Samsung DA29-00003F

Samsung DA29-00003F Aqua-Pure Plus Refrigerator Water Filter Instruction Manual

Model: DA29-00003F

1. Introduction

This manual provides instructions for the proper installation, operation, and maintenance of your Samsung DA29-00003F Aqua-Pure Plus Refrigerator Water Filter. This genuine Samsung water filter is designed to deliver clean, clear, and great-tasting water by reducing impurities.

- Genuine Samsung Water Filter ensures compatibility and optimal performance.
- Delivers clean, clear water that looks and tastes great, while protecting refrigerator components from sediment.
- Utilizes advanced filtration technology to effectively remove most water impurities.
- Features a high-grade carbon block that removes over 99% of numerous potentially harmful contaminants that may be present in your water.

2. Important Safety Information

Read all instructions carefully before installing the water filter. Keep this manual for future reference.

- Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
- Ensure proper alignment and secure twisting during installation to prevent water leaks.
- Replace the filter every 6 months or as indicated by your refrigerator's filter indicator light to maintain water quality and prevent potential issues.

3. Installation Instructions

Follow these steps to install your new Samsung DA29-00003F water filter.

1. **Locate the Filter:** Identify the existing water filter in your refrigerator. It is typically located in the upper right corner of the fresh food compartment.

2. **Turn Off Water Supply:** Turn off the main water supply to your refrigerator. This is usually done via a shut-off valve behind the refrigerator or under the sink.
3. **Remove Old Filter:** Twist the old filter counter-clockwise approximately one-quarter turn until it releases from the filter housing. Pull the old filter straight down and remove it. Some water may drip out, so have a towel ready.
4. **Prepare New Filter:** Remove the protective cap from the new filter.
5. **Insert New Filter:** Align the new filter with the filter housing. Push the new filter up into the housing until it stops.
6. **Secure New Filter:** Twist the filter clockwise approximately one-quarter turn until it locks securely into place. You should feel it engage firmly.
7. **Restore Water Supply:** Turn the water supply back on to the refrigerator.
8. **Flush System:** Flush the water system by dispensing approximately 2-3 gallons of water through the refrigerator's dispenser. This removes trapped air and any carbon fines from the new filter.
9. **Reset Indicator:** Reset the filter indicator light on your refrigerator. Refer to your refrigerator's user manual for specific instructions on how to reset the filter indicator.

4. Operation

Once installed, the Samsung DA29-00003F water filter operates automatically, filtering water as it passes through to your refrigerator's dispenser and ice maker.

- The filter utilizes a high-grade carbon block to effectively reduce chlorine taste and odor, sediment, and other contaminants, providing improved water quality.
- For optimal performance and to ensure fresh water, it is recommended to use the refrigerator's water dispenser regularly.

5. Maintenance and Replacement

Regular replacement of your water filter is essential for maintaining optimal water quality and refrigerator performance.

- **Replacement Schedule:** Replace the water filter every 6 months or sooner if the water flow noticeably decreases, or if the filter indicator light on your refrigerator illuminates.
- **Filter Indicator:** Your refrigerator has a built-in filter indicator (often a light or display icon) that will change color or illuminate when it is time to replace the filter. Refer to your refrigerator's user manual for specific details on how to reset this indicator after replacement.
- **Ordering Replacements:** Always use genuine Samsung DA29-00003F replacement filters to ensure compatibility, maintain warranty, and guarantee the specified filtration performance.

6. Troubleshooting

If you encounter any issues with your water filter, refer to the table below for common problems and solutions.

Issue	Possible Cause	Solution
Water Leakage	Filter not properly seated or twisted; damaged O-rings.	Remove and re-install the filter, ensuring it is fully twisted into place. Check the O-rings for any visible damage.
Reduced Water Flow	Clogged filter; air trapped in the system.	Replace the filter if it's past its recommended service life. Flush the system by dispensing several gallons of water to remove air.
Cloudy or Discolored Water	Air in the system; carbon fines from a new filter.	Flush the system by dispensing 2-3 gallons of water. This is normal for new carbon filters and should clear within a few minutes of flushing.
Bad Taste or Odor	Filter needs replacement; filter not properly flushed.	Replace the filter if it's old. Ensure the new filter has been adequately flushed after installation.

7. Specifications

Key specifications for the Samsung DA29-00003F Aqua-Pure Plus Refrigerator Water Filter:

Feature	Detail
Model Number	DA29-00003F
Brand	Samsung
Material	Carbon
Item Weight	0.71 Pounds
External Testing Certification	WQA, ANSI, NSF
Product Benefits	Removes over 99% of harmful contaminants, reduces chlorine, taste, and odor.
Unit Count	1 Count
Compatible Refrigerator Models	Samsung RFG237AARS, RS2534BB, RS2534WW, RS253BASB, RS253BAVQ, RS253BAWW, RS255BASB, RS2578WW, RS2621SW, RS277ACPN, RS277ACWP, and other models compatible with DA29-00003F.

8. Warranty and Support

For warranty information or technical support regarding your Samsung DA29-00003F Aqua-Pure Plus Refrigerator Water Filter, please refer to your refrigerator's original documentation or contact Samsung customer service directly.
