Motorola FOCUS72B

Motorola FOCUS72B Outdoor Smart Surveillance Camera User Manual

Model: FOCUS72B

INTRODUCTION

The Motorola FOCUS72B is an outdoor smart surveillance camera designed for remote monitoring. This manual provides instructions for setting up, operating, and maintaining your camera to ensure optimal performance. The camera connects via Wi-Fi, allowing you to view live HD video streams and receive motion detection notifications on compatible smartphones, tablets, and computers through the Hubble app. It features a 110-degree field of view, digital zoom, infrared night vision, and is resistant to wind and rain (IP66 rated).

SETUP INSTRUCTIONS

1. Physical Installation

1. **Choose a Location:** Select an outdoor location that provides the desired viewing angle and is within range of your Wi-Fi network. Ensure the camera is positioned to cover the area you wish to monitor.
2. **Mount the Camera:** Use the provided installation kit (screws and wall plugs) to securely mount the camera to a wall or suitable surface. Ensure the mounting bracket is firmly attached.
3. **Connect Power:** Connect the power adapter to the camera and plug it into a weather-protected outdoor power outlet. Use the cord extension if necessary.
4. **Adjust Angle:** Loosen the adjustment screws on the camera's bracket to set the desired viewing angle. Tighten the screws once the angle is satisfactory.

2. App Installation and Pairing

1. **Download the Hubble App:** Search for "Hubble Connected" in your smartphone's app store (iOS or Android) and download the application.
2. **Create an Account:** Open the Hubble app and follow the on-screen instructions to create a new user account or log in if you already have one.
3. **Add Your Camera:** In the app, select the option to add a new camera or device. Follow the guided steps to connect your FOCUS72B camera to your home Wi-Fi network. This typically involves scanning a QR code on the camera or entering your Wi-Fi credentials.
4. **Verify Connection:** Once paired, the camera's status indicator should confirm a successful connection, and you should be able to view the live video feed within the app.

OPERATING INSTRUCTIONS

Live Video Streaming

Open the Hubble app on your compatible device. Select your FOCUS72B camera from the device list to view the live HD video feed. You can monitor your property in real-time from anywhere with an internet connection.

Motion Detection and Notifications

The camera is equipped with a PIR motion sensor. When motion is detected, the camera can automatically begin recording and send notifications to your connected device. You can customize motion detection sensitivity and notification settings within the Hubble app.

Video Recording and Image Snapshots

The Hubble app allows for manual video recording and image snapshots directly from the live view. These recordings and images are typically stored within the app or associated cloud service (subscription may be required for extended storage).

Night Vision

The FOCUS72B features infrared night vision, enabling clear video monitoring in low-light or complete darkness. The camera automatically switches to night vision mode when ambient light levels are insufficient.

Digital Zoom

While viewing the live feed, you can use the digital zoom function within the Hubble app to get a closer look at specific areas of interest.

MAINTENANCE

- **Cleaning:** Periodically clean the camera lens with a soft, damp cloth to ensure clear image quality. Do not use harsh chemicals or abrasive cleaners.
- **Power Connection:** Ensure the power adapter and cable connections remain secure and free from damage.
- **Software Updates:** Regularly check the Hubble app for any available firmware updates for your camera to ensure optimal performance and security.

TROUBLESHOOTING

Problem	Solution
Camera not connecting to Wi-Fi or frequently disconnects.	◦ Ensure the camera is within range of your Wi-Fi router. ◦ Check your Wi-Fi network name (SSID) and password for accuracy. ◦ Restart your Wi-Fi router and the camera. ◦ If issues persist, try resetting the camera to factory defaults (refer to the Quick Start Guide for reset button location) and re-pair it with the Hubble app.
No video feed in the Hubble app.	◦ Verify the camera is powered on and connected to Wi-Fi. ◦ Check your internet connection on your viewing device. ◦ Ensure the Hubble app is updated to the latest version. ◦ Try closing and reopening the app.
Motion detection not working or too sensitive.	◦ Adjust the motion detection sensitivity settings within the Hubble app. ◦ Ensure there are no obstructions blocking the camera's view or the PIR sensor. ◦ Check for environmental factors like moving branches or strong light changes that might trigger false alerts.

SPECIFICATIONS

Feature	Detail
Model Number	FOCUS72B
Indoor/Outdoor Usage	Outdoor
Connectivity	Wi-Fi (Wireless)
Compatible Devices	Desktop, Smartphone, Tablet
Power Source	Corded Electric
Mounting Type	Wall Mount
Video Capture Resolution	720p HD
Color	Black
Dimensions (L x W x H)	7.05 x 2.63 x 10.05 inches
Item Weight	1.15 Pounds
Field Of View	110 Degrees
Night Vision	Infrared
Zoom Type	Digital Zoom
Alert Type	Motion Only

Feature	Detail
Control Method	App (Hubble Connected)
IP Rating	IP66 (Wind and Rain Resistant)

Safety Information

- Do not attempt to repair or modify the camera yourself. Refer all servicing to qualified personnel.
- Ensure the power adapter and cable are not damaged or pinched.
- Keep the camera and its components out of reach of children.
- Operate the camera within the specified temperature and humidity ranges.
- Dispose of the product and its components responsibly according to local regulations.

Warranty and Support

For warranty information, technical support, or further assistance, please refer to the official Motorola website or contact their customer service department. Details can typically be found in the Quick Start Guide included with your product or on the Hubble Connected app support section.
