## Sercomm OC835-V3

# Sercomm ADT PULSE OC835-V2 Outdoor Camera User Manual

Model: OC835-V3

## 1. INTRODUCTION

The Sercomm OC835-V2 is an advanced HD indoor and outdoor night vision camera designed for integration with ADT Pulse systems. This model serves as the newest version and replacement for the OC810ADT, offering enhanced features and compatibility with V.1 & V.2 ADT Pulse systems. It provides crystal clear 720P HD recording capabilities and is cloud link enabled (Version 2).

Key features include:

- New 2017 ADT Pulse Version
- Cloud Link Enabled Version 2
- Crystal clear 720P HD recording
- Weatherproof design for outdoor use
- Unlimited 30-day recordings when used with ADT Pulse service

## 2. SETUP

Before beginning the setup process, ensure you have an active ADT Pulse system and a stable Wi-Fi network connection. The camera requires a corded electric power source.

### 2.1 Package Contents

Verify that all components are present in the package. Typically, the package includes one OC835-V2 camera unit.

### 2.2 Physical Installation

Figure 1: Sercomm ADT Pulse OC835-V2 Outdoor Camera

This image displays the front of the Sercomm OC835-V2 camera. It features a black rectangular body with rounded corners, housing the main camera lens, an infrared sensor, and a light sensor. The "ADT" logo is visible on the lower right. The camera is supported by a white, bifurcated stand, allowing for desktop placement or mounting.

The OC835-V2 camera can be used for both indoor and outdoor applications. It supports flexible mounting options, including desktop placement or secure mounting with screws. Choose a location that provides optimal viewing angles and is within range of your Wi-Fi network.

1. **Power Connection:** Connect the camera to a standard electrical outlet using the provided power adapter. Ensure the power source is stable.
2. **Placement/Mounting:**

- For desktop use, place the camera on a flat, stable surface.
- For mounted installation, use appropriate screws and anchors (not included) to secure the camera's base to a wall or ceiling. Adjust the camera's angle for desired coverage.

## 2.3 Network Configuration (ADT Pulse)

This camera is designed to integrate with your existing ADT Pulse system. Refer to your ADT Pulse system's user manual or the ADT Pulse app for specific instructions on adding a new camera device. Generally, this involves:

1. Accessing the device management section within your ADT Pulse portal or app.
2. Selecting the option to add a new camera.
3. Following the on-screen prompts to connect the camera to your Wi-Fi network and link it to your ADT Pulse account.

The camera utilizes Wi-Fi for wireless communication. Ensure your Wi-Fi network is operational and the camera is within range for optimal performance.

## 3. OPERATING INSTRUCTIONS

---

Once successfully integrated with your ADT Pulse system, the OC835-V2 camera can be controlled and monitored via the ADT Pulse app or web portal.

### 3.1 Live View

Access the live video feed from your camera through the ADT Pulse interface. The camera provides a 720p HD video

capture resolution, offering clear real-time monitoring.

## 3.2 Recording and Storage

The camera supports recording capabilities managed by the ADT Pulse system. With an active ADT Pulse subscription, you can benefit from unlimited 30-day recordings, allowing you to review footage from the past month.

## 3.3 Night Vision

Equipped with infrared technology, the OC835-V2 provides clear night vision, enabling surveillance in low-light or no-light conditions. The camera automatically switches to night vision mode as ambient light decreases.

## 3.4 Motion Detection

Configure motion detection settings within your ADT Pulse system. The camera can trigger recordings or send alerts when motion is detected in its field of view.

## 4. MAINTENANCE

---

Proper maintenance ensures the longevity and optimal performance of your camera.

### 4.1 Cleaning

To clean the camera lens and body, use a soft, dry, lint-free cloth. For stubborn dirt, slightly dampen the cloth with water. Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the camera's finish or lens coating.

### 4.2 Weather Protection

While the OC835-V2 is designed to be weatherproof, ensure it is installed in a location that minimizes direct exposure to extreme weather conditions (e.g., prolonged heavy rain, direct sunlight, or snow accumulation) to maximize its lifespan.

## 5. TROUBLESHOOTING

---

If you encounter issues with your Sercomm OC835-V2 camera, refer to the following common troubleshooting steps:

- **No Power/Camera Not Turning On:**

- Verify that the power adapter is securely connected to both the camera and a working electrical outlet.
- Check if the outlet is receiving power by plugging in another device.

- **No Video Feed/Offline Status:**

- Ensure the camera is powered on.
- Check your Wi-Fi router to confirm it is operational and broadcasting a signal.
- Confirm the camera is within range of your Wi-Fi network. Obstacles like thick walls can interfere with the signal.
- Restart the camera by unplugging it from the power source for 10 seconds and then plugging it back in.
- Check your ADT Pulse app or web portal for any system alerts or camera status indicators.
- If the issue persists, you may need to re-add the camera to your ADT Pulse system following the setup instructions.

- **Poor Video Quality:**

- Ensure the camera lens is clean and free from dust or smudges.
- Check your Wi-Fi signal strength. A weak signal can lead to degraded video quality. Consider relocating the

camera or your Wi-Fi router.

- Verify that your internet connection is stable and has sufficient bandwidth.

For further assistance, contact ADT Pulse support or refer to their online resources.
