McKesson Lightweight Aluminum Rollator Walker with Seat and Wheels

Model: B0785N3TYX

Instruction Manual

INTRODUCTION

This manual provides essential information for the safe and effective use of your McKesson Lightweight Aluminum Rollator Walker. Please read all instructions carefully before assembly and operation. This 4-wheel rollator features a durable aluminum frame, an oversized padded seat and backrest, and a convenient storage pouch. It is designed to support users up to 300 pounds and is suitable for both indoor and outdoor use.

SAFETY INFORMATION

- Always ensure all parts are securely fastened before use.
- Do not exceed the maximum weight capacity of 300 pounds.
- Engage the brakes when sitting on the seat or when the rollator is stationary.
- Use caution on uneven surfaces or inclines.
- Regularly inspect the rollator for wear and tear, especially the wheels and braking system.
- This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

PARTS LIST

Your McKesson Rollator Walker includes the following main components:

- Aluminum Frame
- Adjustable Handles with Loop-Lock Brakes
- Padded Seat
- Hinged Padded Backrest
- 6-inch Non-Marring Caster Wheels (4)
- Under-seat Storage Pouch

SETUP AND ASSEMBLY

The McKesson Rollator Walker is designed for easy setup. Follow these steps:

1. **Unfold the Rollator:** Carefully unfold the rollator frame until it locks into place. Ensure all locking mechanisms are engaged.
2. **Adjust Handle Height:** Locate the adjustment levers on the handles. Press the lever and slide the handle up or down to your desired height. Ensure the handles are at a comfortable height, allowing for a slight bend in your elbows when standing upright. Release the lever to lock the handles in position.
3. **Position the Backrest:** The hinged padded backrest can be folded up, down, or removed as needed for comfort or storage.
4. **Check Brakes:** Ensure the deluxe loop-lock braking system is functioning correctly. Squeeze the hand brakes to slow down or stop. Push the handle into the down position to lock the brakes for a stationary position.
5. **Verify Stability:** Before initial use, gently push down on the handles and seat to confirm the rollator is stable and all components are securely attached.

OPERATING INSTRUCTIONS

Walking with the Rollator

1. Stand upright behind the rollator, holding both handles firmly.
2. Push the rollator forward a short distance.
3. Step forward with one foot, then the other, maintaining a comfortable pace.
4. Keep your body close to the rollator for optimal balance and support.

Provides support and stability

Image: The rollator in use, demonstrating its role in providing support and stability.

Using the Brakes

- **To Slow Down or Stop:** Squeeze the hand brake levers located on the handles.
- **To Lock the Brakes:** Push the hand brake levers down until they click into the locked position. This will prevent the rollator from moving. Always lock the brakes before sitting on the seat.
- **To Release the Brakes:** Pull the hand brake levers up to unlock the wheels.

Deluxe braking system

Image: Detail of the deluxe loop-lock braking system for secure stopping and parking.

Using the Seat and Storage

- **Sitting:** Ensure the rollator is on a flat, stable surface. Lock both brakes before attempting to sit. Sit slowly and carefully on the padded seat.
- **Storage:** The under-seat pouch provides convenient storage for personal items. Lift the seat to access the pouch.

Convenient storage and seating

Folding for Storage and Transport

The rollator folds down for easy storage and transport. Consult the product's quick-start guide or manufacturer's instructions for specific folding mechanisms, as these can vary by model.

MAINTENANCE

- **Cleaning:** Wipe down the frame and seat with a damp cloth and mild soap. Do not use abrasive cleaners.
- **Wheel Inspection:** Periodically check the 6-inch non-marring caster wheels for debris or damage. Ensure they swivel freely.
- **Brake Adjustment:** If the brakes feel loose or do not engage properly, they may need adjustment. Consult a qualified technician or the manufacturer's support for assistance.
- **Fasteners:** Ensure all screws, bolts, and other fasteners are tight. Do not overtighten.

TROUBLESHOOTING

- **Rollator pulls to one side:** Check for uneven handle height adjustment or debris in the wheels. Ensure wheels are properly aligned.

- **Brakes not engaging:** Inspect the brake cables for damage or looseness. The brake mechanism may require adjustment by a professional.
- **Difficulty folding:** Ensure the seat is fully lifted and any locking pins are disengaged before attempting to fold.

SPECIFICATIONS

| Feature | Detail |
|--------------------------|----------------------------|
| Brand | McKesson |
| Model Number | B0785N3TYX |
| Color | Red |
| Material | Aluminum, Metal |
| Weight Capacity | 300 lbs |
| Item Weight | 15.4 Pounds |
| Product Dimensions | 20"D x 24.5"W x 37"H |
| Handle Height Adjustment | 32 to 37 inches |
