2. Download the Alexa App

Download the Amazon Alexa app on your smartphone or tablet. The app is available for iOS and Android devices. Search for "Amazon Alexa" in your device's app store.

3. Connect to Wi-Fi

Open the Alexa app and follow the on-screen instructions to connect your Echo Dot to your Wi-Fi network. You will need your Wi-Fi network name and password. Ensure your smartphone is connected to the same Wi-Fi network you intend to use for the Echo Dot during setup.

4. Connect to External Speakers (Optional)

The Echo Dot can be connected to external speakers or headphones via Bluetooth or a 3.5mm stereo cable for enhanced audio output. To connect via Bluetooth, say "Alexa, pair" and follow the instructions in the Alexa app. For a wired connection, simply plug a 3.5mm audio cable from the Echo Dot's audio output jack to your speaker's input.

Operating the Echo Dot

The Echo Dot is primarily operated using voice commands through the Alexa Voice Service. Simply say the wake word "Alexa" followed by your command or question.

Voice Control and Microphones

The Echo Dot features seven far-field microphones, allowing it to hear your voice commands from across the room, even in noisy environments or while music is playing. The light ring indicates when Alexa is listening or processing a request.

Maintenance

Cleaning

To clean your Echo Dot, gently wipe the exterior with a soft, dry, lint-free cloth. Do not use abrasive cleaners or solvents. Avoid getting moisture into any openings.

Software Updates

Your Echo Dot automatically receives software updates over Wi-Fi. Ensure your device is connected to the internet to

receive the latest features and security improvements.

Troubleshooting

Problem	Solution
Echo Dot is not responding.	Ensure the device is plugged in and the light ring is illuminated. Check if the microphone is muted (red light ring). Try saying "Alexa, stop" or "Alexa, cancel" if it's stuck on a command. Unplug the device for 30 seconds and plug it back in.
Cannot connect to Wi-Fi.	Verify your Wi-Fi password. Ensure your router is working correctly. Move the Echo Dot closer to your router. Restart your router and the Echo Dot. Use the Alexa app to reconfigure Wi-Fi settings.
Audio quality is poor or no sound.	Adjust the volume using voice commands or the buttons on top of the device. If connected to external speakers, check their power and volume. Ensure the 3.5mm cable is fully inserted or Bluetooth connection is stable.
Alexa is not understanding commands.	Speak clearly and directly to the device. Reduce background noise. Ensure you are using the correct wake word ("Alexa"). Check your device's language setting in the Alexa app.

Ihr Echo Dot einrichten

Sie können Ihr Echo Dot an den verschiedensten Orten aufstellen, z. B. auf der Küchentheke, im Wohnzimmer, auf dem Nachttisch oder überall dort, wo Sie sich einen sprachgesteuerten Computer wünschen. Echo Dot kann auch ohne andere Alexa-Geräte verwendet werden.

Bevor Sie Ihr Echo Dot und den Alexa Voice Service erstmalig verwenden, stellen Sie eine Verbindung mit einem WLAN-Netzwerk her und melden Sie das Gerät über die Alexa-App bei Ihrem Amazon-Konto an. Führen Sie dazu die folgenden Schritte aus:

Probleme bei der Anmeldung können oft durch falsche Passwörter verursacht werden. Wenn Sie einen Passworttipfehler erhalten oder Ihr Passwort vergessen haben, können Sie einen personalisierten Link zum Zurücksetzen des Passwortes anfordern.

Passwort vergessen

1. **Laden Sie die Alexa App herunter und melden Sie sich an.**

   Mit der kostenlosen Alexa App können Sie Ihr Gerät einrichten und Wecker, Musik, Einkaufslisten und weitere Funktionen verwalten. Die Alexa App gibt es für Smartphones und Tablets mit:

   - Fire OS 3.0 oder höher
   - Android 4.4 oder höher
   - iOS 8.0 oder höher

   Um die Alexa App herunterzuladen, rufen Sie auf Ihrem Mobilgerät den Appstore auf und suchen Sie nach „Alexa App". Wählen Sie die App aus und laden Sie sie herunter.

   Alternativ können Sie auf einem Computer mit WLAN die Seite https://alexa.amazon.de in Safari, Chrome, Firefox, Microsoft Edge oder Internet Explorer (10 oder höher) aufzurufen.

2. **Schalten Sie den Echo Dot ein.**

   Platzieren Sie den Echo Dot an einem zentralen Ort (mit mindestens 20 cm Abstand von Wänden und Fenstern). Schließen Sie das mitgelieferte Netzteil am Echo Dot an und stecken Sie den Stecker in eine Steckdose. Der Lichtring auf dem Echo Dot wird zuerst blau und danach orange. Wenn das Licht zu Orange wechselt, werden Sie von Alexa begrüßt.

   Anmerkung: Über andere USB-Netzteile (wie Smartphone-Zubehör) erhält der Echo Dot möglicherweise zu wenig Strom.

3. **Verbinden Sie den Echo Dot mit einem WLAN-Netzwerk.**
