SETUP

Unfolding the Cart

The MGI Zip X1 features an innovative Zip Fold system for easy setup and transport. To unfold the cart, locate the clip on the top section of the frame and undo it. Then, pull up the small clip at the bottom of the main shaft. This will allow the cart to fold out, and the front wheel will automatically extend. Once unfolded, ensure all clips are securely fastened to lock the frame in place.

Figure 2: MGI Zip X1 in Unfolded Position

Attaching Wheels

The rear wheels are designed for easy attachment and can be inverted for compact storage. Ensure you attach the right wheel to the right side and the left wheel to the left side, as indicated by the 'R' and 'L' stickers on the wheels and corresponding slots. This ensures proper functionality of the trolley. The integrated rear stabilizing wheel can be folded in for storage by pulling its small clip and locking it into place.

OPERATING THE CART

Speed Control and Display

The MGI Zip X1 features a simple LED display unit on the handle. The central number indicates the current speed setting (1-20). A green LED light indicates sufficient battery life, which will change to amber or red as the battery depletes. Another LED turns green when the trolley is in use and turns off when not. The speed dial is responsive and easy to use, allowing for precise control.

Figure 4: Control Panel and Display

Stability and Anti-Tip Wheel

The integrated rear stabilizing wheel provides enhanced stability, especially when navigating inclines or uneven terrain. This feature significantly reduces the likelihood of the trolley tipping backward, ensuring your golf bag remains secure throughout your round.

CHARGING AND BATTERY

Battery System

The MGI Zip X1 is powered by a Zip High Performance Lithium 36 Hole Battery. This light, compact, and powerful battery is designed to provide ample power for up to 36 holes of golf. The battery clicks on vertically via an easy-to-access lifting handle.

Charging Options

You have two primary options for charging the battery. You can charge the battery while it is still attached to the cart by lifting the designated flap and connecting the charger. Alternatively, you can easily remove the battery by lifting the flap and gently pulling it off the top of the unit. The included charger features color-coded indicators (Green for Full Charge, Red for Charging) and a digital display showing the percentage of charge. A USB charging port is also located underneath the top handle for charging your devices while on the course.

MAINTENANCE

To ensure the longevity and optimal performance of your MGI Zip X1 Electric Golf Cart, regular maintenance is recommended. After each use, wipe down the cart with a damp cloth to remove dirt and debris. Ensure the battery is fully charged before storage and store it in a cool, dry place. Periodically check all moving parts and connections for any signs of wear or looseness. Refer to the official MGI online user manual for detailed cleaning instructions and maintenance schedules.

TROUBLESHOOTING

If you encounter any issues with your MGI Zip X1, please refer to the following common troubleshooting tips:

- **Cart Not Moving:** Check if the battery is properly seated and fully charged. Ensure the power is turned on and the speed dial is set above zero.
- **Unusual Noises:** Inspect wheels and axles for any obstructions or loose components.
- **Battery Not Charging:** Verify that the charger is correctly plugged into both the battery and a power outlet. Check the charger's indicator lights for status.

For more detailed troubleshooting guides or persistent issues, please visit the official MGI support website or contact customer service.
