Sainovo 4198

Sainovo Double-Wall Stainless Steel Insulated Ice Bucket Instruction Manual

Model: 4198

1. PRODUCT OVERVIEW

The Sainovo Double-Wall Stainless Steel Insulated Ice Bucket is designed to keep ice cold for extended periods, making it ideal for various occasions. This 1.2-liter container features a robust stainless steel construction, double-wall insulation, a fitted lid, and convenient ice tongs for easy serving.

2. KEY FEATURES

- **Premium Quality Materials:** Constructed from stainless steel with chrome surface craftsmanship, ensuring durability and resistance to tarnishing.
- **Modern Double-Wall Insulation:** Designed to keep ice cold for hours and prevent external condensation, maintaining the temperature of beverages and fruits.
- **Compact 1.2L Capacity:** Conveniently sized for portability, capable of holding a large bottle or one to two smaller bottles, depending on ice volume. Suitable for home use, barbecues, picnics, parties, bars, clubs, restaurants, and outdoor activities.
- **Integrated Ice Tongs & Handle:** Equipped with a solid lid, an adjustable handle for easy transport, and tongs that can be stored securely within the lid when not in use.
- **Easy To Clean:** Dishwasher safe for hassle-free cleaning.

3. SETUP

1. **Unpack:** Carefully remove all components from the packaging, including the ice bucket, lid, and ice tongs.
2. **Initial Cleaning:** Before first use, wash the ice bucket, lid, and tongs with warm, soapy water. Rinse thoroughly and dry completely to ensure hygiene. The bucket is dishwasher safe.
3. **Assembly:** Place the lid securely on top of the bucket. The tongs can be stored in the designated slot on the lid for convenience.

4. OPERATING INSTRUCTIONS

1. **Filling with Ice:** Open the lid and fill the bucket with ice cubes. The double-wall insulation will help maintain the ice temperature for an extended period.
2. **Using the Tongs:** Retrieve the ice tongs from their storage slot in the lid. Use the tongs to safely and hygienically transfer ice cubes to drinks.
3. **Maintaining Temperature:** For optimal insulation, ensure the lid is securely placed on the bucket when not actively serving ice. This minimizes exposure to ambient air and helps keep the ice frozen longer.

4. **Versatile Use:** The ice bucket is suitable for chilling various items beyond ice, such as wine, champagne, other beverages, and even small fruits or vegetables to keep them cool.

5. MAINTENANCE AND CARE

- **Cleaning:** The Sailnovo Ice Bucket is dishwasher safe. For hand washing, use warm water with a mild

detergent and a soft cloth or sponge. Rinse thoroughly to remove all soap residue.

- **Drying:** Dry all components completely after washing to prevent water spots and maintain the stainless steel's luster.
- **Storage:** Store the ice bucket in a clean, dry place when not in use. Ensure the tongs are stored in their designated slot in the lid.
- **Avoid Abrasives:** Do not use abrasive cleaners or scouring pads, as these can scratch the stainless steel surface.

6. TROUBLESHOOTING

- **Ice Melting Too Quickly:** Ensure the lid is securely placed on the bucket when not in use. The double-wall insulation is effective, but prolonged exposure to warm air will accelerate ice melt. Pre-chilling the bucket with a small amount of ice for a few minutes before filling can also improve retention.
- **External Condensation:** The double-wall insulation is designed to prevent external condensation. If condensation occurs, verify that the lid is properly sealed and that the bucket has not been exposed to extreme temperature differences for an extended period.

7. SPECIFICATIONS

Attribute	Detail
Model Number	4198
Capacity	1.2 Liters (approx.)
Material	Stainless Steel
Insulation Type	Double-Wall
Package Dimensions	7.44 x 6.57 x 6.5 inches
Item Weight	1.87 pounds
