

KAFF NE4B60SS

KAFF NE4B60SS 4 Burner Built-In Gas Hob User Manual

Model: NE4B60SS

1. INTRODUCTION

This manual provides essential information for the safe and efficient use of your KAFF NE4B60SS 4 Burner Built-In Gas Hob. Please read these instructions carefully before installation and operation, and retain them for future reference.

2. SAFETY INFORMATION

WARNING: Improper installation, adjustment, alteration, service, or maintenance can cause injury or property damage. Refer to this manual. For assistance or additional information, consult a qualified installer, service agency, or the gas supplier.

- Ensure proper ventilation in the kitchen area.
- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- Never use the appliance as a space heater.
- Keep children away from the appliance during operation.
- Always use appropriate cookware.
- Do not leave the appliance unattended during operation.
- In case of a gas leak, immediately turn off the gas supply, open windows, and do not operate any electrical switches. Contact your gas supplier.

3. PRODUCT OVERVIEW

The KAFF NE4B60SS is a 60 cm built-in gas hob featuring four high-efficiency burners and auto electric ignition, designed for modern kitchens.

4. SETUP AND INSTALLATION

The KAFF NE4B60SS is a built-in hob designed for integration into a modular kitchen countertop. Professional installation by a qualified technician is highly recommended to ensure safety and proper functioning.

Installation Requirements:

- **Cut-out Dimensions:** Refer to the detailed diagram for precise countertop cut-out measurements.
- **Gas Supply:** Connect to a suitable gas supply line by a certified professional.
- **Electrical Connection:** Requires a 240 Volt electrical connection for the auto electric ignition.
- **Ventilation:** Ensure adequate ventilation in the kitchen area as per local regulations.

5. OPERATING INSTRUCTIONS

Igniting a Burner:

1. Ensure the gas supply to the hob is open.
2. Place appropriate cookware on the pan support over the desired burner.
3. Push down the corresponding control knob and turn it counter-clockwise to the maximum flame position (large flame symbol).
4. The auto electric ignition will click, and the burner will ignite. Hold the knob down for a few seconds after ignition to allow the thermocouple to heat up and activate the flame failure device.
5. Once the burner is lit, release the knob. If the flame extinguishes, repeat the process.

Adjusting the Flame:

After ignition, you can adjust the flame intensity by rotating the control knob between the maximum and minimum flame positions (large and small flame symbols). Do not set the flame below the minimum position,

as it may extinguish.

304 Grade Stainless Steel Finish

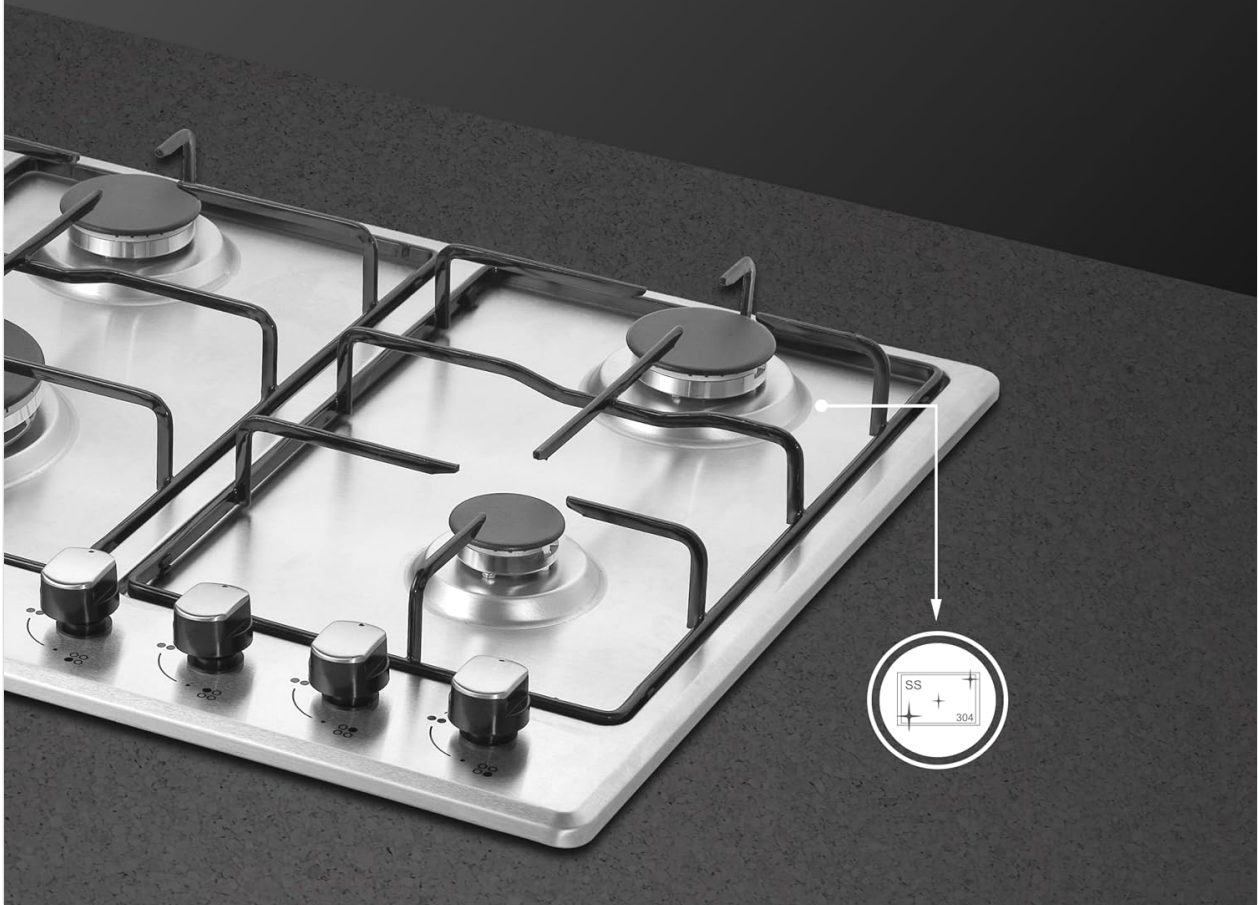

Figure 5: Close-up of the easy-grip metal control knobs on the KAFF NE4B60SS hob, used for ignition and flame adjustment.

Turning Off a Burner:

Turn the control knob clockwise until it clicks back to the OFF position (dot symbol).

6. MAINTENANCE AND CLEANING

Regular cleaning and maintenance will ensure the longevity and optimal performance of your hob. Always ensure the hob is cool and the gas supply is turned off before cleaning.

Cleaning the Stainless Steel Surface:

- Use a soft cloth or sponge with mild detergent and warm water.
- Avoid abrasive cleaners, scouring pads, or harsh chemicals, as these can scratch or damage the stainless steel finish.
- Wipe dry immediately after cleaning to prevent water spots.

Cleaning Burners and Pan Supports:

- Remove the pan supports and burner components (burner caps and crowns) when cool.
- Wash them with warm soapy water. For stubborn stains, a non-abrasive cleaner can be used.
- Ensure all components are completely dry before reassembling them. Blocked burner holes can affect flame quality.
- Properly align burner caps and crowns during reassembly to ensure correct flame distribution.

7. TROUBLESHOOTING

Before contacting customer service, please refer to the following troubleshooting guide for common issues:

Problem	Possible Cause	Solution
Burner does not ignite.	No gas supply, power outage, clogged burner holes, wet burner components.	Check gas valve. Verify power supply. Clean burner holes. Ensure burner components are dry and correctly assembled.
Flame is uneven or yellow.	Clogged burner holes, incorrect burner cap placement.	Clean burner holes. Ensure burner caps are correctly seated.
Gas smell detected.	Gas leak.	Immediately turn off gas supply, open windows, do not operate electrical switches, and contact a qualified technician or gas supplier.
Knob is stiff or difficult to turn.	Food debris or residue under the knob.	Ensure the hob is cool. Carefully remove the knob and clean the area underneath.

If the problem persists after attempting these solutions, please contact KAFF customer support.

8. SPECIFICATIONS

Brand	KAFF
Model Number	NE4B60SS
Heating Elements	4 (1 Triple Ring, 2 Dual Ring, 1 Mini Burner)
Colour	Stainless Steel
Power Source	Gas Powered
Fuel Type	Gas
Special Features	Auto Electric Ignition, Easy Grip Control Knobs, Premium 304 Grade Stainless Steel Body

Ignition System Type	Auto Electric Ignition
Control Type	Knob
