6.1 Cleaning the Dust Bin

The dust bin can be wiped clean with a damp cloth. Ensure it is completely dry before reattaching to the vacuum.

6.2 Washing Filters

Your Dyson Ball Animal 2 has washable filters. For best performance, wash filters at least once a month, or

more frequently with heavy use.

1. **Locate Filters:** Refer to your vacuum's specific diagram for filter locations (typically one pre-motor filter and one post-motor HEPA filter).
2. **Wash:** Rinse filters under cold running water until the water runs clear. Do not use detergents.
3. **Dry:** Allow filters to air dry completely for at least 24 hours before reinserting. Do not use a tumble dryer, microwave, or open flame to dry.

6.3 Clearing the Brush Bar

Periodically check the brush bar for tangled hair or debris. Turn off and unplug the vacuum before attempting to clear the brush bar. Use scissors to cut away any tangled hair, being careful not to damage the bristles.

7. TROUBLESHOOTING

If you encounter issues with your Dyson Ball Animal 2, refer to the following common solutions:

- **No Suction:** Check if the dust bin is full and empty it. Inspect the hose, wand, and cleaner head for blockages. Ensure filters are clean and dry.
- **Brush Bar Not Rotating:** Ensure the vacuum is reclined for floor cleaning. Check for blockages in the cleaner head or brush bar.
- **Unusual Noises:** Turn off and unplug the vacuum. Check for any foreign objects lodged in the cleaner head, hose, or dust bin.
- **Power Loss:** Check the power cord and plug for damage. Ensure the outlet is functional.
