- USB B to USB A Cable
- Fixed Hard Drive Screws (x4)
- User Manual

Figure 1: Package Contents. The image displays the black hard drive enclosure, a power adapter, a USB 3.0 data cable, four small screws, a screwdriver, and the instruction manual, all neatly arranged.

SETUP

1. Drive Installation

The RSHTECH enclosure is designed for easy, tool-free installation of 3.5-inch SATA I/II/III HDDs or SSDs. For 2.5-inch drives, the screw holes may not align, and additional securing methods (e.g., tape) might be needed.

1. Slide off the case cover of the enclosure.
2. Carefully insert your 3.5-inch SATA HDD or SSD into the enclosure, ensuring the SATA connectors align and connect properly.
3. Use the provided screwdriver and four screws to fix the hard drive securely to the bottom of the case for better protection.
4. Slide the cover back onto the enclosure until it clicks into place.

USB3.0 to SATA III

Figure 2: Easy slide installation. The diagram illustrates the simple process of sliding a 3.5-inch hard drive into the enclosure's internal tray.

2. Initializing and Formatting (for new or unformatted drives)

If your SSD or HDD has never been formatted, your computer will not be able to detect it. Follow these steps to initialize and format the disk:

1. Right-click on
