storage.
2. **Connect Peripherals:**
 - Connect your monitor to the appropriate video output port (e.g., DisplayPort, DVI, VGA) on the rear of the workstation.
 - Connect the keyboard and mouse to the available USB ports.
 - Connect any other peripherals such as speakers, printers, or external drives.

3. **Connect to Network (Optional):** If using a wired connection, connect an Ethernet cable from your router or modem to the Ethernet port on the rear of the workstation.
4. **Connect Power:** Insert the power cord into the power supply port on the rear of the workstation, then plug the other end into a grounded electrical outlet.
5. **Initial Boot:** Press the power button on the front of the workstation. The system will begin to boot. Follow any on-screen instructions for initial Windows setup.

4. OPERATING INSTRUCTIONS

This section provides basic instructions for operating your HP Z210 Workstation Tower.

4.1 Powering On/Off

- **Power On:** Press the power button located on the front panel.
- **Shut Down:**
 - *Windows 10:* Click the Start button, then Power > Shut down.
 - *Windows 11:* Click the Start button, then Power > Shut down.
- **Restart:** Use the Restart option in the Power menu to reboot the system.
- **Sleep:** Use the Sleep option in the Power menu to put the system into a low-power state.

4.2 Basic Navigation (Windows 10/11)

Your workstation comes with either Windows 10 Pro or Windows 11 pre-installed. Familiarize yourself with the operating system's interface for optimal use.

- **Start Menu:** Access applications, settings, and power options.
- **Taskbar:** Pin frequently used applications and view open programs.
- **File Explorer:** Manage files and folders.
- **Settings:** Configure system preferences, network connections, and device settings.

5. MAINTENANCE

Regular maintenance helps ensure the longevity and optimal performance of your workstation.

- **Cleaning:**
 - Gently wipe the exterior of the tower with a soft, damp cloth.
 - Use compressed air to clear dust from vents and fan openings periodically. Ensure the system is powered off before cleaning.
- **Software Updates:** Regularly check for and install operating system updates (Windows Update) and driver updates for your hardware.
- **Data Backup:** Periodically back up important data to an external drive or cloud storage to prevent data loss.
- **Antivirus Protection:** Ensure your antivirus software is up-to-date and performing regular scans.

6. TROUBLESHOOTING

This section addresses common issues you might encounter and provides basic troubleshooting steps.

6.1 No Power

- Ensure the power cord is securely connected to both the workstation and the electrical outlet.
- Verify the electrical outlet is functional by plugging in another device.
- Check the power supply unit (PSU) switch on the rear of the workstation, if present, to ensure it is in the 'On' position.

6.2 No Display on Monitor

- Confirm the monitor is powered on and its power indicator light is active.

- Check that the video cable is securely connected to both the workstation and the monitor.
- Ensure the monitor's input source is set correctly (e.g., HDMI, DisplayPort, DVI).
- If using a dedicated graphics card, ensure the monitor is connected to the graphics card's output, not the motherboard's integrated graphics ports.

6.3 Slow Performance

- Close unnecessary applications running in the background.
- Check Task Manager (Ctrl+Shift+Esc) for high CPU, RAM, or disk usage by specific processes.
- Ensure the operating system and drivers are up-to-date.
- Run a disk cleanup and defragmentation (for HDD) or TRIM (for SSD) utility.
- Scan for malware or viruses.
