CARE AND MAINTENANCE

To maintain the finish and functionality of your Schlage door lever, regularly wipe it with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals, as these can damage the finish. Periodically check mounting screws for tightness and lubricate moving parts if necessary to ensure smooth operation. Proper care will help preserve the aesthetic appeal and extend the lifespan of your door hardware.

TROUBLESHOOTING

- **Stiff Lever Operation:** If the lever becomes stiff or difficult to operate, ensure all mounting screws are properly tightened and that the latch mechanism is clean and free of debris. Lubrication with a silicone-based spray can improve performance.
- **Key Difficult to Turn:** If the key is difficult to turn, check for obstructions in the keyway and consider using a graphite lubricant.
- **Persistent Issues:** For persistent issues that cannot be resolved with basic troubleshooting, refer to the full warranty information or contact Schlage customer support.
