IMPORTANT SAFETY INSTRUCTIONS

Always follow basic safety precautions when using electrical tools to reduce the risk of fire, electric shock, and

personal injury.

- **Read all instructions:** Before operating the tool, read and understand all safety warnings and instructions.
- **Work area safety:** Keep your work area clean and well-lit. Cluttered or dark areas invite accidents.
- **Electrical safety:** Do not expose power tools to rain or wet conditions. Avoid body contact with earthed or grounded surfaces.
- **Personal safety:** Always wear eye protection. Use hearing protection when operating the tool for extended periods. Dress properly; avoid loose clothing or jewelry.
- **Tool use and care:** Do not force the power tool. Use the correct power tool for your application. Disconnect the plug from the power source before making any adjustments, changing accessories, or storing power tools.
- **Maintenance:** Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts, and any other condition that may affect the power tool's operation.

SETUP AND ACCESSORY INSTALLATION

Before operating the tool, ensure it is unplugged from the power source.

1. **Selecting the Right Accessory:** Choose the appropriate accessory (sanding pad, saw blade, or scraper) for your specific task.
2. **Attaching Accessories:**
 - Locate the accessory mounting bolt on the tool head.
 - Align the accessory with the mounting interface, ensuring it seats properly.

- Insert the mounting bolt and tighten it securely using the provided hex wrench. Ensure the accessory is firmly attached and does not wobble.

3. **Connecting to Power:** Once the accessory is securely attached, plug the tool into a standard electrical outlet.

OPERATING INSTRUCTIONS

Familiarize yourself with the tool's controls before beginning work.

1. **Power On/Off:** Locate the power switch on the tool body. Slide the switch to the "ON" position to start the tool and to the "OFF" position to stop it.
2. **Speed Control:** The tool features a variable speed control. Adjust the speed according to the material and task. Lower speeds are generally suitable for delicate work or softer materials, while higher speeds are for more aggressive material removal.
3. **Operation:**
 - Hold the tool firmly with both hands, utilizing the soft-grip handle for comfort and control.
 - Apply gentle, consistent pressure. Do not force the tool, as this can lead to overheating or damage.
 - For sanding, move the tool in a consistent pattern across the surface.
 - For cutting, allow the blade to do the work. Do not apply excessive side pressure.
 - For scraping, position the scraper blade at a low angle to the surface and push forward.
4. **Cool Down:** For prolonged use, allow the tool to cool periodically to prevent overheating.

MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your multi-tool.

- **Cleaning:** After each use, unplug the tool and clean the exterior with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.
- **Ventilation Openings:** Keep the ventilation openings clear of dust and debris to prevent overheating. Use

compressed air if necessary.

- **Accessory Inspection:** Regularly inspect accessories for wear and tear. Replace worn or damaged blades and sanding pads promptly to ensure efficient operation and safety.
- **Cord Inspection:** Check the power cord for any cuts, fraying, or damage. If damaged, have it repaired by a qualified technician.
- **Storage:** Store the tool in a dry, secure place, out of reach of children.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Tool does not start.	No power supply. Power switch is off.	Check if the tool is properly plugged into a working outlet. Ensure the power switch is in the "ON" position.
Tool overheats.	Blocked ventilation openings. Excessive continuous use. Forcing the tool.	Clean ventilation openings. Allow the tool to cool down periodically. Reduce pressure and let the tool work at its own pace.
Accessory wobbles or falls off.	Accessory not securely tightened. Incorrect accessory installation.	Ensure the mounting bolt is fully tightened with the hex wrench. Re-install the accessory, ensuring it is properly seated.
