ResMed CPS33-624-63460-FBA

ResMed AirFit F20 Frame System User Manual

Model: CPS33-624-63460-FBA

Introduction

The ResMed AirFit F20 Frame System is an essential component designed to integrate seamlessly with your full face CPAP mask. It is engineered to provide a secure and comfortable fit, crucial for effective sleep apnea therapy. This frame system is a replacement accessory, ensuring continued optimal performance of your CPAP setup.

The AirFit F20 frame features the innovative InfinitySeal cushion (note: cushion sold separately, this product is the frame system only), which adapts to facial contours to maintain a secure seal across various pressure levels. Its quick-release elbow design allows for easy disconnection from the CPAP device, minimizing disruptions during sleep. ResMed is committed to providing high-quality, durable CPAP supplies that enhance your therapy experience.

Components

This product includes the ResMed AirFit F20 Frame System. Please note that the headgear and cushion are not included with this frame system and must be purchased separately for a complete mask assembly.

- **Frame System:** The main structure that holds the cushion and connects to the headgear.
- **Quick-Release Elbow:** Allows for easy disconnection from the CPAP tubing.
- **Magnetic Clips:** For quick and secure attachment to the headgear.

Setup and Assembly

To assemble your ResMed AirFit F20 mask with the new frame system, follow these general steps. Ensure all components are clean before assembly.

1. **Attach Cushion:** Align the InfinitySeal cushion (sold separately) with the frame and press firmly until it clicks securely into place.
2. **Connect Headgear:** Thread the upper headgear straps through the slots on the top of the frame. Secure the lower headgear straps to the magnetic clips on the frame.
3. **Attach Elbow:** Insert the quick-release elbow into the opening on the front of the mask frame until it is firmly seated.
4. **Connect Tubing:** Connect your CPAP tubing to the quick-release elbow.

Fitting and Adjustment

Proper fitting of your AirFit F20 mask is essential for comfort and effective therapy. Adjust the headgear straps to achieve a secure but not overly tight fit.

- Hold the mask against your face and pull the headgear over your head.
- Adjust the top straps evenly until the mask is stable.
- Adjust the lower straps evenly until the mask is secure and comfortable.
- Connect the CPAP tubing and turn on your device.
- Make final adjustments to the straps to eliminate any leaks, ensuring the mask is not overtightened.

Care and Maintenance

Regular cleaning and proper care will extend the life of your AirFit F20 Frame System and maintain hygiene.

Daily Care Tips:

- ✓ Replace at signs of deterioration.
- ✓ If required, wipe the outside of the foam with CPAP wipes or similar alcohol-free wipes.
- ✓ Lay flat on towel to air dry.

Important Warnings:

- ✖ Do not expose to direct sunlight.

✖ Do not put in dishwasher or washing machine.

✖ Do not use alcohol or bleach to clean.

**Please refer to the Mask User Guide for full weekly cleaning instructions.*

Replacement Guidelines

To ensure optimal performance and hygiene, it is recommended to replace your frame system regularly.

Recommended Replacement Schedule:

We recommend replacing your frame system **every 3 months**.

Signs it might be time to replace your frame system:

- You are experiencing excessive leaks.
- Your therapy feels less effective than usual.
- Your frame system starts to show wear and tear (e.g., cracks, discoloration, loss of elasticity).

Troubleshooting

If you encounter issues with your AirFit F20 Frame System, consider the following common solutions:

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Mask Leaks	Improper fit, worn cushion, incorrect assembly.	Re-adjust headgear straps, ensure cushion is properly seated, check for tears or damage on cushion (replace if necessary), ensure quick-release elbow is fully inserted.
Discomfort	Mask too tight, incorrect size, cushion not sealing properly.	Loosen headgear straps slightly, ensure correct mask size, check cushion for proper fit and seal.
Difficulty Connecting/Disconnecting	Misalignment, debris in connection points.	Ensure components are aligned correctly before pressing, clean connection points.

If issues persist, consult your healthcare provider or refer to the complete ResMed AirFit F20 Mask User Guide for more detailed troubleshooting.

Specifications

Feature	Detail
Product Name	ResMed AirFit F20 Frame System
Model Number	CPS33-624-63460-FBA
Product Dimensions	8.25 x 3.6 x 6.75 inches
Item Weight	7.83 ounces
