experience. Follow these steps to connect your audio source and adjust sound settings.

Audio Connection

- **3.5mm Audio Jack:** For devices with a standard headphone jack (e.g., smartphones, tablets, some gaming controllers), connect one end of the 3.5mm audio cable to your device's audio output and the other end to the chair's 3.5mm audio input port.

- **Wireless Connection (if applicable):** If your specific model includes a wireless transmitter (sold separately or as part of a bundle), refer to the separate instructions provided with the transmitter for pairing and connection procedures.

Sound Adjustment

Use the control panel, typically located on the side of the chair, to manage your audio experience.

- **Volume Control:** Rotate the volume knob clockwise to increase the overall sound level and counter-clockwise to decrease it.
