2. KEY FEATURES

- **Webex Calling Optimization:** This device is optimized for Cisco Webex Calling. A Cisco Webex subscription must be purchased separately.
- **Fixed Function Keys:** Provides one-touch access to essential features such as service, messaging, directory, hold/resume, transfer, and conference.
- **Fully Programmable:** Line keys can be configured to support directory numbers or call features like speed dialing, offering customization for user needs.
- **Optimal Performance:** Features Class 2 Power over Ethernet (PoE) and a built-in Ethernet Gigabit switch for seamless PC connection.
- **Compatibility:** Integrates with other industry-leading call control platforms, which may require additional licenses or services.

3. WHAT'S IN THE BOX

- Cisco IP Phone CP-8841-3PW-NA-K9= Unit

4. SETUP GUIDE

4.1 Connecting the Phone

1. **Connect Network Cable:** Plug one end of an Ethernet cable into the network port (labeled with a network icon) on the back of the phone and the other end into a network switch or router that provides Power over Ethernet (PoE). If PoE is not available, connect a compatible power adapter (sold separately) to the power port.
2. **Connect Handset:** Plug the coiled cord from the handset into the handset port (labeled with a handset icon) on the phone.
3. **Connect Headset (Optional):** If using a headset, plug it into the headset port (labeled with a headset icon).
4. **Connect PC (Optional):** If you wish to connect a computer through the phone, plug an Ethernet cable from your PC into the PC port (labeled with a computer icon) on the back of the phone.

4.2 Initial Boot-up

Once connected, the phone will power on automatically and begin its boot-up sequence. The display will show the Cisco logo, followed by network configuration and registration status. This process may take a few minutes. Ensure your network is configured to provide the necessary IP address and voice services for the phone to register correctly. For Cisco Webex Calling, ensure your subscription is active and the phone is provisioned for your account.

5. OPERATING INSTRUCTIONS

5.1 Making and Receiving Calls

- **To Make a Call:** Lift the handset, press the Speaker button, or press the Headset button. Dial the number using the keypad.
- **To Answer a Call:** Lift the handset, press the Speaker button, or press the Headset button when the phone rings.
- **To End a Call:** Replace the handset, or press the End Call softkey on the display.

5.2 Using Fixed Function Keys

The phone features dedicated buttons for common functions:

- **Service:** Access various phone services.
- **Messaging:** Access voicemail messages.
- **Directory:** Access personal and corporate directories.
- **Hold/Resume:** Place an active call on hold or resume a held call.
- **Transfer:** Transfer an active call to another party.
- **Conference:** Initiate a conference call with multiple participants.

5.3 Programmable Line Keys

The buttons alongside the display are programmable line keys. They can be configured to represent phone lines,

speed dials, or other features. Consult your system administrator for specific configurations.

5.4 Volume Control

Use the Volume button (labeled with + and -) to adjust the volume of the handset, headset, or speakerphone during a call, or the ringer volume when the phone is idle.

6. MAINTENANCE

To ensure the longevity and optimal performance of your Cisco IP Phone, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry, lint-free cloth to clean the phone's surfaces. Do not use liquid cleaners, aerosol sprays, or harsh chemicals, as they can damage the phone.
- **Environment:** Keep the phone in a clean, dry environment, away from direct sunlight, excessive heat, and moisture.
- **Cables:** Periodically check all connected cables for any signs of wear or damage. Ensure they are securely plugged in.

7. TROUBLESHOOTING

This section provides solutions to common issues you might encounter with your Cisco IP Phone.

Problem	Possible Cause	Solution
Phone does not power on.	No power from Ethernet (PoE) or power adapter.	Verify Ethernet cable is securely connected to a PoE-enabled port. If using a power adapter, ensure it is plugged into a working outlet and the phone.
No dial tone.	Phone not registered with call control system; network issue.	Check network cable connection. Restart the phone by unplugging and re-plugging the Ethernet cable. Contact your system administrator if the issue persists.
Poor call quality (echo, static).	Network congestion; faulty cable; environmental interference.	Ensure network stability. Try a different Ethernet cable. Move phone away from other electronic devices.
Cannot make or receive calls.	Phone not registered; service outage; incorrect configuration.	Check the phone's display for registration status. Verify network connectivity. Contact your system administrator for assistance.

For more complex issues or persistent problems, please contact your IT department or refer to the official Cisco support resources.
