2. SETUP AND DISPLAY

Your Funko Pop! figure comes pre-assembled and ready for display. Carefully remove the figure from its packaging. The packaging itself is often part of the collectible value, so consider retaining it for future storage or display.

- **Unboxing:** Gently open the box flaps and slide out the plastic insert containing the figure.
- **Placement:** Place your figure on a flat, stable surface. Ensure it is not in an area prone to being knocked over.
- **Environment:** For optimal preservation, display the figure in a cool, dry place away from direct sunlight, extreme temperatures, and high humidity.

3. OPERATING THE GLOW FEATURE

The Ahsoka Tano figure features a glow-in-the-dark finish. To activate this feature:

1. **Light Exposure:** Expose the figure to a strong light source for a period of time. Natural sunlight or a bright artificial light (like a desk lamp or UV light) are effective.
2. **Charging Time:** The duration of light exposure will affect the intensity and duration of the glow. Typically, 5-10 minutes under bright light is sufficient for a noticeable glow.
3. **Darkness:** Once charged, move the figure to a dark environment to observe the glow effect.

4. MAINTENANCE AND CARE

Proper care will help maintain the condition and appearance of your Funko Pop! figure.

- **Cleaning:** Dust the figure regularly with a soft, dry cloth or a soft-bristled brush. For stubborn dirt, lightly dampen a cloth with water and gently wipe the surface, then dry immediately. Avoid abrasive cleaners or harsh chemicals.
- **Handling:** Handle the figure by its base or body to avoid damaging smaller parts or paintwork.
- **Storage:** If storing the figure, use its original packaging or a protective display case to prevent dust accumulation and physical damage.

5. TROUBLESHOOTING

If you encounter issues with your figure, refer to the following common troubleshooting tips:

Figure is not glowing or glow is faint:

- **Insufficient Light Exposure:** Ensure the figure has been exposed to a strong light source for an adequate period (e.g., 10-15 minutes under direct sunlight or a bright lamp).
- **Ambient Light:** Confirm the viewing environment is sufficiently dark. Even small amounts of ambient light can diminish the perceived glow.
- **UV Light:** For the strongest and quickest charge, consider using a UV (blacklight) flashlight.
