Key Features:

- **Programmable 7 Buttons:** Supports macro editing for customized commands, including a dedicated Rapid Fire button.
- **Adjustable DPI:** 5 DPI levels (1200 to 3200 DPI) for on-the-fly sensitivity adjustments.
- **LED Backlighting:** Features 4 LED color options with adjustable modes (slow, fast, static, off).
- **Ergonomic Design:** Comfortable claw-grip design for extended gaming sessions.
- **Durable Build:** Buttons with a 5 million click lifespan for long-lasting performance.

1. Connecting the Mouse

Connect the USB cable of the Hcman T60 Gaming Mouse to an available USB port on your PC or Mac. The mouse is plug-and-play, and basic functionality will be available immediately.

2. Software Installation (Optional, for full customization)

To unlock the full potential of your Hcman T60 mouse, including macro programming and advanced LED settings, you will need to install the Hcman Gaming Software. The software can typically be found on the official Hcman website or via the link provided in the product packaging. Follow the on-screen instructions for installation.

Note: Some users have reported difficulty finding the correct software download link. Please refer to the official Hcman support page or the link provided with your product for the most up-to-date software.

3. Initial Configuration

After installing the software, launch it to configure your mouse. You can adjust DPI levels, assign macros to the 7 buttons, and customize the LED lighting effects.

Your browser does not support the video tag.

OPERATING INSTRUCTIONS

1. Adjusting DPI Settings

The Hcman T60 mouse offers 5 adjustable DPI levels (1200, 1600, 2000, 2400, 3200). You can cycle through these settings using the dedicated DPI button located below the scroll wheel. Each DPI level is indicated by a different LED color, allowing for quick visual identification of your current sensitivity.

Strong Durability

3. LED Backlight Control

The LED backlighting can be customized through the Hcman Gaming Software. You can choose from 4 different LED color options and various lighting modes (slow, fast, static, or off) to match your setup or mood.

4. Ergonomics and Grip

The T60 mouse is designed for a comfortable claw-grip, reducing fatigue during prolonged use. Its shape and weight are optimized for a balanced feel, enhancing control and precision.

CARE AND MAINTENANCE

1. Cleaning

To maintain optimal performance and appearance, regularly clean your mouse. Use a soft, dry cloth to wipe down the surface. For stubborn dirt, a slightly damp cloth can be used, but ensure no moisture enters the internal components. Avoid harsh chemicals or abrasive materials.

2. Storage

When not in use, store the mouse in a clean, dry environment away from extreme temperatures and direct sunlight. Avoid placing heavy objects on the mouse or its cable to prevent damage.

The T60 gaming mouse is built for durability, with buttons rated for a 5 million click lifespan, ensuring reliable performance over time.

TROUBLESHOOTING COMMON ISSUES

- **Mouse Not Responding:**
 - Ensure the USB cable is securely plugged into a working USB port.
 - Try connecting the mouse to a different USB port or another computer to rule out port or system issues.
 - Restart your computer.
- **Software Installation Problems:**
 - Verify you are downloading the correct software version for your operating system from the official Hcman website.
 - Temporarily disable antivirus or firewall software during installation if you encounter issues.
- **Programmable Buttons Not Working in Games:**
 - Ensure the Hcman Gaming Software is running in the background or that your profiles are saved to the mouse's onboard memory (if applicable).
 - Check in-game keybinding settings to ensure there are no conflicts with the mouse's programmed functions.
 - Some games may not fully support all programmable buttons or require specific configurations.
- **LED Lights Not Functioning Correctly:**
 - Open the Hcman Gaming Software and navigate to the LED settings. Ensure the desired lighting mode and color are selected.
 - If the lights are off, check if the "Off" mode is selected in the software.
- **Mouse Tracking Issues (Jittery/Inaccurate):**
 - Clean the optical sensor on the bottom of the mouse with a soft, dry cloth.
 - Ensure you are using the mouse on a clean, uniform surface or a quality mouse pad.
 - Adjust the DPI settings to a lower level if the cursor movement is too erratic.

TECHNICAL SPECIFICATIONS

Feature	Specification
