4. SETUP

1. **Unpack:** Carefully remove all components from the packaging. Retain packaging for storage or future transport.
2. **Clean:** Before first use, clean the detachable blender shaft and blade assembly according to the 'Cleaning and Maintenance' section. Wipe the motor unit with a damp cloth.
3. **Assemble:** Align the blender shaft with the motor unit and twist until it locks securely into place. Ensure it is firmly attached before use.
4. **Position:** Place the blender in a stable, dry location, away from heat sources and water.

5. OPERATING INSTRUCTIONS

Follow these steps for safe and effective blending:

1. **Prepare Ingredients:** Cut solid ingredients into small pieces (approximately 2-3 cm) to facilitate blending. For best results, ensure there is sufficient liquid in your mixture.
2. **Attach Shaft:** Ensure the blender shaft is securely attached to the motor unit.
3. **Immerse Blender:** Place the blender shaft into the ingredients in a suitable container (e.g., a tall beaker or pot). Ensure the blade guard is fully submerged to prevent splashing.
4. **Connect Power:** Plug the appliance into a suitable power outlet.
5. **Select Speed:** Use the variable speed control on the top of the motor unit to select your desired blending speed. Start with a lower speed for delicate ingredients and increase as needed. The LED lighting will indicate the selected speed.
6. **Start Blending:** Press and hold the power button to begin blending. Move the blender gently up and down and in circles to ensure all ingredients are processed evenly.
7. **Stop Blending:** Release the power button to stop the appliance.
8. **Unplug:** After use, always unplug the blender from the power outlet before removing the shaft or cleaning.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures optimal performance and extends the life of your WMF Kult X Stick Blender.

1. **Unplug:** Always unplug the appliance from the power supply before cleaning.
2. **Detach Shaft:** Twist and pull the blender shaft to detach it from the motor unit.
3. **Clean Blender Shaft:** Rinse the blender shaft and blade assembly under running water immediately after use. For thorough cleaning, you can wash it with warm soapy water using a brush to safely clean around the blades. **Caution: The blades are extremely sharp.**

4. **Dishwasher Safety:** The blender shaft is **not dishwasher safe**. Hand wash only.
5. **Clean Motor Unit:** Wipe the motor unit with a damp cloth. Never immerse the motor unit in water or any other liquid. Do not use abrasive cleaners or scouring pads.
6. **Dry:** Ensure all parts are completely dry before reassembling or storing.
7. **Storage:** Store the blender in a dry place, out of reach of children.

7. TROUBLESHOOTING

If you encounter issues with your WMF Kult X Stick Blender, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Blender does not turn on.	Not plugged in; power outlet fault; motor unit not properly connected to shaft.	Check power cord connection; test outlet with another appliance; ensure blender shaft is securely locked to motor unit.
Blades are not rotating or rotating slowly.	Ingredients are too large or too dense; too little liquid; shaft not properly attached.	Cut ingredients into smaller pieces; add more liquid; ensure shaft is securely locked. Do not overload.
Appliance stops during operation.	Overheating due to prolonged use or overload.	Unplug the blender and let it cool down for at least 30 minutes. Reduce blending time and ingredient load.
Excessive splashing.	Blades not fully submerged; container too wide.	Ensure blade guard is fully immersed in ingredients. Use a narrower, taller container.

If the problem persists after trying these solutions, please contact WMF customer support.
