Intex 26778NP

Intex Prism Frame Rectangular Pool User Manual

Model: 26778NP

Introduction

Thank you for purchasing the Intex Prism Frame Rectangular Pool. This manual provides essential information for the safe assembly, operation, and maintenance of your new pool. Please read all instructions carefully before setting up and using the pool to ensure a safe and enjoyable experience.

Important Safety Information

Always follow these basic safety precautions to reduce the risk of injury or drowning:

- **Adult Supervision Required:** Never leave children unattended in or around the pool.
- **No Diving:** This pool is not designed for diving. Shallow water can cause serious injury.
- **Secure Access:** Always use the provided ladder safely and remove or secure it when the pool is not in use to

prevent unsupervised access.

- **Clear Area:** Ensure the area around the pool is clear of obstacles and hazards.
- **Chemical Handling:** Handle pool chemicals according to manufacturer's instructions.
- **Electrical Safety:** Keep all electrical devices away from the pool.
- **Emergency Preparedness:** Keep emergency equipment (e.g., life ring, first aid kit) readily accessible.

Setup and Assembly

Proper site selection and assembly are crucial for the longevity and safety of your pool.

1. Site Preparation

- Choose a firm, level surface free of sharp objects, debris, or loose soil.
- Ensure the area is large enough to accommodate the pool dimensions (488 x 244 cm) plus additional space for

access and maintenance.

- Avoid placing the pool under overhead power lines or near trees that may drop leaves or debris.
- Consider drainage for overflow water.

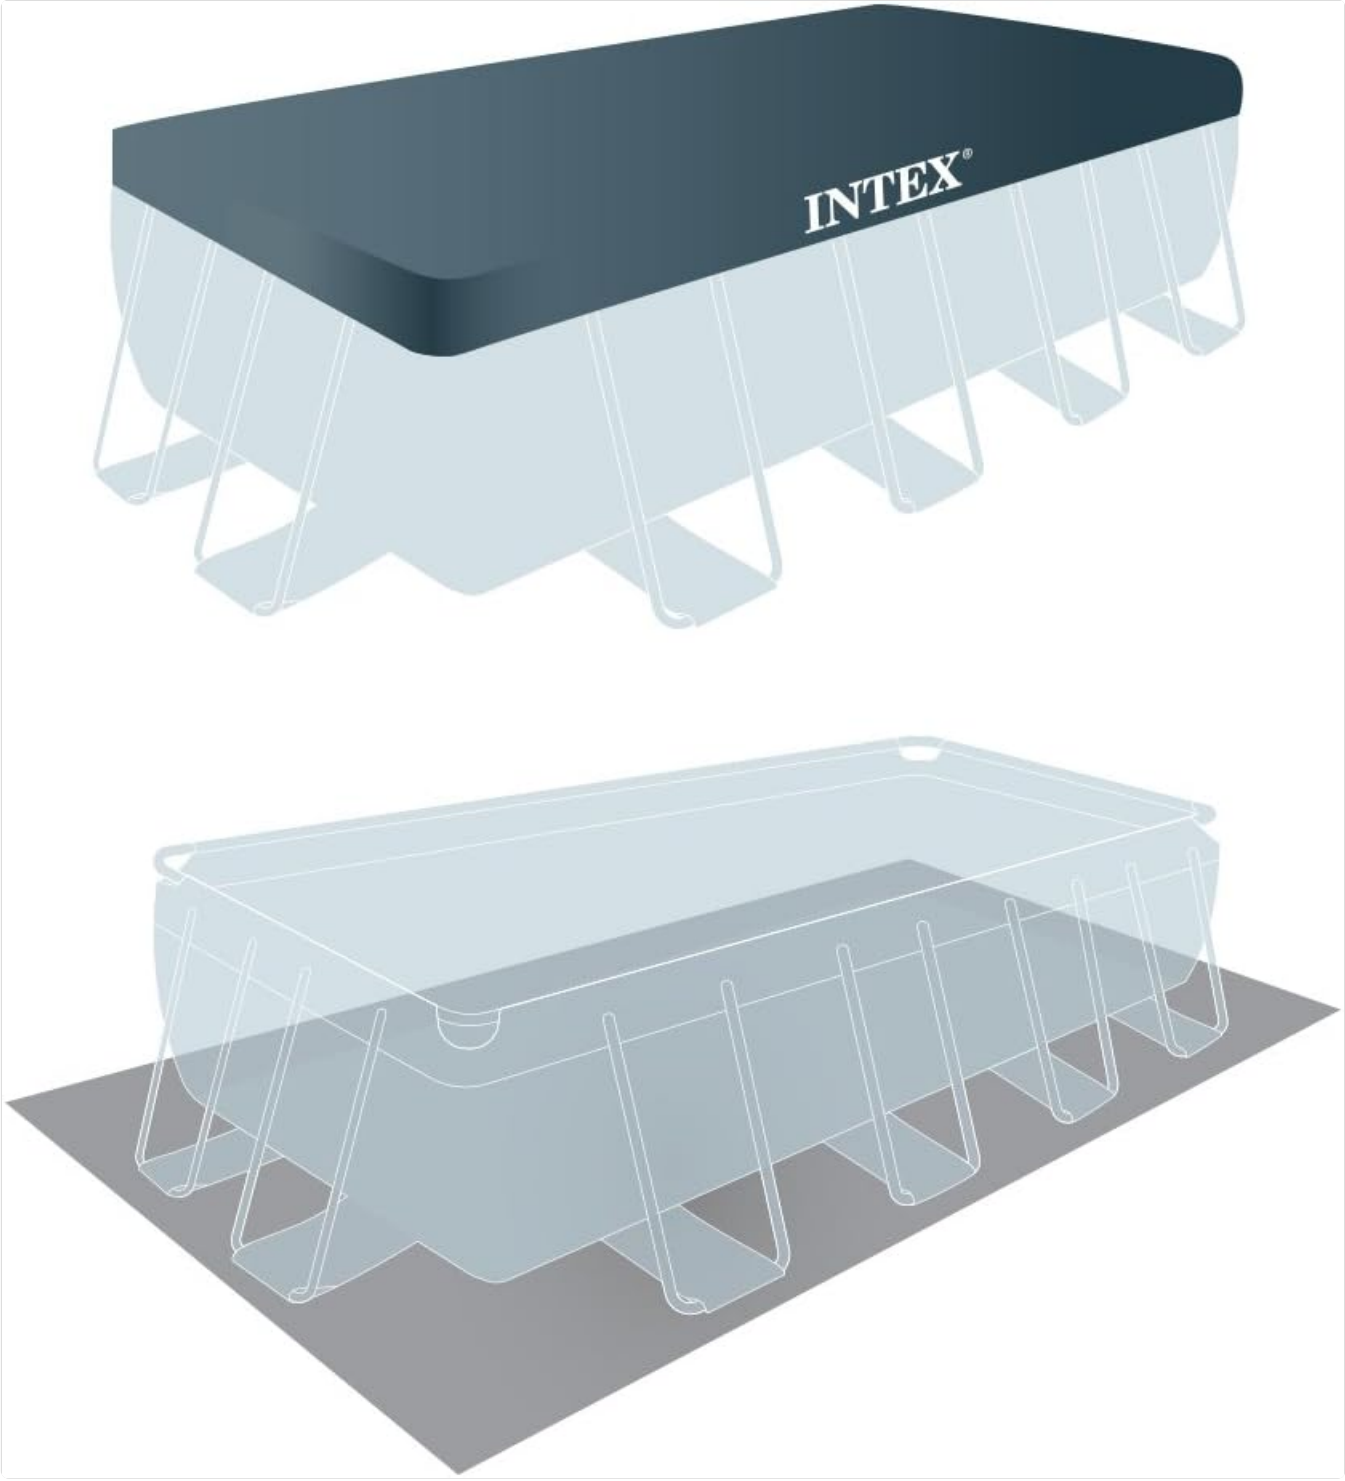

Image: Diagram illustrating the use of a ground cloth beneath the pool for protection and the pool cover for cleanliness.

2. Pool Assembly

1. Unpack all components and verify against the parts list in your packaging.
2. Lay out the pool liner on the prepared ground cloth.
3. Assemble the metal frame components according to the included instructions, ensuring all connections are secure. The frame consists of horizontal beams and vertical supports.
4. Carefully insert the frame poles through the sleeves of the pool liner.

5. Connect the corner joints and T-joints to complete the frame structure.
6. Ensure the liner is evenly spread and wrinkle-free at the bottom before filling.

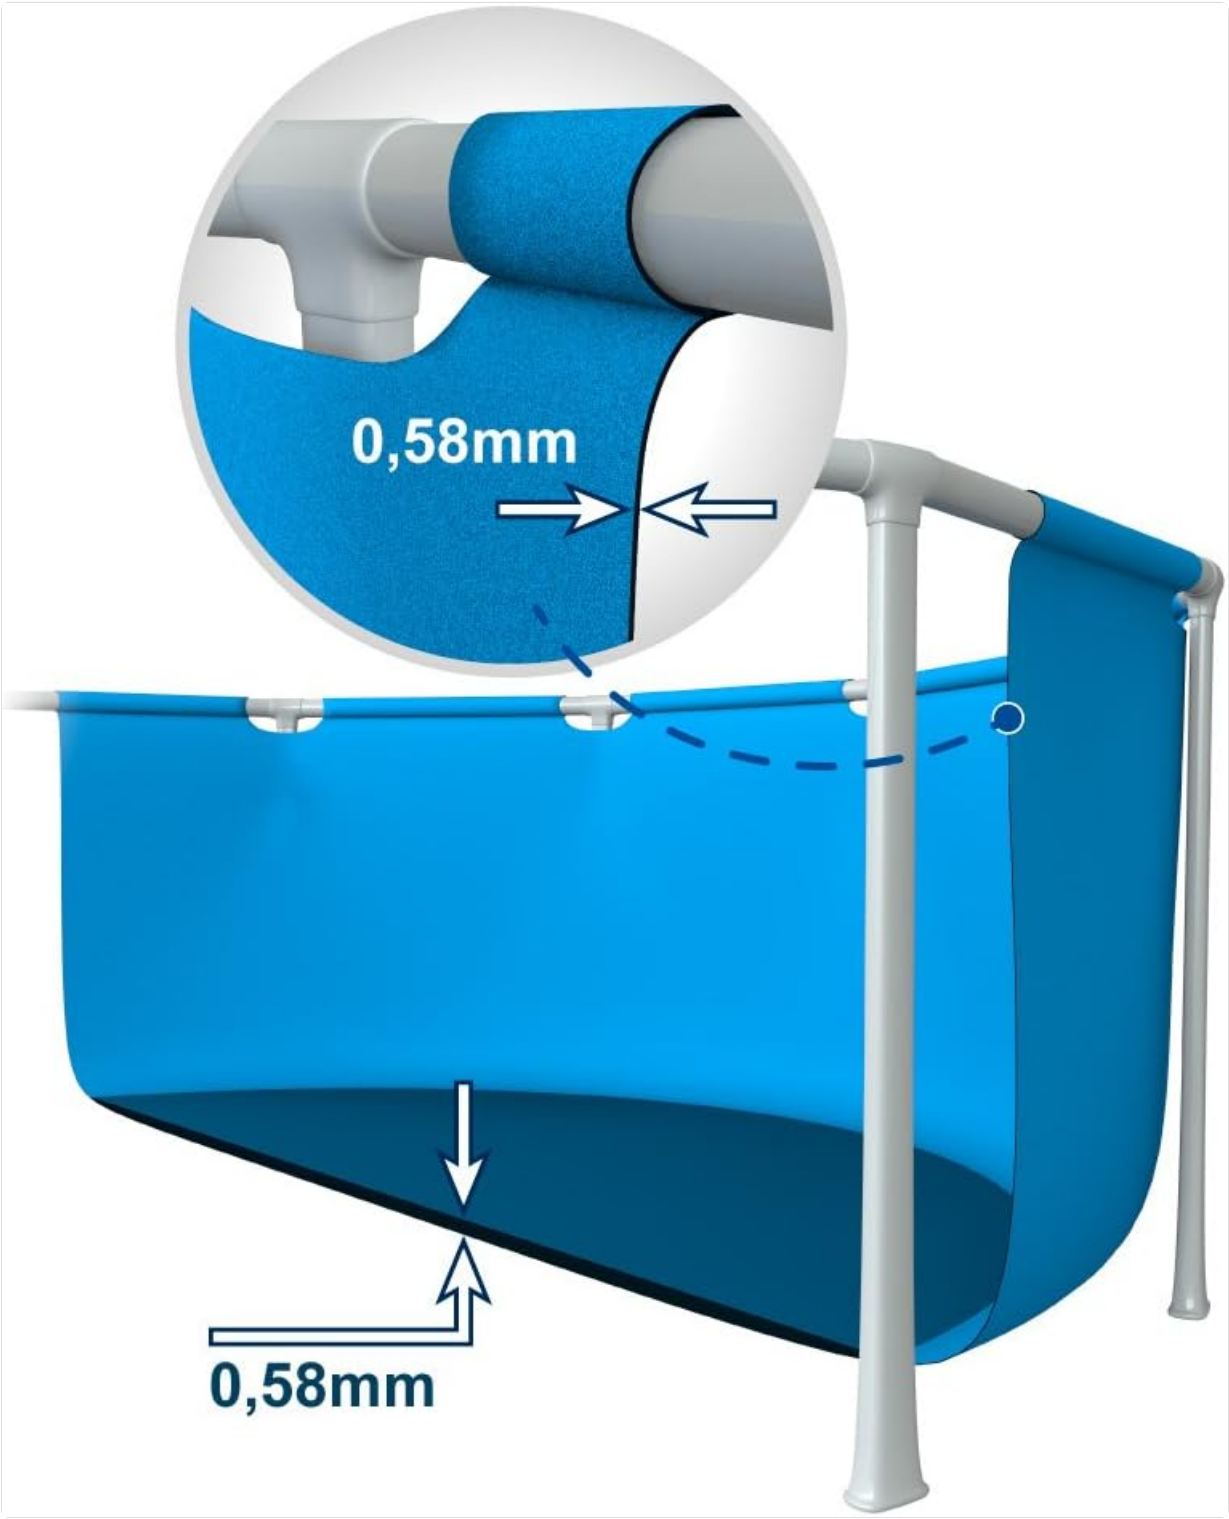

Image: A close-up diagram illustrating the thickness of the pool liner material (0.58mm), highlighting its durability.

3. Ladder Assembly

Assemble the ladder following the separate instructions provided with the ladder. Ensure it is stable and securely placed before use.

Operating Instructions

Filling the Pool

1. Before filling, ensure all drain plugs are securely closed.
2. Begin filling the pool with water. As the water level rises, gently smooth out any wrinkles in the bottom of the liner, working from the center outwards.
3. Fill the pool to the recommended fill line, typically indicated on the liner or in the separate pump manual. The pool has a capacity of approximately 10,874 liters.

Filter Pump Operation

The included filter pump is essential for maintaining water clarity. Refer to the separate filter pump manual for detailed setup and operation instructions.

- Connect the filter pump hoses to the pool's inlet and outlet fittings.
- Ensure the pump is placed on a stable, level surface away from the pool.
- Plug the pump into a grounded electrical outlet with a Residual Current Device (RCD).
- Operate the pump for several hours daily to circulate and filter the water.

Maintenance

Regular maintenance is key to keeping your pool clean and safe.

Water Chemistry

- Test pool water regularly (daily or every other day) for pH, chlorine, and alkalinity levels.
- Maintain pH between 7.2 and 7.6.
- Maintain free chlorine levels between 1-3 ppm.
- Add appropriate pool chemicals as needed, following product instructions.

Cleaning

- Skim debris from the water surface daily using a pool skimmer.
- Vacuum the pool bottom as needed to remove settled dirt and debris.
- Brush the pool walls and floor to prevent algae growth.
- Clean or replace the filter cartridge regularly (e.g., every 2 weeks or more frequently depending on usage).

Winterization / Storage

- Completely drain the pool at the end of the swimming season.
- Clean and thoroughly dry all pool components (liner, frame, pump, ladder).
- Store all parts in a dry, protected area, away from extreme temperatures and pests.

Troubleshooting

Problem	Possible Cause	Solution
Cloudy Water	Insufficient filtration, improper chemical balance, high bather load.	Run filter longer, backwash/clean filter, test and adjust chemicals, shock treat pool.
Algae Growth	Low chlorine, high pH, poor circulation.	Shock treat with chlorine, brush pool walls, add algaecide, ensure proper filtration.
Water Leakage	Puncture in liner, loose hose connections, faulty drain plug.	Locate and patch liner, tighten hose clamps, check drain plug seal.
Pump Not Working	No power, clogged impeller, air lock.	Check power supply/RCD, clear impeller, prime pump. Refer to pump manual.

Specifications

Feature	Detail
Model Number	55043 (Product), 26778NP (Pool Set)
Dimensions (L x W x H)	488 cm x 244 cm x 107 cm (192 x 96 x 42 inches)
Water Capacity (90%)	10,874 Liters (2,873 Gallons)
Material	Durable PVC Liner, Steel Frame
Color	Blue
Recommended Age	6 months and up (with adult supervision)
Included Accessories	Filter Pump, Ladder, Pool Cover, Ground Cloth (check packaging for exact contents)

Warranty and Support
