CABLEDECONN B0768B7S49

CABLEDECONN Multiport 4-in-1 HDMI Adapter (Model B0768B7S49) User Manual

1. PRODUCT OVERVIEW

The CABLEDECONN Multiport 4-in-1 HDMI Adapter is designed to convert an HDMI signal to HDMI, DVI, or VGA outputs, along with audio output capabilities. This versatile adapter allows you to connect your HDMI-enabled devices to various display types, including HDTVs, monitors, and projectors.

Key Features:

- **Multi-function Output:** Supports simultaneous HDMI, DVI, and VGA output (note: only one display output can be active at a time).
- **Audio Output:** Provides dedicated audio output options for different connection types.
- **High Resolution:** Supports video resolutions up to 1920x1080 (1080P Full HD) for HDMI and DVI, and 1920x1080 for VGA.
- **External Power Support:** Includes a Micro USB power port for stable performance with high-power devices or low-battery situations.
- **Durable Connectors:** HDMI connectors are designed to resist corrosion and improve signal performance.

2. PACKAGE CONTENTS

Please verify that all items are present in your package:

- 1 x CABLEDECONN Multiport 4-in-1 HDMI to HDMI/DVI/VGA Adapter Cable with Audio Output Converter
- 1 x Audio cable (3.5mm)
- 1 x Micro USB power cable

3. SETUP INSTRUCTIONS

Follow these steps to set up your CABLEDECONN 4-in-1 HDMI Adapter:

1. **Connect Input:** Plug the HDMI male connector of the adapter into the HDMI output port of your source device (e.g., laptop, set-top box, Apple TV).
2. **Connect Output Display:** Connect your desired display (HDTV, monitor, or projector) to one of the adapter's output ports (HDMI, DVI, or VGA). *Important: Only one display output (HDMI, DVI, or VGA) can be used at a time. Connecting multiple displays simultaneously is not supported for extended*

desktop functionality.

3. Connect Audio (if needed):

- **For HDMI Output:** If your HDMI display has audio output, both video and audio will transmit simultaneously. If your HDMI display lacks audio output, connect a 3.5mm audio cable from your input device's audio jack to external speakers.
- **For VGA Output:** VGA does not transmit audio. Connect the included 3.5mm audio cable from the adapter's audio jack to your external speakers for sound.
- **For DVI Output:** DVI does not transmit audio. Connect a 3.5mm audio cable from your input device's audio port to your external audio devices for sound.

4. **External Power (Optional but Recommended):** If connecting high-power devices or if the adapter's performance is unstable, connect the Micro USB power cable from the adapter's 'Power' port to a 5V USB power source.

5. **Configure Audio Settings:** In your input device's audio settings, select the appropriate audio output device (e.g., HDMI display for HDMI output, or external speakers for VGA/DVI output).

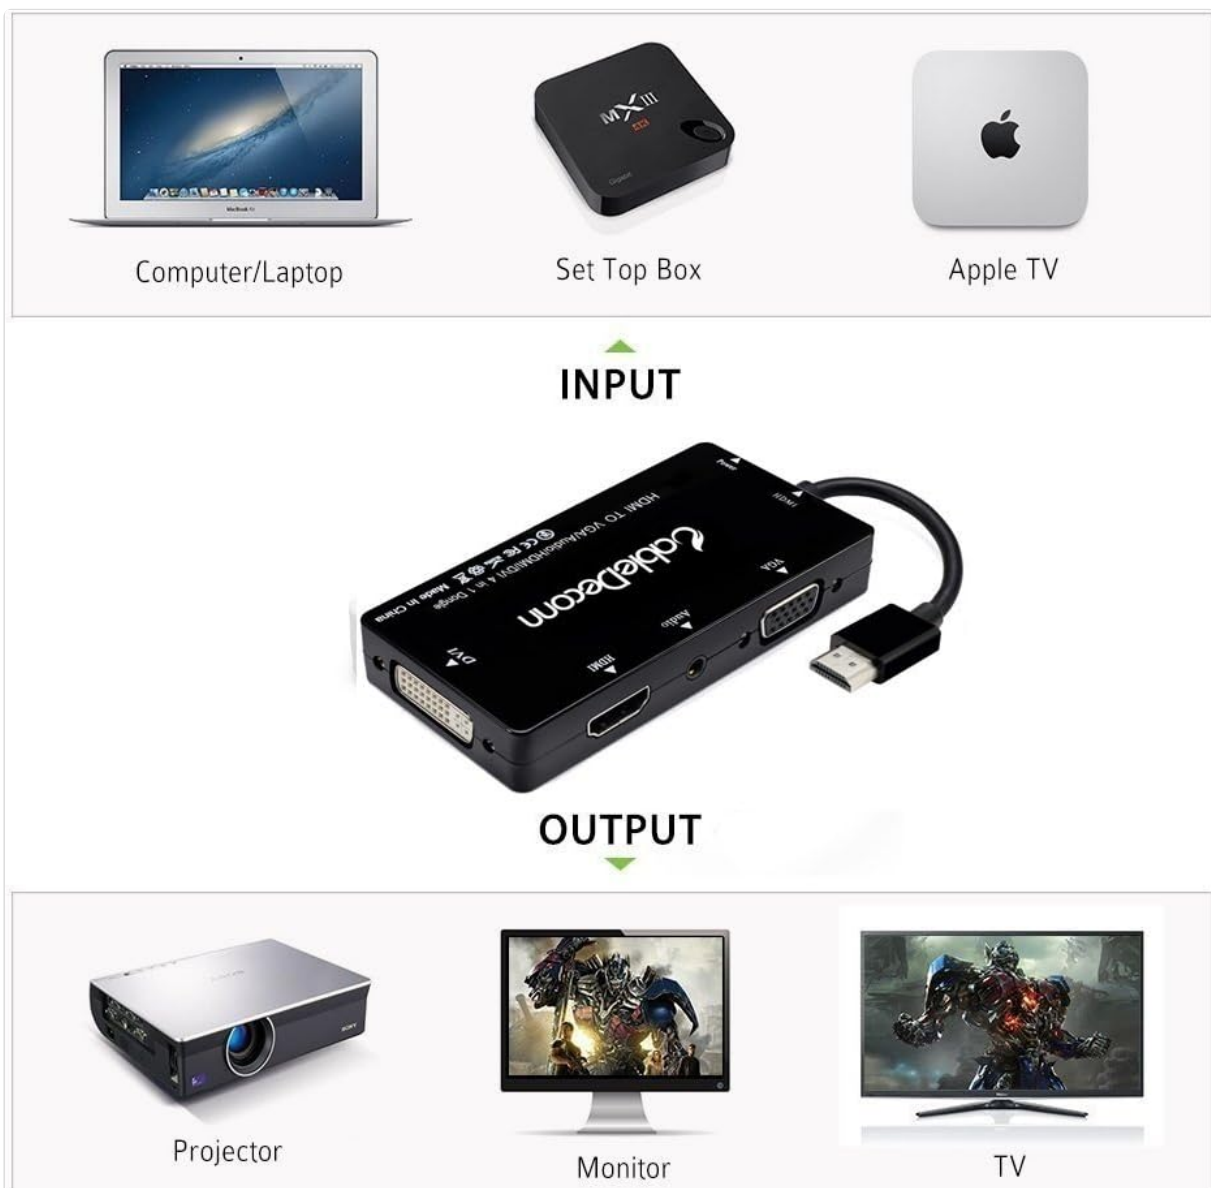

Figure 2: Connection diagram showing input devices (Computer/Laptop, Set Top Box, Apple TV) and output displays (Projector, Monitor, TV).

4. OPERATING INSTRUCTIONS

Once connected, your display should automatically detect the signal. You can configure your display settings on your source device for either a mirrored or extended desktop experience.

Display Modes:

- **Mirror Display:** Duplicates your desktop onto a larger screen for visual enjoyment.
- **Extend Display:** Extends your desktop across multiple screens for increased visibility and multitasking.

5. MAINTENANCE

To ensure the longevity and optimal performance of your CABLEDECONN 4-in-1 HDMI Adapter, please follow these maintenance guidelines:

- Keep the adapter in a dry environment, away from moisture and extreme temperatures.
- Avoid dropping or subjecting the adapter to strong impacts.
- Clean the adapter with a soft, dry cloth. Do not use liquid cleaners or aerosols.
- Ensure cables are connected securely but without excessive force to prevent damage to the ports.

6. TROUBLESHOOTING

If you encounter issues with your CABLEDECONN 4-in-1 HDMI Adapter, please refer to the following common solutions:

- **No Display Output:**
 - Ensure all cables (HDMI input, display output, and optional Micro USB power) are securely

connected.

- Verify that your display is set to the correct input source (e.g., HDMI 1, DVI, VGA).
- Try connecting the Micro USB power cable to provide additional power, especially for older or high-resolution displays.
- Confirm that only one display output (HDMI, DVI, or VGA) is connected at a time. The adapter does not support simultaneous output to multiple displays.

- **No Audio Output:**

- Review the audio connection instructions in Section 3, as audio output methods vary by display type (HDMI, DVI, VGA).
- Check your source device's audio settings to ensure the correct output device is selected.
- Ensure your external speakers are powered on and functioning correctly.

- **Unstable Signal or Flickering:**

- Connect the Micro USB power cable to ensure stable power delivery to the adapter.
- Ensure the HDMI input cable is of good quality and not excessively long.
- Try a different display cable (HDMI, DVI, or VGA) if possible.

7. SPECIFICATIONS

Model Number	B0768B7S49
Input	HDMI Male
Output	HDMI Female, DVI Female, VGA Female, 3.5mm Audio Female
Max Resolution (HDMI/DVI)	1920x1080 (1080P)
Max Resolution (VGA)	1920x1080
External Power Supply	Micro USB 5V (cable included)
Item Weight	2.65 ounces
Color	Black

8. WARRANTY AND SUPPORT

Warranty Information:

This CABLEDECONN product is covered by an **18-month worry-free warranty** from the date of purchase. This warranty covers manufacturing defects and ensures the product performs as described under normal use.

Customer Support:

For any questions, technical assistance, or warranty claims, please contact CABLEDECONN customer support. Dedicated email customer support is available 24 hours a day.

Please refer to the contact information provided with your purchase or visit the official CABLEDECONN website for the most up-to-date support details.
