Introduction

This user manual provides essential information for the proper use and maintenance of your Ariete Removable Permanent Filter. Please read this manual carefully before first use and keep it for future reference.
The Ariete permanent filter is designed as a direct replacement or spare part for compatible Ariete Vintage 1342 coffee machines, ensuring optimal coffee brewing without the need for disposable paper filters.

Product Overview

Figure 1: Ariete Removable Permanent Filter. This image shows the black plastic frame of the filter with the fine mesh material forming the basket. The filter is designed to hold ground coffee for brewing.

The Ariete permanent filter is a durable, reusable coffee filter made of a fine mesh material within a sturdy plastic frame. It is designed to fit perfectly into the filter basket of compatible Ariete coffee machines.

Setup

1. **Unpack:** Carefully remove the permanent filter from its packaging.
2. **Initial Cleaning:** Before first use, wash the filter thoroughly with warm water and a mild dish soap. Rinse well to remove any residue.
3. **Placement:** Ensure your coffee machine's filter basket is clean and empty. Place the permanent filter securely into the designated filter basket of your Ariete Vintage 1342 coffee machine. It should sit flush and stable.

Operating Instructions

1. **Add Coffee Grounds:** Spoon the desired amount of ground coffee into the permanent filter. Ensure the coffee grounds are evenly distributed. Do not overfill, as this can lead to overflow during brewing.
2. **Brew Coffee:** Proceed with brewing coffee according to your Ariete Vintage 1342 coffee machine's specific operating instructions.
3. **After Brewing:** Once brewing is complete and the coffee has cooled slightly, carefully remove the filter basket from the coffee machine.

Maintenance and Cleaning

Regular cleaning of your permanent filter is crucial for maintaining coffee quality and filter longevity.

- **Daily Cleaning:** After each use, discard the used coffee grounds. Rinse the filter thoroughly under running warm water to remove all coffee residue. You may use a soft brush to gently scrub the mesh if necessary.
- **Deep Cleaning (Weekly/Bi-weekly):** For a more thorough clean, soak the filter in a solution of warm water and white vinegar (1 part vinegar to 2 parts water) for about 30 minutes. This helps remove coffee oils and prevent clogging. Rinse thoroughly afterwards.
- **Dishwasher Safe:** The filter is generally dishwasher safe (top rack recommended), but hand washing is preferred for extending its lifespan.
- **Drying:** Allow the filter to air dry completely before storing or reusing.

Caution:

- Do not use abrasive cleaners or scouring pads, as these can damage the mesh.
- Ensure the filter is completely clean before next use to prevent stale coffee taste.
