## AA Ignition 22895545

# AA Ignition Power Window Switch User Manual

Model: 22895545

## PRODUCT OVERVIEW

---

This manual provides essential information for the installation, operation, and maintenance of your AA Ignition Power Window Switch. This switch is a direct replacement for the passenger front right, rear left, or rear right power window switch in various Buick, Chevy, and GMC vehicles. Please read this manual thoroughly before use to ensure proper function and longevity of the product.

## Key Features:

- **Replacement Power Window Switch:** Controls power windows, often located on the front right passenger side, rear right, or rear left.
- **Compatible Replacement:** Designed for various Chevrolet, Buick & GMC Vehicles, including 2007-2013 Avalanche, 2008-2011 HHR, 2007-2013 Silverado 1500, 2500 HD, 3500 HD, 2007-2014 Suburban 1500, 2007-2013 Suburban 2500, 2007-2008 Acadia, 2007-2013 Sierra 1500, 2500 HD, 3500 HD, 2007-2013 Yukon, Yukon XL 1500, 2500.
- **Replaces Part Numbers:** Directly replaces OEM part numbers 22895545, 901-149, 15888174, and Dorman 901149.
- **OEM Fit, Quality, Finish:** Manufactured to the same specifications as the factory window switch, featuring a redesigned housing and button for enhanced durability.
- **Lifetime Warranty:** Comes with a comprehensive Lifetime Warranty, ensuring long-term reliability and customer

support.

## SETUP AND INSTALLATION

---

The AA Ignition Power Window Switch is designed for straightforward, hassle-free installation. It directly plugs into your vehicle's existing wiring harness, making it a direct replacement for the factory part. Installation can typically be completed in minutes.

### Installation Steps:

1. **Safety First:** Before beginning any automotive repair, ensure your vehicle's ignition is off and the battery is disconnected to prevent electrical shorts or injury.
2. **Locate the Existing Switch:** Identify the power window switch that needs replacement. This is typically located on the passenger side front door, or rear left/right doors, depending on the specific vehicle and switch being replaced.
3. **Remove Trim Panel (if necessary):** Carefully remove any interior trim panels that obstruct access to the switch. Use appropriate trim removal tools to avoid damaging the interior.
4. **Disconnect Wiring Harness:** Once the switch is accessible, gently disconnect the electrical wiring harness from the old switch. There is usually a tab or clip that needs to be pressed to release the connector.
5. **Remove Old Switch:** Unclip or unscrew the old switch from its mounting location.
6. **Install New Switch:** Connect the vehicle's wiring harness to the new AA Ignition Power Window Switch. Ensure the connection is secure and clicks into place.
7. **Mount New Switch:** Secure the new switch into its designated mounting location.
8. **Reinstall Trim Panel:** Carefully reattach any removed trim panels.
9. **Reconnect Battery:** Reconnect your vehicle's battery.
10. **Test Functionality:** Turn on the vehicle's ignition and test the operation of the newly installed power window switch to ensure it functions correctly.

## OPERATING INSTRUCTIONS

---

The AA Ignition Power Window Switch operates identically to your vehicle's original equipment manufacturer (OEM) switch. It is designed for intuitive control of your vehicle's power windows.

### Basic Operation:

- **Window Up:** Gently pull the switch button upwards to raise the corresponding window.
- **Window Down:** Gently press the switch button downwards to lower the corresponding window.
- **Momentary Action:** The switch is designed for momentary action, meaning the window will move only while the button is held. Release the button to stop the window at any desired position.

Ensure the vehicle's ignition is in the "ON" or "ACC" position for the power windows to function.

## MAINTENANCE

---

The AA Ignition Power Window Switch is constructed with durable materials designed for long-term performance and requires minimal maintenance. Following these simple guidelines can help ensure its longevity:

- **Keep Clean:** Periodically wipe the surface of the switch with a soft, damp cloth to remove dust and grime. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish or internal components.
- **Avoid Liquid Spills:** Prevent liquids from spilling onto or into the switch, as this can cause electrical malfunctions.
- **Gentle Operation:** Operate the switch with gentle, firm presses. Avoid excessive force, which is unnecessary and could potentially stress the internal mechanisms over time.
- **Inspect Connections:** If you experience intermittent issues, ensure the electrical connector remains securely plugged into the switch.

## TROUBLESHOOTING

---

If you encounter issues with your power window operation after installing the AA Ignition Power Window Switch, consider the following troubleshooting steps:

- **Window Does Not Operate:**

- Ensure the vehicle's ignition is on.
- Check the fuse for the power windows in your vehicle's fuse box. Refer to your vehicle's owner's manual for fuse location and replacement instructions.
- Verify that the electrical connector to the switch is fully seated and secure.
- If only one window is affected, the issue might be with the window motor or wiring to that specific window, not necessarily the switch itself.

- **Window Operates Intermittently:**

- Check for loose connections at the switch or within the door panel.
- Inspect the wiring for any visible damage or corrosion.

- **Switch Feels Loose or Sticky:**

- Ensure the switch is properly clipped or screwed into its mounting location within the door panel.
- Clean around the button with a soft, dry brush to remove any debris that might be causing stickiness.

If troubleshooting steps do not resolve the issue, it is recommended to consult a qualified automotive technician or contact AA Ignition customer support.

## PRODUCT SPECIFICATIONS

---

Attribute	Detail
Brand	AA Ignition
Model Number	22895545
Replaces Part Numbers	22895545, 901-149, 15888174
Operation Mode	ON-NONE-ON
Contact Type	Normally Open
Connector Type	Plug In
Terminal Type	Blade
Circuit Type	1-way
Actuator Type	Push Button
Contact Material	Copper, Brass, Stainless Steel
International Protection Rating	IP00
Number of Positions	1
Package Dimensions	3.78 x 3.58 x 2.24 inches
Item Weight	1 Pound
Date First Available	October 31, 2017
