3. SETUP AND INSTALLATION

Installation of the XTRONS CM121HD involves mounting the unit to the vehicle's roof and connecting the necessary power and signal cables. Professional installation is recommended to ensure proper wiring and secure mounting. The unit supports both positive and negative door control wiring, allowing the integrated LED lights to synchronize with the vehicle's door status.

3.1 Wiring Connections

- **Power:** Connect the power wires to the vehicle's electrical system according to the wiring diagram provided in the full user manual.
- **HDMI:** Use an HDMI cable (not included) to connect external devices like smartphones or gaming consoles.
- **USB:** Insert USB drives for media playback.
- **SD Card:** Insert SD cards for media playback.
- **Door Control:** Connect the door control wire to enable automatic light activation/deactivation with door opening/closing.

4. OPERATING INSTRUCTIONS

The CM121HD features a soft-touch button panel for easy navigation and control. A remote control is also included for convenient operation from any seat in the vehicle.

4.1 Basic Operation

1. **Power On/Off:** Press the power button on the unit or remote control to turn the monitor on or off.
2. **Source Selection:** Use the 'Source' button to switch between HDMI, USB, SD, and AV inputs.
3. **Menu Navigation:** Use the directional buttons on the unit or remote to navigate through the on-screen display (OSD) menu for settings adjustments.
4. **Media Playback:** Once a media source (USB/SD) is selected, browse and play photos, music, or videos using the on-screen interface.

4.2 Sound Output Options

The unit offers multiple ways to output audio:

- **Infrared (IR) Transmitter:** For private listening, connect IR wireless headphones (e.g., XTRONS DWH005 and DWH006, sold separately).
- **FM Transmitter:** Broadcast audio to your car's FM radio, allowing sound to play through the vehicle's speakers.

Blue Atmospheric LED Light Bar

Equipped with high quality LED Light bars, you will enjoy a gorgeous lit atmosphere inside your vehicle at night.

5. MAINTENANCE

To ensure the longevity and optimal performance of your XTRONS CM121HD monitor, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents.
- **Temperature:** Do not expose the unit to extreme temperatures or direct sunlight for extended periods.
- **Moisture:** Keep the unit dry and away from moisture.
- **Ventilation:** Ensure proper ventilation around the unit to prevent overheating.

6. TROUBLESHOOTING

If you encounter issues with your XTRONS CM121HD, refer to the following common troubleshooting steps:

- **No Power:** Check all power connections. Ensure the vehicle's ignition is on if wired to an accessory power source.
- **No Signal:** Verify that the correct input source is selected. Check HDMI, USB, or AV cable connections for external devices.
- **No Audio:** Ensure the volume is not muted or set too low. Check FM transmitter settings if using car speakers, or IR headphone connection if applicable.
- **Picture Flickering/Distortion:** Check cable connections. Ensure the power supply is stable.
- **Remote Control Not Working:** Replace batteries in the remote control. Ensure there are no obstructions between the remote and the unit's IR receiver.

For persistent issues, consult the full product manual or contact XTRONS customer support.
