## Epilady Legend 5

# Epilady Legend 5 Rechargeable Cordless Epilator User Manual

Model: Legend 5

## INTRODUCTION

The Epilady Legend 5 is a rechargeable cordless epilator designed for effective hair removal. This device removes hair from the root, providing smooth skin for an extended period. It features 56 tweezers and dual-speed settings for versatile use across various body areas.

## SAFETY INFORMATION

- Read all instructions before use.
- Keep the device away from water. The Epilady Legend 5 is **not water resistant** and should not be used in the shower or bath, or submerged in water.
- Do not use on irritated skin, open wounds, moles, or varicose veins. Consult a doctor if you have any skin conditions or concerns.
- Keep out of reach of children.
- Ensure the device is fully charged before first use to optimize battery life.
- Only use the provided charging cable.

## PACKAGE CONTENTS

Your Epilady Legend 5 package includes the following items:

- Epilady Legend 5 Epilator
- Charging Cable
- Cleaning Brush
- Travel Case / Pouch
- Perfect Angle Guide

## SETUP

### Charging the Device

Before first use, fully charge your Epilady Legend 5. Connect the charging cable to the device and plug it into a power outlet. The indicator light will show charging status. A full charge takes approximately 60 minutes and provides up to 40 minutes of operating time.

### Attaching the Angle Guide

The Epilady Legend 5 comes with a perfect angle guide to ensure optimal positioning for efficient hair removal. This guide is designed to help you hold the device correctly against your skin. To attach, align the guide with the epilation head and snap it into place. To remove, gently pull it off.

## OPERATING INSTRUCTIONS

### Preparation

For best results, ensure your skin is clean and dry before epilation. Hair should be between 0.3 mm and 5 mm in length. If hair is longer, trim it first.

### Using the Epilator

1. Turn on the device using the power switch.
2. Select the desired speed setting:
  - **Speed 1 (Lower Speed):** Recommended for sensitive skin areas like the bikini line and underarms.
  - **Speed 2 (Higher Speed):** Suitable for faster epilation on larger body areas such as legs and arms.
3. Hold the skin taut with one hand.
4. Gently glide the epilator over the skin against the direction of hair growth. Maintain a 90-degree angle to the skin.

5. Do not press too hard; let the epilator do the work.

## Understanding Epilation

Epilation removes hair from the root, which can cause some discomfort initially. With regular use, hair may grow back thinner and slower, reducing discomfort over time. The dual-speed settings allow for adjustment based on sensitivity and hair type.

## MAINTENANCE

### Cleaning the Epilator

Regular cleaning ensures optimal performance and hygiene. After each use:

1. Ensure the device is turned off and unplugged.
2. Remove the perfect angle guide and epilation cap. These can be rinsed under running water and dried with a towel or air-dried.
3. Use the provided cleaning brush to remove any trapped hairs from the epilation head. You can gently turn the epilation wheel to open and close the tweezers for thorough cleaning.
4. **Important:** Do not run the main body of the epilator under water as it is not water resistant.

## How To Clean and Store your Epilady L5 Rechargeable Epilator

## Storage

Store the epilator in a cool, dry place. Use the included travel case or pouch to protect the device and its accessories when not in use or during travel.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not turning on.	Battery is low or depleted.	Charge the device for 60 minutes. Ensure the charging cable is properly connected.
Hair not being removed effectively.	Hair is too short or too long; incorrect angle; epilation head is dirty.	Ensure hair length is optimal (0.3mm-5mm). Hold skin taut and glide against hair growth at a 90-degree angle. Clean the epilation head thoroughly.
Discomfort or pain during epilation.	First-time use; sensitive area; high-speed setting.	Start with the lower speed setting. With regular use, discomfort typically diminishes. Ensure skin is taut.
Device stops working after a short period.	Battery life issue.	Ensure the device is fully charged. If issues persist, contact customer support.
