The finished quilt provides a comfortable and personalized item, perfect for snuggling or as a decorative throw.

2. WHAT'S IN THE BOX

Carefully unpack all components from your Hatchimals Knot a Quilt kit. Ensure all items listed below are present:

- 48 x 9x9 inch (22.86 x 22.86 cm) 100% Polyester Fleece Squares
- 20 x 100% Polyester Die-Cut Adhesive Felt Pieces
- Easy-to-Follow Instruction Sheet

This image displays the back of the product packaging, illustrating the kit's contents, the easy knotting process, and the decorative adhesive patches. It serves as a visual guide to what is included and how the quilt is assembled.

3. SETUP

Before beginning assembly, prepare your workspace:

1. Choose a clean, flat, and spacious surface to lay out your fleece squares. A large table or a clean floor area is recommended.
2. Unpack all the fleece squares and adhesive felt pieces from their packaging.
3. Familiarize yourself with the pre-cut fringes on the edges of each fleece square, which are essential for the knotting process.

4. ASSEMBLY INSTRUCTIONS

Follow these steps to assemble your Hatchimals Knot a Quilt:

Step 1: Laying Out the Squares

1. Begin by arranging the 48 fleece squares on your prepared surface. You can experiment with different color combinations and patterns to create your unique design.
2. The finished quilt will measure approximately 150 x 99 cm (59 x 39 inches). Plan your layout accordingly.

Step 2: Knotting the Squares

1. Select two adjacent fleece squares that you wish to connect. Align their edges precisely.
2. Each square has pre-cut fringes along its perimeter. Take one fringe from the first square and a corresponding fringe from the adjacent square.
3. Tie these two fringes together using a secure double knot. Ensure the knot is firm but not so tight that it puckers the fabric.
4. Repeat this knotting process for all pairs of fringes along the shared edge of the two squares.
5. Continue connecting all squares in this manner, working row by row and then connecting the rows, until the entire quilt is fully assembled.

This close-up image demonstrates the simple, no-sew method of connecting the fleece squares. Users can see how to align the pre-cut fringes and tie them securely to form the quilt.

Step 3: Applying Adhesive Felt Pieces

1. Once your fleece quilt is completely assembled and all squares are securely knotted, you can proceed to decorate it with the 20 die-cut adhesive felt pieces.
2. Carefully peel the protective backing from each felt piece.
3. Press the adhesive side firmly onto the fleece quilt in your desired locations. These pieces are designed for decorative enhancement.

5. CARE AND MAINTENANCE

To preserve the quality and appearance of your Hatchimals Knot a Quilt, please adhere to the following care guidelines:

- **Cleaning:** The manufacturer advises against machine washing the blanket, particularly if the adhesive felt pieces have been applied. Machine washing may compromise the adhesive and cause the felt pieces to detach.
- **Spot Cleaning:** For minor spills or stains, gently spot clean the affected area using a damp cloth and a small amount of mild soap. Blot the area dry immediately with a clean towel.

- **Storage:** Store the quilt in a clean, dry environment, away from direct sunlight, to prevent potential fading of colors.
- **Adhesive Pieces:** If machine washing becomes absolutely necessary, consider hand-stitching the felt pieces onto the quilt beforehand to enhance their durability and prevent loss.

6. TROUBLESHOOTING

Should you encounter any issues during the assembly or use of your quilt, refer to the following common solutions:

- **Knots Coming Undone:** Ensure that all knots are tied securely with a double knot. If a knot loosens, simply re-tie it firmly.
- **Adhesive Pieces Detaching:** If the decorative felt pieces begin to peel, ensure the fleece surface was clean and dry before initial application. For a more permanent attachment, hand-stitching the pieces onto the quilt is recommended.
- **Missing Components:** In the event of any missing parts from your kit, please contact Spin Master customer support directly for assistance.
