DELTA 75784

Delta 75784 Universal Shower Head Instruction Manual

Model: 75784 | Brand: DELTA

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Delta 75784 Universal Shower Head. Designed for ease of use and durability, this shower head features 7 distinct spray settings and Delta's Touch-Clean spray holes for simple maintenance. Please read this manual thoroughly before installation and use.

SAFETY INFORMATION

- Ensure the main water supply is turned off before beginning any installation or maintenance.
- Use appropriate tools and follow all local plumbing codes.
- Do not overtighten connections, as this may damage the product.
- Keep small parts away from children.

PACKAGE CONTENTS

Verify that all components are present before proceeding with installation:

- Delta 75784 Universal Shower Head (1)

SETUP AND INSTALLATION

The Delta 75784 shower head is designed for quick and easy installation, typically taking less than 20 minutes with no special tools required.

1. **Prepare the Shower Arm:** Ensure the existing shower arm is clean and free of old sealant or tape.
2. **Apply Thread Sealant:** Wrap plumber's tape (not included) clockwise around the threads of the shower arm.
3. **Attach Shower Head:** Hand-tighten the Delta 75784 shower head onto the shower arm. Use a wrench to tighten an additional 1/4 to 1/2 turn, being careful not to overtighten.
4. **Test for Leaks:** Turn on the water supply and check for any leaks. If leaks occur, tighten slightly more or reapply plumber's tape.

7-SPRAY SHOWER HEAD

This image illustrates the physical dimensions of the Delta 75784 shower head, showing a depth of 3.56 inches and a width of 4.87 inches. These measurements are important for installation planning.

OPERATING INSTRUCTIONS

Your Delta 75784 shower head offers 7 distinct spray settings and a convenient pause feature.

- **Changing Spray Settings:** Rotate the spray face or the lever on the side of the shower head to cycle through the available spray patterns. The 7 settings include: Full Body spray, Full Spray with Massage, Massaging spray, Shampoo Rinsing spray, Shampoo Rinsing spray with Massage, Drenching spray, and Pause.
- **Pause Feature:** The pause setting reduces water flow to a trickle. This allows you to conserve water while performing tasks such as shaving or lathering, without changing your preferred water temperature. To resume full flow, simply rotate the spray face or lever again.

The image displays the Delta 75784 shower head in operation, demonstrating water flow from its spray face. This illustrates the functional aspect of the shower head during use.

MAINTENANCE

The Delta 75784 shower head features Touch-Clean spray holes for easy maintenance.

- **Cleaning Spray Holes:** To remove mineral buildup (calcium and lime) from the soft rubber spray holes, simply wipe them with your finger or a soft cloth. No chemical cleaners or soaking are typically required.
- **General Cleaning:** Clean the exterior of the shower head with a soft, damp cloth. Avoid abrasive

cleaners, harsh chemicals, or scouring pads, as these can damage the finish.

TROUBLESHOOTING

If you encounter issues with your shower head, refer to the following common solutions:

- **Low Water Flow:** Check if the pause setting is partially engaged. Ensure your home's water pressure is adequate. Clean any mineral buildup from the spray holes as described in the Maintenance section.
- **Leaks at Connection:** Ensure the shower head is securely tightened to the shower arm. If necessary, remove the shower head, reapply plumber's tape to the shower arm threads, and reattach.
- **Difficulty Changing Spray Settings:** Ensure there is no debris obstructing the mechanism. Clean the spray face thoroughly.

SPECIFICATIONS

Feature	Detail
Brand	DELTA
Model Number	75784
