MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the life of your kettle.

- **Before Cleaning:** Always unplug the kettle from the power outlet and allow it to cool completely before cleaning.
- **Exterior Cleaning:** Wipe the exterior of the kettle with a soft, damp cloth. Do not use abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Interior Cleaning:** The kettle features a concealed heating element, which simplifies cleaning. For general cleaning, rinse the interior with water.
- **Limescale Filter:** The removable limescale filter located in the pouring spout should be cleaned regularly. Remove the filter and rinse it under running water. For stubborn deposits, gently brush it with a soft brush. Ensure the filter is properly reinserted before use.
- **Descaling:** Over time, mineral deposits (limescale) may build up inside the kettle, especially in hard water areas. To descale, use a commercial descaling solution suitable for kettles, following the product instructions. Alternatively, a solution of white vinegar and water (1:2 ratio) can be used. Boil the solution, let it stand for an hour, then rinse thoroughly several times.
