3. SETUP

3.1. Unboxing and Initial Inspection

Carefully remove all components from the packaging. Verify that all items listed in your package contents are present and undamaged. This package typically includes the Magicard Pronto printer, Bodno software with activation code, 100 PVC cards, and a Magicard color ribbon.

3.2. Connecting the Printer

1. Place the printer on a stable, flat surface.
2. Connect the power adapter to the printer and then to a power outlet.
3. Connect the printer to your computer using the provided USB cable.

3.3. Software Installation

Insert the Bodno Bronze Edition software CD or download the software from the official Bodno website. Follow the

on-screen instructions to complete the installation. Use the provided one-time license and activation code during the setup process.

What you get with the Bronze Software Edition

- ✓ You can easily create photo ID card.
- ✓ Create your own template, or choose from ours.
- ✓ You can create 1D barcodes.

Image 3: The Bodno Magicard Pronto printer connected to a computer displaying the Bodno Bronze Edition software, highlighting its user-friendly interface for creating photo ID cards, templates, and 1D barcodes.

3.4. Loading Cards and Ribbon

1. Open the printer cover to access the ribbon compartment.
2. Carefully insert the Magicard color ribbon into its designated slot, ensuring it is properly seated.
3. Place the PVC cards into the manual feed slot at the front of the printer. Ensure they are aligned correctly.

4. OPERATING INSTRUCTIONS

4.1. Designing Your ID Card

1. Launch the Bodno Bronze Edition software on your computer.
2. Choose from pre-made templates or start a new design using the drag-and-drop interface.
3. Add text, images (including photos from the included camera), and other design elements as needed.

4. Ensure all elements are within the printable area of the card.

4.2. Printing a Card

1. Once your design is complete, select the 'Print' option within the Bodno software.
2. Confirm your printer selection and print settings.
3. The printer will automatically feed the card, print the design, and eject the finished ID card.

5. MAINTENANCE

5.1. Cleaning the Printer

Regular cleaning is crucial for optimal print quality and printer longevity. Use a lint-free cloth or the Magicard 3633-0053 Cleaning Kit (if included or purchased separately) to clean the printer's internal components as per the instructions provided with the cleaning kit.

5.2. Ribbon Replacement

When the print ribbon is depleted, the printer software will typically notify you. Open the printer cover, remove the used ribbon, and install a new Magicard color ribbon following the instructions in Section 3.4.

6. TROUBLESHOOTING

If you encounter any issues, please refer to the following common troubleshooting steps:

- **Printer Not Responding:** Check all cable connections (power, USB) and ensure the printer is powered on. Restart both the printer and your computer.
- **Poor Print Quality:** Ensure the print ribbon is correctly installed and not damaged. Clean the printer using a recommended cleaning kit. Verify that the cards are clean and free of dust.
- **Card Jam:** Power off the printer, carefully open the cover, and gently remove any jammed cards or ribbon fragments. Do not force components.
- **Software Issues:** Ensure your Bodno software is up to date. Reinstall the software if problems persist.

For persistent issues, please contact Bodno customer support.
