## INSTALLATION

Follow these general steps to replace your air purifier filter. Always refer to your specific air purifier's user manual for detailed instructions.

1. **Power Off:** Ensure your air purifier is unplugged from the power outlet before beginning installation.
2. **Access Filter Compartment:** Open the filter compartment of your air purifier. This usually involves removing a cover or panel.
3. **Remove Old Filter:** Carefully remove the old, used filter. Dispose of it according to local regulations.
4. **Prepare New Filter:** Unpack the new LifeSupplyUSA ER355 filter. If your unit uses a pre-filter, wrap it around the new HEPA filter as instructed by your air purifier's manual.
5. **Insert New Filter:** Place the new filter into the compartment, ensuring it is seated correctly.
6. **Close Compartment:** Securely close the filter compartment cover or panel.
7. **Restore Power:** Plug the air purifier back into the power outlet.
8. **Reset Filter Indicator:** If your air purifier has a filter replacement indicator, reset it according to your unit's instructions.

Video: This video demonstrates the unboxing and preparation of the filter, including wrapping the pre-filter.

Video: Instructions for installing a replacement filter in an older, round air purifier unit.

Video: A step-by-step guide on how to change the filter in a Honeywell 50150(21500) air purifier, which uses a similar round filter design.

## OPERATING YOUR AIR PURIFIER WITH NEW FILTER

Once the new filter is installed, your air purifier is ready for operation. For optimal performance, place your air purifier in areas where air quality improvement is most desired.

- **Common Areas:** Utilize the air purifier in frequently used spaces like living rooms, bedrooms, or offices to continuously filter airborne particles.
- **Kitchen Use:** Operating the air purifier in the kitchen can help reduce cooking odors and other airborne contaminants.
- **Bedroom Use:** Running the air purifier in the bedroom can contribute to a cleaner sleeping environment by filtering out allergens and dust.

## MAINTENANCE AND FILTER REPLACEMENT SCHEDULE

To ensure your air purifier operates at peak efficiency, regular filter replacement is crucial. The LifeSupplyUSA ER355 True HEPA Filter Replacement should be replaced every 6 months. This timeframe can vary depending on the air quality in your environment and the frequency of air purifier use.

- **Check Filter Indicator:** Many air purifiers have an indicator light that signals when a filter change is due.

- **Visual Inspection:** Periodically inspect the filter for visible signs of dirt and debris accumulation. A heavily soiled filter indicates a need for replacement.
- **Optimal Performance:** Replacing the filter as recommended ensures continuous high-efficiency air purification.

## TROUBLESHOOTING

---

If you experience issues with your air purifier after replacing the filter, consider the following:

- **Improper Installation:** Double-check that the filter is correctly seated in its compartment and that the compartment cover is securely closed.
- **Filter Indicator Not Reset:** Ensure the filter replacement indicator on your air purifier has been reset according to the manufacturer's instructions.
- **Air Purifier Malfunction:** If air quality does not improve or the unit is not functioning as expected, consult your air purifier's original user manual for specific troubleshooting steps or contact the air purifier manufacturer's support.

## SPECIFICATIONS

---
