

Oviitech LA

Oviitech Multi-Functional Wall Mount Outlet Surge Protector User Manual

Brand: Oviitech | Model: LA

INTRODUCTION

This manual provides essential information for the safe and efficient use of your Oviitech Multi-Functional Wall Mount Outlet Surge Protector. Please read these instructions carefully before use and retain for future reference.

IMPORTANT SAFETY INSTRUCTIONS

To ensure safe operation and prevent damage, please observe the following safety guidelines:

- Do not exceed the electrical ratings of the device (15A, 125VAC, 1875W).
- This device is intended for indoor use only.
- Do not use in wet environments or near water.
- Do not disassemble or modify the device.
- Keep out of reach of children.
- Ensure the wall outlet is properly grounded before plugging in the surge protector.

PRODUCT FEATURES

The Oviitech Multi-Functional Wall Mount Outlet Surge Protector is designed to expand your existing wall outlets and protect your electronic devices. Key features include:

- **4 AC Outlets:** Converts a single wall outlet into four standard AC outlets.
- **2 USB Charging Ports:** Provides 2.4A total output for charging mobile devices.
- **750 Joules Surge Protection:** Safeguards connected electronics from power surges and voltage fluctuations.
- **Red LED Surge Indicator:** Illuminates to confirm active surge protection and proper grounding.
- **EMI/RFI Line Noise Filtering:** Helps improve the performance of connected components by reducing electromagnetic and radio-frequency interference.
- **Compact Design:** Wall-mountable with an integrated stabilizing post for secure installation.

- **ETL/CETL Certified:** Ensures compliance with North American safety standards.

SPECIFICATIONS

Attribute	Value
Input Voltage	15A 125VAC, 60Hz
Max Wattage	1875W
USB Output	DC5V/2.4A (Total)
Surge Protection Rating	750 Joules
Certifications	ETL/CETL Listed
Dimensions (Approx.)	11.8 cm (Height) x 8 cm (Width) x 3.3 cm (Depth)

Material	Plastic
Color	White

SETUP AND INSTALLATION

Follow these steps to properly install your Oviitech Wall Mount Outlet:

1. **Locate a Wall Outlet:** Identify a standard, grounded 3-prong wall outlet where you wish to expand power access.
2. **Plug In the Device:** Align the prongs of the Oviitech surge protector with the wall outlet. Push firmly until the device is securely seated against the wall. The integrated stabilizing post helps ensure a snug fit.
3. **Verify Protection:** Once plugged in, the red "PROTECTED" LED indicator light on the front of the unit should illuminate, confirming that the surge protection is active and the unit is properly grounded.

OPERATION

Once installed, your Oviitech Multi-Functional Wall Mount Outlet is ready for use.

Using AC Outlets

- Plug your electronic devices directly into any of the four available AC outlets.
- Ensure that the total wattage of all connected devices does not exceed 1875W to prevent overloading.

Using USB Charging Ports

- Connect your USB-powered devices (e.g., smartphones, tablets, smartwatches) to the two USB-A ports using appropriate USB cables.
- The USB ports provide a combined output of 2.4A for efficient charging.

Understanding the LED Indicator

- The **RED "PROTECTED" LED** light indicates that the surge protection feature is active and your connected devices are protected from power surges. It also confirms that the unit is properly grounded.
- If the red LED light is off, the surge protection may have been compromised or the unit is not properly grounded. Refer to the Troubleshooting section.

MAINTENANCE

Proper maintenance ensures the longevity and performance of your surge protector:

- **Cleaning:** Disconnect the surge protector from the wall outlet before cleaning. Use a dry, soft cloth to wipe the exterior. Do not use liquid cleaners or aerosols.
- **Inspection:** Periodically inspect the device for any signs of damage, such as cracks, frayed wires, or loose connections. If damage is found, discontinue use and replace the unit.

TROUBLESHOOTING

If you encounter any issues with your Oviitech Wall Mount Outlet, refer to the following common problems and solutions:

No Power to Devices

- **Check Wall Outlet:** Ensure the wall outlet itself is functioning by plugging in another device.
- **Check Connections:** Verify that the surge protector is securely plugged into the wall outlet and that devices are firmly plugged into the surge protector.
- **Overload:** If too many high-power devices are connected, the unit may have tripped its internal protection. Unplug some devices and try again.

"PROTECTED" LED Light is Off

- This indicates that the surge protection may no longer be active, or the unit is not properly grounded.
- If the LED is off, the unit may still function as a power strip, but it will no longer provide surge protection.
- It is recommended to replace the unit if the "PROTECTED" LED is off to ensure continued protection for your electronics.

WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the product packaging or contact Oviitech customer service directly. Contact details can typically be found on the manufacturer's website or included documentation.

ASK A QUESTION ABOUT THIS MANUAL

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
