3. SETUP AND FIRST USE

3.1 Unpacking

Carefully remove all packaging materials and stickers from the appliance. Ensure all components are present and undamaged. Retain the packaging for potential future transport or storage.

3.2 Filling the Water Tank

1. Ensure the steam generator is unplugged from the power outlet.
2. Remove the removable water tank from the base unit.

3. Fill the tank with clean tap water up to the "MAX" level indicator. Do not use distilled or demineralized water exclusively, as this can affect steam performance. A mix of tap water and distilled water (50/50) is recommended in areas with very hard water.
4. Replace the water tank securely into the base unit.

Figure 3.2: Illustrates the process of filling the water tank directly from a faucet.

3.3 Initial Heat-up

1. Place the steam generator on a stable, heat-resistant surface.
2. Plug the power cord into a suitable electrical outlet.
3. Press the On/Off button. The indicator light will flash, indicating the appliance is heating up.
4. Once the light becomes steady (approximately 2 minutes), the iron is ready for use.
5. During the first use, a small amount of smoke or odor may be emitted. This is normal and will dissipate quickly.

4. OPERATING INSTRUCTIONS

4.1 Ironing with Steam

1. Ensure the water tank is filled and the iron is heated.
2. Adjust the temperature dial on the iron to suit the fabric type. Refer to the garment care label.
3. Press the steam trigger located under the handle to release continuous steam.

4. For stubborn creases, press the steam boost button for an extra burst of steam.
5. Iron garments smoothly, moving the iron across the fabric.

4.2 Dry Ironing

To dry iron, simply do not press the steam trigger. The iron will function as a standard dry iron, heating the soleplate to the selected temperature.

4.3 Vertical Steaming

The vertical steam function is ideal for refreshing hanging garments, curtains, or delicate fabrics.

1. Hang the garment on a hanger.
2. Hold the iron vertically, a few centimeters away from the fabric.
3. Press the steam trigger to release steam. Move the iron up and down the garment.
4. **Caution:** Do not direct steam towards people or pets.

4.4 Eco Mode

To activate Eco mode, press the "Eco" button on the base unit. This mode optimizes steam output and temperature to reduce energy consumption while still providing effective ironing results for most fabrics.

5. MAINTENANCE AND CLEANING

Regular maintenance ensures optimal performance and extends the lifespan of your steam generator iron.

5.1 Cleaning the Soleplate

- Ensure the iron is unplugged and completely cool.
- Wipe the ceramic soleplate with a damp cloth. For stubborn marks, use a non-abrasive cleaning agent specifically designed for iron soleplates.
- Do not use abrasive pads or metallic scourers, as these can damage the soleplate.

5.2 Descaling (Anti-Calc Cartridge)

The Tefal SV7030 Liberty features an integrated anti-calc cartridge to manage limescale. The "Anti-Calc" indicator light on the base unit will illuminate when the cartridge needs attention.

1. Ensure the appliance is unplugged and cool.
2. Locate the anti-calc cartridge compartment, usually accessible by removing the water tank or a specific cover.
3. Remove the old anti-calc cartridge.
4. Insert a new Tefal anti-calc cartridge, ensuring it is correctly seated.
5. Reset the anti-calc indicator by pressing and holding the "Anti-Calc" button for a few seconds (refer to Figure 4.1 for button location).

Figure 5.1: A hand removing the anti-calc cartridge from its housing.

Figure 5.2: Two new anti-calc cartridges, ready for replacement.

The frequency of cartridge replacement depends on water hardness and usage. Replace the cartridge when the indicator light signals it, or if you notice a decrease in steam performance or white flakes in the steam.

5.3 Storage

After use, unplug the appliance and allow it to cool completely. Empty any remaining water from the tank. Secure the iron to its base using the safety lock system. Store the steam generator in a dry, safe place.

6. TROUBLESHOOTING

Before contacting customer service, please refer to the following common issues and solutions:
