# BUNN 12-Cup Commercial Coffee Filters Instruction Manual

## INTRODUCTION

---

This manual provides instructions for the proper use and care of BUNN 12-Cup Commercial Coffee Filters. These filters are designed for commercial and home coffee brewing systems requiring a basket-style filter, ensuring a clean and consistent brew.

## SETUP

---

### Unpacking

The BUNN 12-Cup Commercial Coffee Filters come in a pack of 250. Carefully remove the filters from their packaging, ensuring they remain stacked and undamaged. Store them in a dry place to maintain their integrity.

## OPERATING INSTRUCTIONS

---

## Inserting the Filter

Place one BUNN 12-Cup Commercial Coffee Filter into the filter basket of your compatible coffee brewing machine. Ensure the filter is fully seated and its sides extend upwards to prevent coffee grounds from overflowing during brewing. The filter's design helps maintain its shape during the brewing process.

## Adding Coffee Grounds

Add the desired amount of coffee grounds into the filter. Distribute the grounds evenly within the filter for optimal extraction and flavor.

## Brewing

Proceed with your coffee machine's standard brewing cycle. The filter is designed to allow efficient water flow while effectively retaining coffee grounds, ensuring a clear and sediment-free cup of coffee.

## MAINTENANCE AND DISPOSAL

---

### Disposal After Use

After brewing is complete and the coffee grounds have cooled, carefully remove the filter from the coffee machine's basket. Dispose of the used filter and coffee grounds in accordance with local waste disposal guidelines. These filters are made from paper and are biodegradable.

## **TROUBLESHOOTING**

---

### **Grounds in Coffee**

If you find coffee grounds in your brewed coffee, ensure the filter is properly seated in the filter basket and that its sides are not folded over, which could allow grounds to bypass the filter. Also, verify that the coffee maker's water delivery head does not dislodge the filter during brewing.

Slow Drip or Clogging

Ensure you are using the correct grind size for your coffee maker. Very fine grinds can sometimes impede water flow through the filter. If the issue persists, check your coffee maker for any blockages or mineral buildup.

SPECIFICATIONS

Feature	Detail
Brand	BUNN
Model Number	BUNBCF250
Material	Paper
Shape	Basket
Unit Count	250 Count

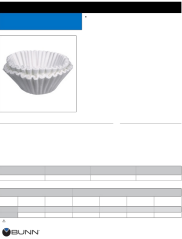

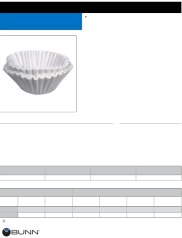

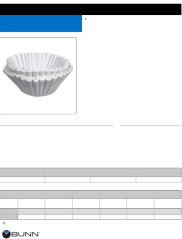

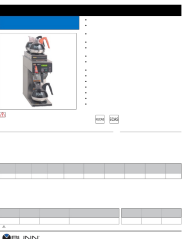

Coffee Filter Size	#6
Product Dimensions	8 x 8 x 6 inches
Item Weight	16.98 pounds
Global Trade Identification Number (GTIN)	00072504005256
