Can-Am 715002923

Can-Am Ogio LinQ Premium Storage Bag (Model 715002923) User Manual

Official instructions for installation, operation, and maintenance.

1. PRODUCT OVERVIEW

The Can-Am Ogio LinQ Premium Storage Bag is a semi-rigid cargo bag designed for use with Can-Am vehicles such as ATVs and UTVs. It offers 17.2 gallons (65 liters) of storage capacity and features a tool-less installation system for convenience.

This genuine Can-Am accessory is engineered to provide secure and organized storage for your gear during rides.

Figure 1: Can-Am Ogio LinQ Premium Storage Bag. This image shows the black semi-rigid storage bag, likely mounted on the rear rack of an ATV or UTV, demonstrating its size and appearance.

2. KEY FEATURES

- **Semi-Rigid Construction:** Provides durability and shape retention while remaining flexible.
- **LinQ System Compatibility:** Enables tool-less installation and removal for quick attachment and detachment from compatible Can-Am vehicle racks.
- **Dust Protection:** Features a buckle and elastic closure with a rubber seal designed to protect contents from dust ingress.
- **Three-Section Lid:** Allows for partial or full access to the bag's contents, enhancing convenience.
- **Internal Organization:** Includes inside separators for efficient organization of items within the bag.
- **Generous Capacity:** Offers 17.2 gallons (65 liters) of storage space.
- **Dimensions:** Measures approximately 39 inches (99 cm) in length, 18 inches (45 cm) in width, and 11.5 inches (29 cm) in height.

3. INSTALLATION (LINQ SYSTEM)

The Can-Am Ogio LinQ Premium Storage Bag utilizes the LinQ system for quick and easy installation on compatible Can-Am vehicle racks. This system is designed for tool-less attachment and removal.

3.1 Attaching the Storage Bag

1. Ensure your Can-Am vehicle is equipped with a compatible LinQ-ready rack system.
2. Align the LinQ fasteners on the bottom of the storage bag with the corresponding LinQ receptacles on your vehicle's rack.
3. Press down firmly on the storage bag until the LinQ fasteners click securely into place. Verify that all fasteners are fully engaged and the bag is stable.

3.2 Removing the Storage Bag

1. Locate the release levers or buttons on the LinQ fasteners.
2. Simultaneously activate the release mechanism for all fasteners.
3. Lift the storage bag directly upwards to detach it from the rack.

Note: Always ensure the bag is securely attached before operating the vehicle. Periodically check the LinQ fasteners for proper engagement, especially after traveling over rough terrain.

4. OPERATION

4.1 Accessing Contents

- The bag features a three-section lid. Unfasten the buckles and elastic closure to open the lid.
- You can open one, two, or all three sections of the lid to access specific areas of the bag without fully exposing all contents.

4.2 Organizing Contents

- Utilize the internal separators to create compartments for different items. This helps keep your gear organized and prevents shifting during transit.
- Distribute weight evenly within the bag to maintain vehicle stability.

4.3 Securing the Bag

- After loading or accessing contents, ensure the three-section lid is fully closed.
- Fasten all buckles and engage the elastic closure. The rubber seal around the lid helps to protect the bag's interior from dust.

5. MAINTENANCE AND CARE

5.1 Cleaning

- Clean the exterior of the bag with a mild soap and water solution. Use a soft brush or cloth to remove dirt and debris.
- Rinse thoroughly with clean water and allow the bag to air dry completely before storage or re-use.
- For the interior, wipe with a damp cloth as needed.

5.2 Inspection

- Regularly inspect the LinQ fasteners for any signs of wear, damage, or deformation. Replace any

damaged components immediately.

- Check the rubber seal around the lid for cracks or tears to ensure continued dust protection.
- Examine the bag's fabric and stitching for any rips, fraying, or loose threads.

5.3 Storage

- When not in use, store the bag in a clean, dry place away from direct sunlight and extreme temperatures.
- Avoid placing heavy objects on top of the bag during storage to prevent deformation.

6. TROUBLESHOOTING

6.1 Bag Not Securing Properly

- **Issue:** LinQ fasteners do not click into place or bag feels loose.
- **Solution:**
 - Ensure the LinQ receptacles on the vehicle rack are clear of debris.
 - Verify that the bag's LinQ fasteners are not damaged or obstructed.
 - Apply firm, even pressure when attaching the bag.
 - Confirm compatibility of the bag with your specific vehicle model's LinQ system.

6.2 Dust Entering the Bag

- **Issue:** Contents inside the bag are getting dusty.
- **Solution:**
 - Ensure the three-section lid is fully closed and all buckles and elastic closures are fastened.
 - Inspect the rubber seal around the lid for any gaps, damage, or debris that might compromise its effectiveness. Clean or replace the seal if necessary.

For issues not covered here, or if problems persist, please contact Can-Am customer support.
