1. **Measure Rice:** Use the provided measuring cup to measure the desired amount of rice. One cup of uncooked rice typically yields about 2-3 cups of cooked rice.
2. **Wash Rice:** Rinse the rice thoroughly under cold running water until the water runs clear. This removes excess starch.

3. **Add Water:** Place the washed rice into the inner pot. Add water according to the water level markings inside the inner pot, corresponding to the amount of rice. For example, if you added 3 cups of rice, fill water to the '3' mark for white rice.
4. **Close Lid:** Ensure the inner pot is properly seated and close the lid securely until it locks.
5. **Select Mode:** Press the 'MODE' button or use the direct touch options to select 'WHITE RICE' or 'REGULAR WHITE RICE'.
6. **Start Cooking:** Press the 'COOK' button to begin the cooking cycle. The display will show the remaining cooking time.
7. **Keep Warm:** Once cooking is complete, the cooker will automatically switch to 'KEEP WARM' mode. Stir the rice gently with the spatula before serving.
